Mercury Marine enters into supply agreement with BRP; will immediately become outboard engine of choice for Alumacraft, Manitou & Telwater brands

FOND DU LAC, Wisc., May 27, 2020 (GLOBE NEWSWIRE) -- Mercury Marine, a division of Brunswick Corporation (NYSE:BC) and a world leader in marine propulsion systems, has entered into a strategic supply agreement with BRP to be the supplier of choice for BRP owned boat brands Alumacraft, Manitou, Quintrex & Stacer. BRP has made the decision to discontinue the production of E-TEC and E-TEC G2 engines effective immediately.

"This agreement brings us an incredible opportunity to further grow our brand in the marketplace and introduce our award-winning portfolio of outboard engines to new customers around the world," said Chris Drees, Mercury Marine president. "We have enjoyed long standing relationships with Alumacraft, Manitou and Telwater and we look forward to continuing to work with them while providing class-leading outboard engines and exceptional service to all of their global customers."

"We stay true and committed to our marine strategy, and we strongly believe that having two of the most innovative global marine companies to join forces, will not only be mutually beneficial to Mercury Marine and BRP, but also to the whole industry and to customers," said Karim Donnez, Senior Vice President, Marine Group, IS&T and Global Transformation. "While COVID-19 has precipitated the discontinuation of the production of our outboard engines, we will proudly offer packaged Manitou, Alumacraft, Quintrex and Stacer boats with Mercury Marine going forward."

Mercury Marine will be the outboard supplier of choice for the Alumacraft and Manitou brands as well as Quintrex & Stacer in Australia.

"We are excited for the BRP dealers and consumers to experience our new engines – and with our recent capacity related investments we are well positioned for continued growth," said Drees.

Boat packages for Alumacraft, Manitou, Quintrex & Stacer with Mercury outboards will be available in early June.
