Platform Origination Deep Dive

Apollo Global Management

November 2023
Forward Looking Statements and Other Important Disclosures

In this presentation, references to “Apollo,” “we,” “us,” “our” and the “Company” refer collectively to Apollo Global Management, Inc. and its subsidiaries, or as the context may otherwise require. This presentation may contain forward-looking statements that are within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements include, but are not limited to, discussions related to Apollo’s expectations regarding the performance of its business, its liquidity and capital resources and other non-historical statements. These forward-looking statements are based on management’s beliefs, as well as assumptions made by us, and information currently available to management. When used in this presentation, the words “believe,” “anticipate,” “estimate,” “expect,” “intend,” “target” or future or conditional verbs, such as “will,” “should,” “could,” or “may” and similar expressions are intended to identify forward-looking statements. Although management believes that the expectations reflected in these forward-looking statements are reasonable, it can give no assurance that these expectations will prove to have been correct. These statements are subject to certain risks, uncertainties and assumptions, including risks relating to inflation, market conditions and interest rate fluctuations generally, the impact of COVID-19, the impact of energy market dislocation, our ability to manage our growth, our ability to operate in highly competitive environments, the performance of the funds we manage, our ability to raise new funds, the variability of our revenues, earnings and cash flow, the accuracy of management’s assumptions and estimates, our dependence on certain key personnel, our use of leverage to finance our businesses and investments by the funds we manage, Athene’s ability to maintain or improve financial strength ratings, the impact of Athene’s reinsurers failing to meet their assumed obligations, Athene’s ability to manage its business in a highly regulated industry, changes in our regulatory environment and tax status, and litigation risks, among others. We believe these factors include but are not limited to those described under the section entitled “Risk Factors” in the Company’s annual report on Form 10-K filed with the Securities and Exchange Commission (the “SEC”) on March 1, 2023, as such factors may be updated from time to time in our periodic filings with the SEC, which are accessible on the SEC’s website at www.sec.gov. These factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included in this presentation and in our other filings with the SEC. We undertake no obligation to publicly update or review any forward-looking statements, whether as a result of new information, future developments or otherwise, except as required by applicable law.

This presentation may contain information regarding Apollo’s financial results that is calculated and presented on the basis of methodologies other than in accordance with accounting principles generally accepted in the United States (“non-GAAP measures”). Refer to slides at the end of this presentation for the definitions of non-GAAP measures presented herein, and reconciliations of GAAP financial measures to the applicable non-GAAP measures. This presentation is for informational purposes only and not intended to and does not constitute an offer to subscribe for, buy or sell, the solicitation of an offer to subscribe for, buy or sell or an invitation to subscribe for, buy or sell any securities, products or services, including interests in the funds, vehicles or accounts sponsored or managed by Apollo (each, an “Apollo Fund”), any capital markets services offered by Apollo, or the solicitation of any vote or approval in any jurisdiction pursuant to or in connection with the proposed transaction or otherwise, nor shall there be any sale, issuance or transfer of securities in any jurisdiction in contravention of applicable law.

Information contained herein is as of September 30, 2023 unless otherwise noted.

Apollo makes no representation or warranty, express or implied, as to the fairness, accuracy, reasonableness or completeness of the information contained herein, including, but not limited to, information obtained from third parties. Unless otherwise specified, information included herein is sourced from and reflects the views and opinions of Apollo Analysts. Certain information contained in these materials has been obtained from sources other than Apollo. While such information is believed to be reliable for purposes used herein, no representations are made as to the accuracy or completeness thereof and Apollo does not take any responsibility for such information.

This presentation may contain trade names, trademarks and service marks of companies which (i) neither Apollo nor Apollo Funds own or (ii) are investments of Apollo or one or more Apollo Funds. We do not intend our use or display of these companies' trade names, trademarks or service marks to imply a relationship with, or endorsement or sponsorship of us by, such companies. All rights in these materials are reserved to their respective copyright owners.

Certain information contained in the presentation discusses general market activity, industry or sector trends, or other broad-based economic, market or political conditions and should not be construed as research or investment advice.

This presentation is not complete and the information contained herein may change at any time without notice. Apollo does not have any responsibility to update the presentation to account for such changes. The information contained herein is not intended to provide, and should not be relied upon for, accounting, legal or tax advice or investment recommendations.

Past performance is not necessarily indicative of future results and there can be no assurance that Apollo, Athene, any Apollo Fund or strategy or platform company will achieve comparable results, or that any investments made by Apollo, Athene or any Apollo Fund in the future will be profitable. Actual realized value of currently unrealized investments will depend on, among other factors, future operating results, the value of the assets and market conditions at the time of disposition, any related transaction costs and the timing and manner of sale, all of which may differ from the assumptions and circumstances on which the current unrealized valuations are based. Accordingly, the actual realized values of unrealized investments may differ materially from the values indicated herein. Specific references to investments have been provided on a non-performance based criteria for information purposes only. Apollo makes no guarantee that similar investments would be available in the future or, if available, would be profitable. Not all investments shown are currently held by an Apollo Fund.

Please refer to the slides at the end of this presentation for additional important information.
Welcome Remarks

NOAH GUNN
Global Head of Investor Relations
Apollo’s North Star is Focused on a Singular Goal

What?

Provide **excess returns** to our clients on a risk-adjusted basis

For Whom?

A growing market driven by the need for **alpha** and **retirement income**
Key Objectives for Today’s Presentation

**Illuminate**

Market trends leading to the **proliferation of private credit**

**Identify**

Uses of excess return to power Athene, build market share, and split with other investors

**Illustrate**

How origination drives excess return and creates value for shareholders

Origination Platform Strategy

CHRIS EDSON
Global Co-Head of Apollo’s Financial Institutions Group (FIG)
Key Origination Platform Themes

1. Origination for Apollo helps power Athene & grow Apollo
2. There is an ongoing generational shift in credit markets
3. Apollo has spent 10+ years & billions of dollars building a large origination ecosystem
4. We are primarily focused on the origination of investment grade assets that generate excess spread
5. We have a long track record of low losses across private credit
6. We believe there is embedded growth in our origination ecosystem
### What Do Origination Platforms Do For Apollo?

Generational Shift Away from Traditional Banking Model

Traditional Financing Model

Borrowers

LARGE COMPANIES

SMALL COMPANIES

CONSUMERS

Lenders

CAPITAL MARKETS

BANKS

Strengths of the Traditional Banking Model:

- Low funding costs
- Provide critical client services – deposits, cash management
- Efficient holders of short-term assets
- Efficient holders of long-term, liquid and pledgeable assets

Key Challenges:

- Less efficient holders of long-term, illiquid assets
- Additional potential constraints on capital
What Is the New Model for Private Credit?

- **Private Credit Providers** include Insurance Companies, Pension Funds, & Other Institutional Investors
- Typically have **long-duration liabilities** or are primarily equity funded
- **Do not take deposits** or handle cash management / other services
- Well-suited to hold **duration assets** on a match-funded balance sheet

We are focused on partnering with the banking system and have entered into many complementary partnerships
Some Think of Private Credit as Leveraged Lending…

“Total private-debt AUM exceeded $1.2 trillion as of the end of 2022, and firms raised more than $200B for new funds over the year, said data-tracking company PitchBook Data”

– WSJ, 19-Sep-23

“The boom in private credit, a fast-growing $1.5 trillion corner of Wall Street born during an era of ultralow interest rates, is starting to show cracks”

– WSJ, 16-Oct-23

“The market for private lending was around $1.75 trillion in 2022, compared with roughly $500 billion in 2012, according to PitchBook”

– New York Times, 4-Oct-23

“Private credit funds are changing the global financial landscape, as they muscle in on lending that was once largely done by banks. Private debt funds pool money from investors and then use it to lend directly to companies”

– Axios, 26-Sep-23
…But We View Private Credit as A Much Larger Market

Represents the views and opinions of Apollo Analysts. Not an exhaustive list. Subject to change at any time without notice. For discussion purposes only.
Private Credit Takeaways

The Private Credit Market is Large – We are Focused on Areas with Attractive Risk / Reward

The Majority of Private Credit Across Apollo is Investment Grade

Origination Ecosystem is Primarily Focused on Asset-Backed Finance

Asset-backed finance has experienced low losses for a long period of time, especially for IG tranches and post-crisis for all tranches.

---

1. Represents the average default rate of U.S. products for all categories, except CLOs. CLOs represent the average of US CLO trailing 12-month impairment rate. 2001 - 2010 includes a discounted buyback of a pre-GFC CLO tranche (current CLO documents prohibit such activity); the related CLO transaction performed as expected and repaid all of its debt at par with no underlying impairment. Source: Moody’s Annual Default Study (February 2022). S&P Annual Global Structured Finance Default and Rating Transition Study (May 2021). Moody’s Impairment and loss rates of Global CLOs (June 2021).
Key Characteristics of Asset-Backed Finance

- Diversified Collateral Pool
- Self-Liquidating
- Typically Bankruptcy Remote
- Amortizing Structure
- Multiple Covenants & Triggers
Apollo’s Asset-Backed Finance Franchise

Key Differentiators of Apollo’s ABF Franchise

- **13+ years** of ABF investing experience
- **$200B+** asset-backed originations to date\(^1\)
- **28+** origination partnerships
- **200+** total origination relationships
- Diversity with asset types including whole loans, bonds, platform equity, and residuals
- Flexibility with varying strategies & return profiles

Apollo ABF Business

Funding, financing and structuring for asset-backed originations and structured solutions

<td>$76 billion</td>
<td>1.1bps</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td>~$212 billion</td>
<td>~1.3bps</td>
</tr>
</tbody>
</table>

Note: Reflects deployment and annualized loss rate from January 1, 2008, through December 31, 2022. 1 Annualized loss rate reflects an annualized calculation of cumulative losses since track record inception divided by gross deployment; losses defined as all realized net losses for since track record inception as well as losses derived from credit risk sales.
What Is An Origination Platform?
Components of An Origination Platform

Platform Building Blocks

- Standalone Company
- Balance Sheet / Funding Structure
- Value-Add Products
- Established Track Record
- Established Employee Base
  - Credit: Origination, Underwriting, Servicing
  - Support: Finance / Accounting, Technology, Ops

Finished Product

Repeatable Origination of Yield Assets with Excess Return on a Risk-Adjusted Basis
What Type of Products Do Origination Platforms Offer?

- **Homes**
  - Financed by Mortgages

- **Travel**
  - Aircraft Financing

- **Commute**
  - Financed with Fleet Leases

- **Food**
  - Franchise Finance

- **Purchases**
  - Consumer Point-of-Sale / Home Improvement

- **Offices**
  - Financed by Commercial Real Estate Debt

- **Technology**
  - Inventory Financing
Definition of a Platform Investment

Traditional Fund Investments

Third-Party Financing

- Debt sold to third parties

Only invest in equity tranche

- EQUITY

Transitory fund

- X

Dependent on an exit

- X

High equity returns but potential for volatility

- X

Origination quality and scale uncertain

- X

Typically equity only

Apollo Platform

- We invest in all tranches of debt and the equity

- EQUITY

- AAA

- AA

- A

- BBB

- BB

- EQUITY

- Permanent capital / long-duration

- ✔

- Not exit-dependent

- ✔

- Targeting stable low-to-mid teens returns with low volatility

- ✔

- Originates attractive risk/reward, significantly in excess of equity deployment

- ✔

- Investment across the capital structure

- ✔
Platforms Help Us to Manufacture Excess Spread in a World Where Alpha is Scarce

Investment Grade Investment Universe

current on the margin spreads (bps)

Apollo Direct Origination Platforms

~100-200bps of Excess Spread

1. Illustrative spreads based on market prices observed for BBB corporates (IG) as of November 10, 2023. Future results may vary substantially.
Apollo Has Spent 10+ Years and Billions of Dollars Building a Platform Origination Ecosystem

DRIVERS OF SECULAR CHANGE

Financial services companies depicted above are examples of current or former investments by Apollo or portfolio companies of investment funds managed by Apollo. 1. Subsequently sold to a subsidiary of Western Alliance Bancorporation in 2021.
Apollo’s Origination Platforms

- **16** proprietary asset origination platforms
- **~$8B** equity capital invested into platforms over past decade
- **~$130B** AUM across platforms
- **30+** product offerings across the full breadth of our origination capabilities
- **~3,900** origination platform employees

Note: Represents all current Apollo origination platforms. Origination platforms are portfolio companies of funds managed by Apollo. 1. Represents total assets managed at the origination platform level, which may deviate from total assets reported in Apollo’s AUM.
## Portfolio Comprised of Sixteen Individual Origination Platforms

Why have losses been so low?

- High-grade focus
- Over-collateralization
- Credit documentation control
- Full due diligence access
- Comprehensive relationship with borrower
- Diversified portfolios

---

1. Track record refers to the time that management or investment teams have worked together in the same product set or at the same firm, which includes the time before companies were formed, founded, and/or acquired by or otherwise affiliated with Apollo Aligned Alternatives.
Comprehensive Risk Monitoring for Origination Platforms

A broad network of risk officers and credit professionals who monitor origination platforms, supplementing dedicated CROs within each company.

Portfolio Risk Checklist

- Match funded balance sheets
- Diversification of funds / significant third-party investors
- Cash & available liquidity
- Base rate mismatch / hedging policy
- Key covenants and regular testing
- Predictable maturity profile
- Ample market access
- Recurring liquidity reports & stress test analytics

### Key Takeaways

1. Private credit is a large market that is not just direct lending, but includes the broader economy

2. Apollo has spent 10 years building an origination ecosystem involving ~3,900 platform employees

3. We are focused on IG assets and asset-backed finance; Apollo has a long track record of solid performance

4. Platforms seek excess returns with a long track record of low losses, while driving deployment for clients

5. There is significant embedded growth in the platforms as a part of Apollo's growth trajectory

We believe Apollo is uniquely positioned to take advantage of the growing market opportunity, given our differentiated scale, structure, and diversified origination ecosystem.
MidCap Financial

HOWARD WIDRA
Global Head of Direct Origination, Apollo, and Co-Founder, MidCap
MidCap is a Leading Specialty Finance Company Serving the Middle Market

**Business Highlights**

- **2008** Founded
  - Middle market-focused specialty finance firm that provides senior debt solutions to companies across multiple industries

- **2013** Acquired
  - Acquired by Athene as an equity investment in its alternatives portfolio

- **290+** Employees
  - Headquartered in Bethesda, MD with additional offices in New York, Chicago, and Los Angeles

**Financial Highlights**

- **$48B**
  - Commitments Managed 3Q’23

- **$14B+**
  - Assets Originated LTM 3Q’23

- **20+ yrs**
  - Senior Leadership Working Together

**Corporate Credit Rating**

- **BB+**

**Unique Platform With High Barriers To Entry**

- Difficult to replicate front-to-back team across each product
- Deep, diverse capital base and funding sources
- Long track record of low losses across products
- Benefits of scale – speaking for whole deal leads to more controls
- Scalable back-office infrastructure

---

1. Since inception in 2008, MidCap Financial has experienced cumulative losses of 28 basis points on $45.7 billion of funded assets, excluding loans and losses related to strategic and opportunistic acquisitions.
How Did MidCap Enter Apollo’s Ecosystem?

Originally acquired in 2013 as a core alternative investment for Athene, driven by consistent cash flow profile and downside protection.

Since then, MidCap has transformed into one of the largest capital providers to the middle market, driven by:

- Apollo, Athene and 3rd party investors have committed ~$3 billion of equity since inception
- Scaled and diversified access to debt capital
- Key management has remained in-place and overseen the scaling of the business
- Strategic integration with the broader Apollo ecosystem, as a cornerstone of direct origination platform strategy

$2.6B  +  $3.0B  +  $43B  =  $48B

Initial Size  +  Acquisitions from GE and PNC  +  Organic Commitments Growth On-Balance Sheet, in Sidecars, and Held by other Third Parties

2013  →  3Q 2023

Note: Totals may not add due to rounding.
MidCap’s Competitive Advantages

Scaled operations: sourcing, underwriting, portfolio management

Proven management team with strong credit track record

Access to diversified and scalable funding
MidCap Manages a Scaled and Diversified Portfolio of Middle Market Loans

Total Managed Commitments ($B)

- $48.4B Commitments
  - $48.4B Total Managed Commitments
  - $18.5B Commitments on MidCap Balance Sheet
  - $15.8B Commitments on MidCap & Apollo Sidecars
  - $14.1B Commitments in Apollo’s Ecosystem

Funded Assets on Balance Sheet ($B)

- $13.3B Commitments, of which $13.3B funded
- $18.5B commitments, of which $13.3B funded

- 57% Balance Sheet Funded Assets

</tr>
<tr>
<td>Net Income</td>
<td>~$480M</td>
</tr>
<tr>
<td>Return on Equity</td>
<td>~17%</td>
</tr>
</tbody>
</table>

MidCap has outperformed in 2023, generating a ~17% return on equity

- Stable, recurring fee and interest income from ~$13B on-balance sheet portfolio
- 11.4% yield on gross assets YTD, or 5.0% net interest margin net of debt financing
- Fees and other income streams, including syndication fees, sidecar management fees, and other fees from servicing managed commitments
- 70-80 bps budgeted provision for credit losses in a volatile year with high interest rates

Source: MidCap and Apollo Analysts. Provided for illustrative and discussion purposes only.
Multiple Levers of Downside Protection

Direct Lending Strategy
- ~100% 1st lien, senior secured
- Control over documentation (MidCap is agent on majority of its deals)
- Diverse lending products, including many collateralized
- Scaled proprietary deal flow

MidCap Franchise & Platform
- Experience managing loan workouts through stress
- Significant earnings contribution from fee income
- Servicing capabilities and infrastructure
- Diversified loan portfolio
- Long-dated financing in-place
- Apollo strategic relationship

Downside protection from combination of senior secured strategy + capabilities of the MidCap platform and franchise
MidCap Generates Substantial Investments for Apollo Affiliated Insurance Companies

<table>
<thead>
<tr>

Fleet Management Companies Are Critical Partners for Corporations

What’s the Value-Add to Corporations?

- The administrative burden to manage a fleet of vehicles creates significant regulatory and cost challenges for corporations, driven by different vehicle types, drivers, and state jurisdictions, among others.

- Fleet management companies streamline corporate vehicle operations, delivering material cost and efficiency advantages through:
  - Full life cycle management of the vehicle
  - Procurement savings from a wide vendor network
  - Streamline complexity of vehicle management
  - Dedicated support staff & technology systems for fleet drivers

Wheels has **20+ revenue-generating products & services and 100+ loan originators**, providing deep customer integration across multi-year contracts and diversifying its own revenue mix.

### Why Are Losses So Low?

Credit losses only occur when there is both a customer default and residual value loss on the vehicle. Both of these events are very low probability given (i) customer guarantee from strong credits & (ii) secured collateral.

**PROTECTION #1**

**Customer Guarantee (Triple Net Lease Obligations)**
- Given ~95% of the Wheels portfolio is open-end TRAC\(^1\) leases, the customer is generally responsible for any residual risk on the vehicle.

**PROTECTION #2**

**Secured Liquid Collateral**
- Leases are structured to build residual value cushion as they season.

---

Average charge-offs of less than 1bp since 2006

Note: Fiscal year for legacy Wheels is August 31 through 2021 and December 31 for 2022 (vs. Donlen & LeasePlan fiscal year is December 31 for all years). 1. TRAC stands for terminal rental adjustment clause.
Key Takeaways

1. Highly synergistic and complementary roll-up strategy, created through unique Apollo balance sheet and M&A capabilities

2. Annuity-like earnings with strong growth and profitability across economic cycles

3. Leading market position with strong customer value proposition and customer retention

4. Long-term, embedded relationships with a diverse book of high-quality clients

5. Strong record of very low credit losses demonstrates quality of credit book

Asset-Backed Credit is the Lifeblood of Global Businesses and Consumers

- **Purchases**: Financed by Credit Cards
  - Drive: Purchases financed with Auto Loans Rentals available courtesy of Fleet Leases
  - Commute: Public Transport financed by Private Infrastructure Debt
  - Produce: Heavy machinery used in goods production financed by Equipment Leases
  - Travel: Aircrafts financed by Aircraft Loans or Leases

- **Offices**: Multifamily Properties and Office Space financed by Commercial Real Estate Debt

- **Homes**: Financed by Mortgages

- **Food**: Restaurant franchises financed via Whole Business Securitizations

- **Listen**: Music financed by the Music Royalties market

- **Energy**: Supporting energy transition financed by Solar Backed Notes
ATLAS SP is a Finance Company that Lends to Other Finance Companies

ATLAS SP VALUE CHAIN

Illustrative Loan Originators

Originators lend to end-borrowers and go to structured credit providers for capital to fund their balance sheet.

Warehouse Facility

With strict terms in place, the facility lends against select assets at a look-through LTV\(^1\) (i.e. 70% on 70% LTV).

Securitization

Loans accumulate in the warehouse until critical mass to facilitate a securitization\(^2\).

Capital Markets

ATLAS SP distributes select tranches of the securitization to investors leveraging Apollo’s ecosystem.

ATLAS SP & Apollo earn warehouse financing fees, securitization structuring fees, and syndication fees.

1. Look-through advance rate refers to ATLAS SP only taking risk on the senior tranche of the loan while third-party investors take on equity risk in the warehouse and the loan originator takes equity risk in the original loan. 2. Not all ATLAS SP warehouses lead to securitizations. In cases where a securitization takeout does not take place, the client’s loan cash flows paydown the warehouse facility or the client refinances the loan.
Providing Originators with Flexible Capital at Favorable Attachment Point

What is a Warehouse?

- A line of credit given to originators and/or sponsors that generates contractual, predictable cashflows.
- Facilities are secured with a pool of collateral that meets predefined eligibility criteria.
- Creates higher-rated debt by legally separating the credit of the assets from the originator’s and/or sponsor’s credit.

Why Would a Company Need a Warehouse Loan?

<table>
<thead>
<tr>
<th>Private Market Solution</th>
<th>Customized funding via private markets for companies that may not have access to the broadly syndicated market.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lower Borrowing Costs</td>
<td>Reduces borrowing costs for companies with pools of high-quality assets relative to credit priced on corporate risk.</td>
</tr>
<tr>
<td>Securitization</td>
<td>Provides bridge financing to loan originators that may need to syndicate out risk to the broader market.</td>
</tr>
</tbody>
</table>

Illustrative Warehouse to Securitization Risk

ATLAS SP is credit-enhanced by two layers of protection.

1. Ratings for illustrative purposes only and based on credit equivalents. 2. Illustrative tranching; not all securitizations have AAA – Equity tranches.
Asset-Backed Credit is a Growing and Diverse Market

Source: SIFMA, JP Morgan, Apollo Analysts, Financial Stability Board report on total private financial assets originated and held by non-banks, as of Q2 2022.
ATLAS SP Offers a Full Suite of Lending Solutions to Originators

Product Set

1. ATLAS SP historical values for excess spread for similar risk refers to Credit Suisse Securitized Products Group historical values.
ATLAS SP’s Portfolio is Inherently High Grade and Low Risk

Key Portfolio Stats

- Single-A / BBB credit equivalent
- Average warehouse funded balance of ~$130 million
- Average warehouse credit limit of ~$280 million
- ~300 financing clients

Note: Portfolio Stats and Breakdown as of February 2023, ATLAS SP Launch 1. Includes unfunded commitments. 2. Represents funded AUM at launch.
ATLAS SP’s Portfolio is Structurally Protected with Near-Zero Loss Rates

Risk Mitigating Features

- Consistent underwriting process
- Rigorous stress testing
- Contractual protections
- Substantial credit enhancement
- High balance sheet turnover
- Experienced team
- Dedicated due diligence team

Very low historical impairments and modeled portfolio stress

\(<1\text{bp}\) in aggregate impairments on originations over the past 7 years\(^1\)

\(<1\%\) in modeled losses on the portfolio under a GFC stress scenario\(^2\)

Note: ATLAS SP, prior to February 8, 2023, is historically identified as Credit Suisse Securitized Products Group, or SPG. On February 8, 2023, the SPG team and assets were substantially spun out as ATLAS SP. 1. For the period: 2015-2022. Originations defined as expected utilization of originated maximum facility amount. 2. Based on the application of historical market loss rates or rating agency stressed cash flow methodologies for BBB equivalent rating. Conservatively, model assumes no collateral recoveries or margin paid on recourse, mark to market facilities. Portfolio stressed as of December 31, 2022 to estimate losses under a severely stressed macro-environment.
ATLAS SP Serves as the Ideal Partner to Banks, Credit Funds, and Borrowers

**Value Proposition**

- Capital Flexibility
- Scaled Origination and Operating Infrastructure

**Partnership Offering**

- **DISTINCT CAPABILITY SET**
  Combination of flexible capital with scaled infrastructure

- **UNIQUE POSITIONING**
  Utility provider to bank and credit fund clients to supplement their existing capabilities and strengths

- **BETTER SOLUTIONS FOR CLIENTS**
  Provides scale, speed and certainty to institutional borrowers in partnership with other providers
Select ATLAS SP Case Studies Showcase Breadth of Capabilities

**PacWest Bank**

- **ATLAS SP**
  - $1.4B Bridge Term Loan
  - Collateralized by No-Income Mortgage Loans

  - **Sole Structuring Agent and Lead Arranger**
    - March 2023

  - Providing size, speed and execution certainty in volatile markets
    - Able to execute in a volatile market in less than one week with an existing bank partner and client
    - Large capital base allowed ATLAS SP and Apollo affiliates to fund the entire loan

**Sunnova**

- **ATLAS SP**
  - $3B Guarantee Program Residential Solar Loans
  - Debt Advisor September 2023

  - **ATLAS SP**
    - ~$245M ABS Securitization Residential Solar Loans
    - Sole Structuring Agent & Joint Bookrunner October 2023

  - Supporting public-private partnership’s energy transition goals
    - U.S. Department of Energy (DOE)’s $3B partial loan guarantee to Sunnova is the single largest federal government commitment to solar power
    - Client reduced its cost of capital and accelerated the deployment of new energy technology to homeowners
    - First solar ABS to achieve a AAA credit rating

**KKR**

- **ATLAS SP**
  - ~$780M Acquisition Financing Acquisition of KMR II Portfolio
  - Class A Lender October 2021

  - **ATLAS SP**
    - ~$730M ABS Securitization Music IP Backed Notes
    - Structuring Agent & Joint Bookrunner February 2022

  - Financing and Securitization of Music Rights Portfolio for Credit Fund Client
    - Provided acquisition financing in just 6 weeks for the largest music portfolio sale in 2021
    - Inaugural music royalty securitization for KKR and largest music ABS transaction at the time since 2000

Translating Origination to Earnings Power

MARTIN KELLY
Chief Financial Officer
Revisiting Key Strategic Benefits of Apollo-Athene Merger

1. Full Alignment Accelerates Growth and Creates a Better Proposition for Our Clients
2. Significant Cross Platform Product Development and Innovation Opportunity
3. Owning Means of Production via Origination Platforms Creates Differentiated Asset Flow
4. Enhanced Capital Efficiency and Flexibility

Today’s Focus
Excess return / spread generated for Retirement Services and third-party clients not available in public markets

Generated through Apollo’s portfolio of origination platforms and credit teams

Helps drive incremental FRE and SRE for shareholders

Increasing Earnings Power

Alpha Generation For Clients

Proprietary Asset Origination
Originated Assets Have Multiple Homes Across Apollo

PARTIAL ALLOCATION

- Retirement Services Balance Sheets
- Third-Party Funds and Managed Accounts
- Capital Solutions
Illustrative Allocation for an Originated Asset

We want “25% of everything and 100% of nothing”
Origination Creates Several Avenues of Earnings Generation

**MANAGEMENT FEES ON DEBT / EQUITY**
- Fees on Deployment

**SYNDICATION FEES**
- Fees on Origination and Distribution

**EQUITY DEPLOYMENT THROUGH AAA**
- Downside-Protected Low-to-Mid Teens ROE

**DEBT / FLOW DEPLOYMENT**
- ~100–200bps Excess Asset Yield

**FEE RELATED EARNINGS**

**SPREAD RELATED EARNINGS**

2. Please refer to Slide 116 for the reconciliation of total investments, including related parties, to gross invested assets and net invested assets.
Platform Equity Ownership Evolves as the Businesses Scale

- **Initial investment**
  - **GOAL**: Source leading businesses that generate assets with excess spread on a recurring basis and stable equity returns

- **Scale business**
  - **GOAL**: Increase origination capacity through organic and inorganic means

- **Diversify ownership**
  - **GOAL**: Expand and diversify the capital base while maintaining control of means of production
Three Distinct Pillars Driving Our Capital Solutions Business

**Origination**
- Dedicated client coverage
- Product-agnostic origination
- Full suite of solutions and platform capabilities

**Capital Markets**
- Integrated execution and deal teams
- Deep structuring advice
- Global banking relationships

**Syndication**
- Global investor coverage team
- Apollo-anchored transactions allocated to key counterparties
Apollo Capital Solutions Facilitates Deployment Activity Across the Platform

Five Key Takeaways from Today’s Presentation

1. Origination platforms provide a recurring supply of proprietary private credit assets

2. We believe our ecosystem is a meaningful competitive advantage and is difficult to replicate

3. Credit loss experience across origination platforms has been minimal

4. Origination platforms are funded in a capital efficient way via Athene and third-party capital

5. Platforms help drive Apollo’s earnings by supporting incremental FRE and SRE
Q&A Panel
Appendix – Speaker Biographies
Speaker Bios

NOAH GUNN
Noah Gunn is the Global Head of Investor Relations for Apollo primarily responsible for leading the firm's outreach effort to the investment community. Noah has been with Apollo for more than a decade, including three years serving as the Head of Investor Relations for Athene prior to the merger. Prior to 2013, he spent the preceding six years working at three different banks in equity research covering a diverse group of financial companies, including alternative asset managers. His prior employers include Bank of America Merrill Lynch, Deutsche Bank, and UBS. Previously, Mr. Gunn earned a M.S. Accounting degree from the University of Virginia and a B.S. in Finance degree from Bentley University.

CHRIS EDSON
Chris Edson is Partner and Co-Head of Global FIG at Apollo, with focus on financial services and yield investments, including yield platforms, partnerships and various other debt and equity investments. Chris is also a member of the Firm’s Leadership Team. Chris serves on the board of directors of MidCap Financial, ATLAS SP Partners, Aqua Finance, Capteris, Cadma, Apterra, Wheels, PK AirFinance and Eliant. He was also involved with Apollo’s investments in ADNOC, Hertz, Capital Vacations, Charter Communications, Lifepoint, RegionalCare, Capella, Presidio, ClubCorp, SourceCorp, SourceHOV, Novitex, American Gaming Systems, and PNC’s franchise finance business. Prior to joining Apollo in 2008, Chris was a member of the Financial Institutions Investment Banking group at Goldman Sachs & Co. He graduated from Indiana University with a BS in Finance.

HOWARD WIDRA
Howard Widra is Partner and Head of Direct Origination, Credit, at Apollo, and has been with the Firm and/or its affiliates since 2013. He was appointed Executive Chairman of MidCap Financial Investment Corporation in August 2022. He served as the Company’s Chief Executive Officer from May 2018 to August 2022 and as President from June 2016 to May 2018. He has also been a Director since May 2018. Howard is a co-founder of MidCap Financial and formerly its Chief Executive Officer. Prior to MidCap, Howard was the founder and President of Merrill Lynch Capital Healthcare Finance, and President of GE Capital Healthcare Commercial Finance before that, where he held senior roles in its predecessor entities. Howard holds a JD awarded cum laude from the Harvard Law School and a BA from the University of Michigan.

SHLOMO CRANDUS
Shlomo Crandus is Chief Executive Officer of Wheels, after leading Wheels Donlen as CEO since October 2021. As CEO, he is responsible for leading the overall strategic direction for the combined businesses and bringing together best-in-class mobility management companies to drive growth and revenue opportunities. Shlomo proudly continues the company’s legacy of passionately striving to bring clients success and supporting a high performing and ethical business culture. Before the CEO role at Wheels Donlen, Shlomo was Chief Financial Officer at Wheels, where he was responsible for financial, risk, legal, and corporate development activities. Before Wheels, Shlomo held several leadership positions at Transamerica Finance Corporation and KPMG. Shlomo has an MBA from the University of Chicago and a BS in Accounting from the University of Illinois.
Jay Kim is Chief Executive Officer of ATLAS SP. Jay leads the day-to-day operations of ATLAS SP and is responsible for the overall strategic direction and growth of the fund. He serves as the chair of the ATLAS SP Executive Committee and is a voting member of the Investment and Underwriting Committees. Prior to joining ATLAS SP, Jay served as Global Head of Fixed Income and Global Head of Securitized Products at Credit Suisse, joining the firm in 2011. In addition, he served as a member of the Investment Bank Management Committee and as a board member of Credit Suisse Holdings USA. Before this, he also served as Co-Head of Securitized Products Origination Group at Barclays since 2001. He began his career as an analyst at Brown Brothers Harriman before transitioning to an associate at Barclays and Salomon Smith Barney. Jay has a civil engineering degree from Bucknell University.

Martin Kelly is Chief Financial Officer at Apollo, where he also oversees the Firm’s Technology, Operations, Risk and Audit groups and is a member of the Firm’s Leadership Team. Prior to joining Apollo in 2012, Martin was with Barclays and Lehman Brothers in leadership roles that included overseeing finance of the equities, investment banking and fixed income businesses. He previously served as Partner at PricewaterhouseCoopers.

Martin received a degree in Commerce, majoring in Finance and Accounting, from the University of New South Wales.

Definitions

• “Segment Income”, or “SI”, is the key performance measure used by management in evaluating the performance of the asset management, retirement services, and principal investing segments. Management uses Segment Income to make key operating decisions such as the following:
  - decisions related to the allocation of resources such as staffing decisions including hiring and locations for deployment of the new hires;
  - decisions related to capital deployment such as providing capital to facilitate growth for the business and/or to facilitate expansion into new businesses;
  - decisions related to expenses, such as determining annual discretionary bonuses and equity-based compensation awards to its employees. With respect to compensation, management seeks to align the interests of certain professionals and selected other individuals with those of the investors in the funds and those of Apollo’s stockholders by providing such individuals a profit sharing interest in the performance fees earned in relation to the funds. To achieve that objective, a certain amount of compensation is based on Apollo’s performance and growth for the year; and
  - decisions related to the amount of earnings available for dividends to Common Stockholders and holders of RSUs that participate in dividends.

Segment Income is the sum of (i) Fee Related Earnings, (ii) Spread Related Earnings, and (iii) Principal Investing Income. Segment Income excludes the effects of the consolidation of any of the related funds and SPACs, HoldCo interest and other financing costs not attributable to any specific segment, Taxes and Related Payables, transaction-related charges and any acquisitions. Transaction-related charges includes equity-based compensation charges, the amortization of intangible assets, contingent consideration, and certain other charges associated with acquisitions, and restructuring charges. In addition, Segment Income excludes non-cash revenue and expense related to equity awards granted by unconsolidated related parties to employees of the Company, compensation and administrative related expense reimbursements, as well as the assets, liabilities and operating results of the funds and VIEs that are included in the consolidated financial statements.

• “Fee Related Earnings”, or “FRE”, is a component of Segment Income that is used to assess the performance of the Asset Management segment. FRE is the sum of (i) management fees, (ii) capital solutions and other related fees, (iii) fee-related performance fees from indefinite term vehicles, that are measured and received on a recurring basis and not dependent on realization events of the underlying investments and (iv) other income, net, less (a) fee-related compensation, excluding equity-based compensation, (b) non-compensation expenses incurred in the normal course of business, (c) placement fees and (d) non-controlling interests in the management companies of certain funds the Company manages.

• “Spread Related Earnings”, or “SRE” is a component of Segment Income that is used to assess the performance of the Retirement Services segment, excluding certain market volatility, which consists of investment gains (losses), net of offsets and non-operating change in insurance liabilities and related derivatives, and certain expenses related to integration, restructuring, equity-based compensation, and other expenses. For the Retirement Services segment, SRE equals the sum of (i) the net investment earnings on Athene’s net invested assets and (ii) management fees received on business managed for others, primarily the ADIP portion of Athene’s business ceded to ACRA, less (x) cost of funds, (y) operating expenses excluding equity-based compensation and (z) financing costs including interest expense and preferred dividends, if any, paid to Athene preferred stockholders.

• “Principal Investing Income”, or “PII” is a component of Segment Income that is used to assess the performance of the Principal Investing segment. For the Principal Investing segment, PII is the sum of (i) realized performance fees, including certain realizations received in the form of equity, (ii) realized investment income, less (x) realized principal investing compensation expense, excluding expense related to equity-based compensation, and (y) certain corporate compensation and non-compensation expenses.

• “Adjusted Net Income” or “ANI” represents Segment Income less HoldCo interest and other financing costs and estimated income taxes. Adjusted Net Income is calculated and presented on the basis of methodologies other than in accordance with generally accepted accounting principles in the United States of America (“Non-GAAP”). Income taxes on FRE and PII represents the total current corporate, local, and non-U.S. taxes as well as the current payable under Apollo’s tax receivable agreement. Income taxes on FRE and PII excludes the impacts of deferred taxes and the remeasurement of the tax receivable agreement, which arise from changes in estimated future tax rates. For purposes of calculating the Adjusted Net Income tax rate, Segment Income is reduced by HoldCo interest and financing costs. Certain assumptions and methodologies that impact the implied FRE and PII income tax provision are similar to those used under U.S. GAAP. Specifically, certain deductions considered in the income tax provision under U.S. GAAP relating to transaction related charges, equity-based compensation, and income tax provision are similar to those used under U.S. GAAP. Generally, certain deductions considered in the income tax provision under U.S. GAAP relating to transaction related charges, equity-based compensation, and deductible interest expense are taken into account for the implied tax provision. Income Taxes on SRE represent the total current and deferred tax expense or benefit on income before taxes adjusted to eliminate the impact of the tax expense or benefit associated with the non-operating adjustments. Management believes the methodologies used to compute income taxes on FRE, SRE, and PII are meaningful to each segment and increases comparability of income taxes between periods.
Definitions (Continued)

- “Apollo Aligned Alternatives”, or “AAA”, refers to Apollo Aligned Alternatives Aggregator, LP
- “Assets Under Management”, or “AUM”, refers to the assets of the funds, partnerships and accounts to which Apollo provides investment management, advisory, or certain other investment-related services, including, without limitation, capital that such funds, partnerships and accounts have the right to call from investors pursuant to capital commitments. AUM equals the sum of:

1. the net asset value (“NAV”), plus used or available leverage and/or capital commitments, or gross assets plus capital commitments, of the yield and certain hybrid funds, partnerships and accounts for which we provide investment management or advisory services, other than certain collateralized loan obligations (“CLOs”), collateralized debt obligations (“CDOs”), and certain perpetual capital vehicles, which have a fee-generating basis other than the mark-to-market value of the underlying assets; for certain perpetual capital vehicles in yield, gross asset value plus available financing capacity;
2. the fair value of the investments of equity and certain hybrid funds, partnerships and accounts Apollo manages or advises, plus the capital that such funds, partnerships and accounts are entitled to call from investors pursuant to capital commitments, plus portfolio level financings;
3. the gross asset value associated with the reinsurance investments of the portfolio company assets Apollo manages or advises; and
4. the fair value of any other assets that Apollo manages or advises for the funds, partnerships and accounts to which Apollo provides investment management, advisory, or certain other investment-related services, plus unused credit facilities, including capital commitments to such funds, partnerships and accounts for investments that may require pre-qualification or other conditions before investment plus any other capital commitments to such funds, partnerships and accounts available for investment that are not otherwise included in the clauses above.

Apollo’s AUM measure includes Assets Under Management for which Apollo charges either nominal or zero fees. Apollo’s AUM measure also includes assets for which Apollo does not have investment discretion, including certain assets for which Apollo earns only investment-related service fees, rather than management or advisory fees. Apollo’s definition of AUM is not based on any definition of Assets Under Management contained in its governing documents or in any Apollo Fund management agreements. Apollo considers multiple factors for determining what should be included in its definition of AUM. Such factors include but are not limited to (1) Apollo’s ability to influence the investment decisions for existing and available assets; (2) Apollo’s ability to generate income from the underlying assets in its funds; and (3) the AUM measures that Apollo uses internally or believes are used by other investment managers. Given the differences in the investment strategies and structures among other alternative investment managers, Apollo’s calculation of AUM may differ from the calculations employed by other investment managers and, as a result, this measure may not be directly comparable to similar measures presented by other investment managers. Apollo’s calculation also differs from the manner in which its affiliates registered with the SEC report “Regulatory Assets Under Management” on Form ADV and Form PF in various ways.

Apollo uses AUM, Gross capital deployed and Dry powder as performance measurements of its investment activities, as well as to monitor fund size in relation to professional resource and infrastructure needs.

- “Fee-Generating AUM”, or “FGAUM”, consists of assets of the funds, partnerships and accounts to which we provide investment management, advisory, or certain other investment-related services and on which we earn management fees, monitoring fees or other investment-related fees pursuant to management or other fee agreements on a basis that varies among the Apollo funds, partnerships and accounts. Management fees are normally based on “net asset value,” “gross assets,” “adjusted par asset value,” “adjusted cost of all unrealized portfolio investments,” “capital commitments,” “adjusted assets,” “stockholders’ equity,” “invested capital” or “capital contributions,” each as defined in the applicable management agreement. Monitoring fees, also referred to as advisory fees, with respect to the structured portfolio company investments of the funds, partnerships and accounts we manage or advise, are generally based on the total value of such structured portfolio company investments, which normally includes leverage, less any portion of such total value that is already considered in Fee-Generating AUM.
- “ACRA” refers to Athene Co-Invest Reinsurance Affiliate Holding Ltd, together with its subsidiaries, and Athene Co-Invest Reinsurance Affiliate Holding 2 Ltd, together with its subsidiaries.
- “ADIP” refers to Apollo/Athene Dedicated Investment Program and Apollo/Athene Dedicated Investment Program II, funds managed by Apollo including third-party capital that, through ACRA, invest alongside Athene in certain investments.
- “Athene” refers to Athene Holding Ltd. (together with its subsidiaries, “Athene”), a subsidiary of the Company and a leading retirement services company that issues, reinsurance and acquires retirement savings products designed for the increasing number of individuals and institutions seeking to fund retirement needs, and to which Apollo, through its consolidated subsidiary Apollo Insurance Solutions Group LP (“ISG”), provides asset management and advisory services.
- “Athora” refers to a strategic platform that acquires or reinsurance blocks of insurance business in the German and broader European life insurance market (collectively, the “Athora Accounts”).
- “ATLAS SP Partners”, or “ATLAS SP”, An equity investment of AAA and refers to certain subsidiaries of Atlas Securitized Products Holdings LP
- “Capital solutions fees and other, net” primarily includes transaction fees earned by Apollo Capital Solutions (“ACS”) related to underwriting, structuring, arrangement and placement of debt and equity securities, and syndication for funds managed by Apollo, portfolio companies of funds managed by Apollo, and third parties. Capital solutions fees and other, net also includes advisory fees for the ongoing monitoring of portfolio operations and directors’ fees. These fees also include certain offsetting amounts including reductions in management fees related to a percentage of these fees recognized (“management fee offset”) and other additional revenue sharing arrangements.
Definitions (Continued)

• “Debt Origination” represents (i) capital that has been invested in new debt or debt-like investments by Apollo’s yield and hybrid strategies (whether purchased by Apollo funds and accounts, or syndicated to third parties) where Apollo or one of Apollo’s platforms has sourced, negotiated, or significantly affected the commercial terms of the investment; (ii) new capital pools formed by debt issuances, including CLOs and (iii) net purchases of certain assets by the funds and accounts we manage that we consider to be private, illiquid, and hard to access assets and which the funds and accounts otherwise may not be able to meaningfully access. Debt origination generally excludes any issuance of debt or debt-like investments by the portfolio companies of the funds we manage.

• “Dry Powder” represents the amount of capital available for investment or reinvestment subject to the provisions of the applicable limited partnership agreements or other governing agreements of the funds, partnerships and accounts we manage. Dry powder excludes uncalled commitments which can only be called for fund fees and expenses and commitments from perpetual capital vehicles.

• “Gross Capital Deployment” represents the gross capital that has been invested by the funds and accounts we manage during the relevant period, but excludes certain investment activities primarily related to hedging and cash management functions at the firm. Gross Capital Deployment is not reduced or netted down by sales or refinancings, and takes into account leverage used by the funds and accounts we manage in gaining exposure to the various investments that they have made.

• “HoldCo” refers to Apollo Global Management, Inc.

• “MidCap Financial” refers to MidCap FinCo Designated Activity Company.

• “Net Invested Assets” represent the investments that directly back Athene’s net reserve liabilities as well as surplus assets. Net invested assets is used in the computation of net investment earned rate, which is used to analyze the profitability of Athene’s investment portfolio. Net invested assets includes (a) total investments on the statements of financial condition, with AFS securities, trading securities and mortgage loans at cost or amortized cost, excluding derivatives, (b) cash and cash equivalents and restricted cash, (c) investments in related parties, (d) accrued investment income, (e) VIE assets, liabilities and noncontrolling interest adjustments, (f) net investment payables and receivables, (g) policy loans ceded (which offset the direct policy loans in total investments) and (h) an adjustment for the allowance for credit losses. Net invested assets exclude assets associated with funds withheld liabilities related to business exited through reinsurance agreements and derivative collateral (offsetting the related cash positions).

• “Net Investment Earned Rate” is computed as the income from Athene’s net invested assets divided by the average net invested assets, for the relevant period.

• “Perpetual capital” refers to assets under management of certain vehicles with an indefinite duration, which assets may only be withdrawn under certain conditions or subject to certain limitations, including satisfying required hold periods or percentage limits on the amounts that may be redeemed over a particular period. The investment management, advisory or other service agreements with our perpetual capital vehicles may be terminated under certain circumstances.

• “Realized Value” refers to all cash investment proceeds received by the relevant Apollo fund, including interest and dividends, but does not give effect to management fees, expenses, incentive compensation or performance fees to be paid by such Apollo fund.

• “Total Value” represents the sum of the total Realized Value and Unrealized Value of investments.
Important Information

Estimates and Assumptions

This presentation includes certain unaudited financial and business projections and goals on Apollo’s future outlook (the “Estimates”). The Estimates reflect the internal financial model that Apollo uses in connection with its strategic planning.

The Estimates are illustrated and are included in this presentation solely to give Apollo’s investors access to these financial projections. The Estimates were based on numerous variables and assumptions made by Apollo’s management with respect to industry performance, general business, economic, regulatory, market and financial conditions and other future events, as well as matters specific to Apollo’s businesses, all of which are difficult or impossible to predict accurately and many of which are beyond the control of Apollo’s management. Because the Estimates cover multiple years, by their nature, they also become subject to greater uncertainty and are less reliable with each successive year. The Estimates reflect subjective judgment in many respects and thus are susceptible to multiple interpretations and periodic revisions based on actual experience and business developments. As such, the Estimates constitute forward-looking information and are subject to many risks and uncertainties that could cause actual results to differ materially from the results forecasted in these projections. There can be no assurance that the Estimates will be realized or that actual results will not be significantly higher or lower than forecast. The Estimates may be affected by Apollo’s ability to achieve strategic goals, objectives and targets over the applicable period. Please consider carefully the section above titled “Forward-Looking Statements and Other Important Disclosures” at the beginning of this presentation. There are many factors that could delay, impede or prohibit Apollo’s ability to meet the Estimates, including not limited to market disruption, loss of key personnel, lack of investor interest, negotiations with investors or third parties, unexpected expenses including higher income taxes resulting from changes in tax legislation, and other events or circumstances that we may or may not be able to predict, manage or control (including but not limited to the matters discussed under the section “Forward-Looking Statements and Other Important Disclosures” at the beginning of this presentation). Accordingly, there can be no assurance that the Estimates will be realized, and actual results may vary materially from those shown. The Estimates cannot, therefore, be considered a guarantee of future operating results, and this information should not be relied on as such.

Neither Apollo nor any of its affiliates, advisors, officers, directors or representatives has made or makes any representation to any of Apollo’s stockholders or any other person regarding the ultimate performance of Apollo compared to the information contained in the Estimates or can give any assurance that actual results will not differ materially from the Estimates, and none of them undertakes any obligation to update or otherwise revise or reconcile the Estimates to reflect circumstances existing after the date the Estimates were generated or to reflect the occurrence of future events even in the event that any or all of the assumptions underlying the Estimates are no longer appropriate or are shown to be in error, except as may be required by applicable law.

Certain of the Estimates set forth herein may be considered non-GAAP financial measures. There are limitations inherent in non-GAAP financial measures, because they exclude charges and credits that are required to be included in a GAAP presentation. Non-GAAP financial measures should not be considered in isolation from, or as a substitute for, financial information presented in compliance with GAAP, and non-GAAP financial measures as used by Apollo may not be comparable to similarly titled amounts used by other companies. No reconciliation of non-GAAP financial measures in the Estimates to GAAP measures was created or used in connection with preparing the Estimates.

In light of the foregoing factors and the uncertainties inherent in the Estimates, stockholders are cautioned not to place undue reliance on the Estimates.

Target Returns

Target returns are presented solely for providing insight into an investment’s objectives and detailing anticipated risk and reward characteristics in order to facilitate comparisons with other investments and for establishing a benchmark for future evaluation of the investment’s performance. Target returns are not predictions, projections or guarantees of future performance. Target returns are based upon estimates and assumptions that a potential investment will yield a return equal to or greater than the target. There can be no assurance that Apollo will be successful in finding investment opportunities that meet these anticipated return parameters. Apollo’s target of potential returns from an investment is not a guarantee as to the quality of the investment or a representation as to the adequacy of Apollo’s methodology for estimating returns. Target returns should not be used as a primary basis for an investor’s decision to make an investment. Unless otherwise indicated, target returns are presented gross and do not reflect the effect of applicable fees, incentive compensation, certain expenses and taxes.

Please see the “Forward-Looking Statements and Other Important Disclosures” pages and “Non-GAAP Financial Information & Definitions” pages for additional important disclosures and definitions. Historical definitions of certain terms used herein may differ from current definitions.

In addition, information about factors affecting Apollo, including a description of risks that should be considered when making a decision to purchase or sell any securities of Apollo, can be found in its public filings with the SEC that are available at http://www.sec.gov.
