Intellinetics, Inc. Completes K-12 Solutions Integration

Initial Software Unlimited, Inc. Partnership Orders Complete

COLUMBUS, Ohio, April 09, 2019 (GLOBE NEWSWIRE) -- [Intellinetics, Inc.](#), a cloud-based document content services provider, announced today that the company has completed the initial integration of K12Docs with 10 early adopter school districts. K12Docs is a result of a partnership established in Q4 2018 with [Software Unlimited Inc.](#) (SUI), a major software developer and publisher of solutions for the K-12 market. This partnership gave SUI fully integrated document management capabilities within its School Accounting System for K-12 school districts.

Even before the launch of the new K12Docs solution, SUI had clients lined up to secure their purchase. These early adopters proved that there was pent-up demand for this type of solution.

IntelliCloud™, Intellinetics' flagship platform, was seamlessly integrated into SUI's School Accounting System for K-12, enabling its users to add, search and view documents directly within SUI software's user experience.

IntelliCloud delivers mission-critical, secure document content services for business teams in any size organization with significant document compliance, security, and workflow automation needs that must always be audit-ready.

K12docs will now be rolled out to the K-12 market.

"Our partnership with Intellinetics has provided Software Unlimited with the ability to leverage a trusted EDM solution and create a uniquely customized product for K-12," said Corey Atkinson, Director of Sales Marketing. "The tight integration with our School Accounting System provides a turn-key, cloud-based offering to the nearly one-thousand school districts and educational agencies we currently serve."

"We knew, because of our experience in this industry, that there was an untapped need for this solution," said [James F. DeSocio](#), President & CEO of Intellinetics. "The demand before the solution was launched proved that not only were we on the right path but that we had partnered with the right company. We have always known that our ability to embed our solution within a proven software platform is the building block for mutual growth. We continue to be confident in our focus on the K12 industry as a key market and this initial success underscores that confidence."

About Intellinetics, Inc.
