### **About Global Power**

Texas-based Global Power Equipment Group Inc. is a design, engineering and manufacturing firm providing a broad array of equipment and services to the global power infrastructure, energy and process industries. It is comprised of three segments. Product Solutions includes two primary product categories: Auxiliary Products designs, engineers and manufactures a comprehensive portfolio of equipment for utility-scale natural gas turbines while Electrical Solutions provides custom configured electrical houses and generator enclosures for the midstream oil & gas industry, the power generation market to include distributed and backup power as well as other industrial and commercial operations. Energy Services provides lifecycle maintenance, repair, construction and fabrication services for the industrial, chemical/petrochemical process, oil and gas and power generation industries. Nuclear Services provides on-site specialty support, outage management and

maintenance services to domestic utilities' nuclear power facilities. The Company routinely provides information at its website: [www.globalpower.com](http://www.globalpower.com).
