Vuzix and Librestream Announce Integrated Hands-Free Thermal Imaging Smart Glasses Solution

Health workers to boarder security can see at a glance if a person has an elevated temperature

ROCHESTER, N.Y., March 12, 2020 /PRNewswire/ -- [Vuzix® Corporation](#) (NASDAQ: VUZI), ("Vuzix" or, the "Company"), a leading supplier of Smart Glasses and Augmented Reality (AR) technology and products, together with Librestream, an augmented reality enterprise solution provider, today announced an integrated hands-free thermal imaging smart glasses solution for frontline workers to monitor body temperatures from a distance.

The integrated thermal imaging solution for health monitoring combines the lightweight and ergonomically designed Vuzix M400 Smart Glasses with Librestream's Onsite platform, including the ruggedized Cube industrial wearable camera, to bring hands-free collaboration and thermal imaging to near any environment.

The Onsite Cube pairs with the Vuzix M400 Smart Glasses to display the real-time thermal video feed directly on the heads-up display of the M400. Using the Onsite AR platform, frontline workers can also share these visuals with global medical experts who can remotely view and control the thermal output. These experts can adjust lighting, zoom, and capture HD video and thermal images, providing first responders and medical staff with critical real-time diagnostic information. Teams can also capture and securely store images and recordings or share in collaboration sessions.

"We are excited to work with the team at Vuzix to bring an innovative thermal imaging

solution to frontline workers. The combination of Vuzix Smart Glasses and Onsight not only allows for hands-free operations but provides real-time thermal images and data to make time sensitive assessments from a safe distance," shared Charlie Neagoy, VP Business Development at Librestream.

"The Librestream Onsight Cube combined with the Vuzix M400 Smart Glasses is a powerful one-two punch that combines two cutting edge solutions to deliver digital content into the real world to help medical staff, border patrols and first responders," said Paul Travers, President and Chief Executive Officer at Vuzix.

About Vuzix Corporation

Vuzix is a leading supplier of Smart-Glasses and Augmented Reality (AR) technologies and products for the consumer and enterprise markets. The Company's products include personal display and wearable computing devices that offer users a portable high-quality viewing experience, provide solutions for mobility, wearable displays and augmented reality.
