NeoGenomics Launches PanTracer LBx, Expanding Access to Comprehensive Genomic Profiling with Liquid Biopsy

New ctDNA-based test offers a flexible, guideline-driven solution for patients with advanced solid tumors when tissue is limited or unavailable

FORT MYERS, Fla.--(BUSINESS WIRE)-- **NeoGenomics, Inc. (NASDAQ: NEO)**, a leading provider of oncology diagnostic solutions that enable precision medicine, today announced the launch of [NEO PanTracer™ LBx](#), a blood-based comprehensive genomic profiling (CGP) test, expanding the company's PanTracer portfolio. PanTracer LBx is a noninvasive test designed to support therapy selection, trial matching, and longitudinal monitoring, empowering data-driven decisions even when tumor tissue is limited or unavailable.

"The launch of our liquid biopsy test positions us at the forefront of the precision oncology market," said Tony Zook, Chief Executive Officer, NeoGenomics. "As demand grows for faster, less invasive, and more accessible genomic testing, PanTracer LBx expands our addressable market, enhances our clinical portfolio, and opens new revenue streams in both therapy selection, trial matching, and disease monitoring. It's a strategic milestone that underscores our commitment to sustainable growth and clinical leadership."

Using circulating tumor DNA (ctDNA) from a simple blood draw, PanTracer LBx provides access to biomarker information when tissue samples are insufficient or unavailable. The test is designed to offer a seven-day turnaround time and analyze over 500 genes, including MSI and bTMB, to deliver timely, actionable insights. When indicated, it can be ordered as a standalone option, as a reflex when tissue testing fails, or concurrently with tissue analysis. Clinical applications include therapy selection, trial matching, and longitudinal monitoring.

PanTracer LBx strengthens NeoGenomics' pan-solid tumor CGP portfolio, working seamlessly with tissue-based options like PanTracer Tissue, providing a testing strategy across a range of solid cancers. Complemented by a broad portfolio of testing services and dedicated clinical support, the launch expands NeoGenomics' position in the growing \$3–5 billion liquid biopsy market and advances its goal of delivering deep insights to more patients across diverse care settings.

About NeoGenomics, Inc.

NeoGenomics, Inc. is a premier cancer diagnostics company specializing in cancer genetics testing and information services. We offer one of the most comprehensive oncology-focused testing menus across the cancer continuum, serving oncologists, pathologists, hospital systems, academic centers, and pharmaceutical firms with innovative diagnostic and

predictive testing to help them diagnose and treat cancer. Headquartered in Fort Myers, FL, NeoGenomics operates a network of CAP-accredited and CLIA-certified laboratories for full-service sample processing and analysis services throughout the US and a CAP-accredited full-service sample-processing laboratory in Cambridge, United Kingdom.

Forward-Looking Statements

This press release includes forward-looking statements. These forward-looking statements generally can be identified by the use of words such as “anticipate,” “expect,” “plan,” “can,” “could,” “would,” “may,” “will,” “believe,” “estimate,” “forecast,” “goal,” “project,” “guidance,” “potential” and other words of similar meaning, although not all forward-looking statements include these words. These forward-looking statements address various matters, including statements regarding the potential impact of PanTracer™ LBx in oncology treatment and clinical trial enrollment. Each forward-looking statement contained in this press release is subject to a number of risks and uncertainties that could cause actual results to differ materially from those expressed or implied by such statements. Applicable risks and uncertainties include, among others, the extent of use by oncologists and biopharma companies of PanTracer™ LBx, the speed and utility of the results generated, and the risks identified under the heading "Risk Factors" contained in the Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and the Company's other filings with the Securities and Exchange Commission.

We caution investors not to place undue reliance on the forward-looking statements contained in this press release. You are encouraged to read our filings with the SEC, available at www.sec.gov and in the “Investors” section of our website at ir.neogenomics.com, for a discussion of these and other risks and uncertainties. The forward-looking statements in this press release speak only as of the date of this document (unless another date is indicated), and we undertake no obligation to update or revise any of these statements. Our business is subject to substantial risks and uncertainties, including those referenced above. Investors, potential investors, and others should give careful consideration to these risks and uncertainties.
