Equinix Opens First AI-Ready Data Center in Chennai

With a US\$69M initial investment, Equinix's latest facility will help accelerate India's growth as a leading technology hub

REDWOOD CITY, Calif., Sept. 19, 2025 /PRNewswire/ -- [Equinix, Inc.](#) (Nasdaq: EQIX), the world's digital infrastructure company[®], announced the opening of its first International Business Exchange™ (IBX[®]) data center in Chennai, India—CN1. Located in Siruseri, Tamil Nadu, on a nearly six-acre plot of land, this new facility will be interconnected with Equinix's Mumbai campus, which consists of three IBX data centers. With its strategic location, rapid cloud adoption and strong data sovereignty framework, India is becoming an essential market for global enterprises seeking to scale digital services and reduce latency for users across the region. The new facility will support local and global businesses by providing direct access to one of the world's fastest-growing digital economies that is driving innovation and AI adoption.

As India strengthens its position as a key hub for innovation, research and AI investment, Chennai is emerging as the country's focal point for this technological evolution, helping to pave the way for India to increase its global competitiveness in digital services and AI development. These advancements demand substantial computing power and data processing resources, driving India to rapidly expand its high-performance data center capacity. The launch of CN1 in Chennai marks a pivotal milestone in bolstering the digital infrastructure required to support these technologies.

With an initial investment of US\$69 million, CN1 will provide 800 cabinets of capacity in its first phase. This facility will eventually support 4,250 cabinets. As with all Equinix facilities, the data center is engineered for a high reliability of 99.999% uptime and features a full suite of Equinix interconnection services, including Equinix Fabric[®], which enables enterprises to leverage the full benefits of hybrid multicloud. Its advanced design also enables support for liquid cooling technology, which is essential for handling the high-density, compute-intensive workloads that are driving AI and other transformative technologies.

Equinix currently works with more than 300 companies in India, including network service providers and five internet exchanges. Its Mumbai campus consists of three high-performance data centers and hosts a robust cloud ecosystem for customers in India, including native on-ramps to key cloud service providers, such as Amazon Web Services, Google Cloud, Microsoft Azure and Oracle Cloud. With the launch of CN1, customers in Chennai can gain low-latency access to this key digital ecosystem, enabling seamless and secure connectivity with their business partners, customers and providers.

"We are delighted to announce the launch of our high-performance IBX data center, CN1, in Chennai, marking Equinix's expansion in India and a pivotal step in advancing the nation's digitalization journey," said Manoj Paul, Managing Director, India, Equinix. "Our success in building the most interconnected ecosystem for cloud, carrier, content and enterprises in

Mumbai will now be extended to customers in Tamil Nadu. This milestone highlights our commitment to empowering India's position as a global technology hub while ensuring sustainability and innovation remain at the core of our operations. With CN1's cutting-edge capabilities, we look forward to enabling businesses in Chennai and across India to build future-ready, scalable digital infrastructure that supports sustainability to expand their business in Tamil Nadu and globally."

Globally, Equinix operates more than 270 data centers across 77 markets in 36 countries, serving over 10,000 customers and enabling their digital transformation. In the Asia-Pacific region, Equinix's portfolio includes more than 60 data centers across key metros in Australia, China*, Hong Kong, India, Indonesia, Japan, Korea, Malaysia, Philippines, and Singapore, providing interconnection and digital infrastructure solutions to support the region's dynamic economies.

Highlights/Key Facts:

- Located in the State Industries Promotion Corporation of Tamil Nadu (SIPCOT) Ltd land in the Siruseri area, the CN1 campus spreads over nearly six acres of land. The location is approximately 28 kilometers away from the bustling Central Business District, holding a key position near anticipated submarine cable landing sites.
- Equinix CN1 is a four-story building and will ultimately provide a total site capacity of 4,250 cabinets when fully built. The first phase of CN1 provides 800 cabinets.
- CN1 is AI-ready, purpose-built to accommodate advanced liquid cooling solutions, enabling support for high-density, compute-intensive workloads and ensuring scalable infrastructure for future AI and emerging technologies.
- Equinix will provide robust interconnection services at CN1, including software-defined interconnection (Equinix Fabric and Equinix Fabric Cloud Router), to enable customers to directly interconnect with partners and create hybrid multicloud infrastructure easily and securely.
- In 2024, Equinix reached 96% renewables coverage across its global operations, including India.

About Equinix

[Equinix](#), Inc. (Nasdaq: EQIX) shortens the path to boundless connectivity anywhere in the world. Its digital infrastructure, data center footprint and interconnected ecosystems empower innovations that enhance our work, life and planet. Equinix connects economies, countries, organizations and communities, delivering seamless digital experiences and cutting-edge AI—quickly, efficiently and everywhere.

Forward-Looking Statements

This press release contains forward-looking statements that involve risks and uncertainties.

Actual results may differ materially from expectations discussed in such forward-looking statements. Factors that might cause such differences include, but are not limited to, risks to our business and operating results related to the current inflationary environment; foreign currency exchange rate fluctuations; stock price fluctuations; increased costs to procure power and the general volatility in the global energy market; the challenges of building and operating IBX and xScale[®] data centers, including those related to sourcing suitable power and land, and any supply chain constraints or increased costs of supplies; the challenges of developing, deploying and delivering Equinix products and solutions; unanticipated costs or difficulties relating to the integration of companies we have acquired or will acquire into Equinix; a failure to receive significant revenues from customers in recently built out or acquired data centers; failure to complete any financing arrangements contemplated from time to time; competition from existing and new competitors; the ability to generate sufficient cash flow or otherwise obtain funds to repay new or outstanding indebtedness; the loss or decline in business from our key customers; risks related to our taxation as a REIT; risks related to regulatory inquiries or litigation and other risks described from time to time in Equinix filings with the Securities and Exchange Commission. In particular, see recent and upcoming Equinix quarterly and annual reports filed with the Securities and Exchange Commission, copies of which are available upon request from Equinix. Equinix does not assume any obligation to update the forward-looking information contained in this press release.
