Cellectar Reports Second Quarter 2020 Financial Results and Provides a Corporate Update

FLORHAM PARK, N.J., Aug. 10, 2020 (GLOBE NEWSWIRE) -- Cellectar Biosciences, Inc. (NASDAQ: CLRB), a clinical-stage biopharmaceutical company focused on the discovery, development and commercialization of drugs for the treatment of cancer, today announced financial results for the second quarter ended June 30, 2020 and provided a corporate update.

Second Quarter and Recent Corporate Highlights

- Received Fast Track Designation for CLR 131 in lymphoplasmacytic lymphoma (LPL)/Waldenstrom's macroglobulinemia (WM) from the U.S. Food and Drug Administration (FDA);
- Received Small and Medium-Sized Enterprise (SME) status from the European Medicines Agency's (EMA) Micro, Small and Medium-sized Enterprise office. SME status allows Cellectar to participate in significant financial incentives and be eligible to obtain EMA certification of quality and manufacturing data prior to review of clinical data;
- Expanded IP coverage in Europe with the receipt of two composition of matter and use patents. The first patent expands protection for the company's proprietary PLE targeted delivery vehicle analogs in combination with a broad range of chemotherapeutics such as paclitaxel, gemcitabine, and other classes of small molecule chemotherapeutic agents. The second patent covers the treatment and/or diagnosis of cancer and cancer stem cells with CLR 131;
- Strengthened the management team with the appointment of Dr. John Friend, chief medical officer; and
- Completed an underwritten public offering for gross proceeds of \$20 million

"We continue to enroll relapsed/refractory multiple myeloma and LPL/WM patients in the Phase 2b portion of our ongoing CLOVER-1 study and prepare for the initiation of our pivotal study expected in Q4 of 2020 while advancing our Phase 1 pediatric study," said James Caruso, president and CEO of Cellectar. "We also successfully executed on other key fronts. The FDA granted CLR 131 Fast Track Designation in LPL/WM; we expanded our IP portfolio with two new European patents and significantly strengthened our balance sheet with the recent financing."

Second Quarter 2020 Financial Highlights

- **Cash and Cash Equivalents:** As of June 30, 2020, the company had cash and cash equivalents of \$22.5 million compared to \$10.6 million at December 31, 2019. Cash used in operating activities was approximately \$6.6 million during the six months ended June 30, 2020 as compared to \$5.5 million during the six months ended June 30, 2019.
- **Research and Development Expense:** R&D expense for the three months ended June 30, 2020 was \$2.5 million, compared to \$1.8 million for the three months ended June 30, 2019. The cumulative R&D spending for the first six months of 2020 was \$5.1 million as compared to \$4.1 million for the first six months of 2019. The increase in R&D expense year-to-date in 2020 was primarily a result of general R&D cost from personnel related expenses and clinical project costs. Manufacturing and related costs decreased and the costs of preclinical studies were relatively consistent.
- **General and Administrative Expense:** G&A expense for the three months ended June 30, 2020 was \$1.2 million compared to \$1.4 million for the three months ended June 30, 2019. The cumulative G&A spending for the first six months of 2020 were of \$2.5 million as compared to \$2.7 million for the first six months of 2019. The decrease in G&A expense year-to-date in 2020 was primarily a result of lower stock-based compensation expense.
- **Net Loss:** The net loss attributable to common stockholders for the three months ended June 30, 2020 was (\$3.6) million, or (\$0.26) per share, compared to (\$3.2) million, or (\$0.46) per share, in 2019. Net loss attributable to common stockholders for the six months ended June 30, 2020 was (\$7.6) million, or (\$0.65) per share, compared to (\$6.8) million, or (\$1.15) per share, in 2019.

About Collectar Biosciences, Inc.

Collectar Biosciences is focused on the discovery, development and commercialization of drugs for the treatment of cancer. The company is developing proprietary drugs independently and through research and development collaborations. The company's core objective is to leverage its proprietary Phospholipid Drug Conjugate™ (PDC) delivery platform to develop PDCs that specifically target cancer cells, delivering improved efficacy and better safety as a result of fewer off-target effects. The company's PDC platform possesses the potential for the discovery and development of the next-generation of cancer-targeting treatments, and it plans to develop PDCs independently and through research and development collaborations.

The company's lead PDC therapeutic, CLR 131, is currently in two clinical studies. The CLOVER-1 Phase 2 study completed the Part A dose-exploration portion, conducted in relapsed/refractory (r/r) B-cell malignancies, and is now enrolling in the Part B expansion cohorts evaluating a two cycle dosing regimen that provides approximately 100mCi total body dose of CLR 131 in relapsed/refractory (r/r) multiple myeloma (MM) and lymphoplasmacytic lymphoma/Waldenstrom's macroglobulinemia (LPL/WM). The data from the Part A portion was announced on February 19, 2020.

The Phase 1 pediatric study is an open-label, sequential-group, dose-escalation study to evaluate the safety and tolerability of CLR 131 in children and adolescents with relapsed or refractory cancers, including malignant brain tumors, neuroblastoma, sarcomas, and

lymphomas (including Hodgkin's lymphoma). The Phase 1 study is being conducted internationally at 7 leading pediatric cancer centers.

The company's product pipeline includes one preclinical PDC chemotherapeutic program (CLR 1900) and multiple partnered PDC assets.

Forward-Looking Statement Disclaimer

This news release contains forward-looking statements. You can identify these statements by our use of words such as "may," "expect," "believe," "anticipate," "intend," "could," "estimate," "continue," "plans," or their negatives or cognates. These statements are only estimates and predictions and are subject to known and unknown risks and uncertainties that may cause actual future experience and results to differ materially from the statements made. These statements are based on our current beliefs and expectations as to such future outcomes including our expectations of the impact of the recent COVID-19 pandemic. Drug discovery and development involve a high degree of risk. Factors that might cause such a material difference include, among others, uncertainties related to the ability to raise additional capital, uncertainties related to the disruptions at our sole source supplier of CLR 131, the ability to attract and retain partners for our technologies, the identification of lead compounds, the successful preclinical development thereof, patient enrollment and the completion of clinical studies, the FDA review process and other government regulation, our ability to maintain orphan drug designation in the United States for CLR 131, the volatile market for priority review vouchers, our pharmaceutical collaborators' ability to successfully develop and commercialize drug candidates, competition from other pharmaceutical companies, product pricing and third-party reimbursement. A complete description of risks and uncertainties related to our business is contained in our periodic reports filed with the Securities and Exchange Commission including our Form 10-K for the year ended December 31, 2019, our Form 10-Q for the quarter ended March 31, 2020 and our Form 10-Q for the quarter ended June 30, 2020, when filed. These forward-looking statements are made only as of the date hereof, and we disclaim any obligation to update any such forward-looking statements. These forward-looking statements are made only as of the date hereof, and we disclaim any obligation to update any such forward-looking statements.
