DMC Global's NobelClad Business to Consolidate European Manufacturing Facilities

BOULDER, Colo., Dec. 15, 2017 (GLOBE NEWSWIRE) -- DMC Global Inc. (Nasdaq:BOOM) today reported its NobelClad business plans to consolidate its European production facilities, and expects to complete the process by the end of 2018. NobelClad's European management has commenced discussions with local staff representatives and social partners to present the consolidation project. The proposed measures remain subject to consultation with the works council, which will be conducted in accordance with applicable French law.

Cash restructuring charges related to severance, contract termination and other associated exit costs are expected to be approximately €3.5 million (\$4.0 million). A majority of the cash charges will be recorded during the 2017 fourth quarter, and will be paid in 2018. Non-cash asset impairment charges of approximately €1.5 million (\$1.75 million) also will be recorded in the fourth quarter.

Management estimates the consolidation will result in annual pretax cash savings of approximately €850,000 (\$1.0 million).

NobelClad centralized a portion of its European production facilities after its November 2014 purchase of a state-of-the-art manufacturing center in Liebenscheid, Germany. The facility now performs the majority of NobelClad's European explosion cladding, although some work is still conducted at a smaller facility in Rivesaltes, France. NobelClad plans to exit the Rivesaltes production facility in the coming year, but will maintain its sales and administrative office in France.

"Our Liebenscheid facility is one of the most advanced explosion welding operations in the world, and also is in close proximity to European metal suppliers and shipping infrastructure," said John Scheatzle, president of NobelClad. "The facility also has considerable available capacity and can effectively manage our anticipated European growth. Given the expected recovery in our end markets over the coming years, we believe this is an opportune time to advance the consolidation process."

The anticipated non-recurring restructuring and impairment charges will have no net impact on DMC's fourth quarter adjusted EBITDA.

About DMC

Based in Boulder, Colorado, DMC operates in two sectors: industrial infrastructure and oilfield products and services. The industrial infrastructure sector is served by DMC's

NobelClad business, the world's largest manufacturer of explosion-welded clad metal plates, which are used to fabricate capital equipment utilized within various process industries and other industrial sectors. The oilfield products and services sector is served by DynaEnergetics, an international developer, manufacturer and marketer of advanced explosive components and systems used to perforate oil and gas wells.
