Definitions

Adjusted EBITDA: A non-GAAP measure, defined by the Company as net income/(loss) before depreciation and amortization, interest expense (excluding consumer financing interest), early extinguishment of debt, interest income (excluding consumer financing revenues) and income taxes, each of which is presented on the Consolidated Statements of Income. Adjusted EBITDA also excludes stock-based compensation costs, separation and restructuring costs, transaction costs and impairments, gains and losses on sale/disposition of business, and items that meet the conditions of unusual and/or infrequent. We believe that when considered with GAAP measures, Adjusted EBITDA is useful to assist our investors in evaluating our ongoing operating performance for the current reporting period and, where provided, over different reporting periods. We also internally use these measures to assess our operating performance, both absolutely and in comparison to other companies, and in evaluating or making selected compensation decisions. Adjusted EBITDA should not be considered in isolation or as a substitute for net income/(loss) or other income statement data prepared in accordance with GAAP and our presentation of Adjusted EBITDA may not be comparable to similarly-titled measures used by other companies.

Adjusted net income/(loss) from continuing operations: A non-GAAP measure, defined by the Company as net income/(loss) from continuing operations adjusted to exclude separation and restructuring costs, amortization of acquisition-related assets, debt modification costs, impairments, gains and losses on sale/disposition of business, and items that meet the conditions of unusual and/or infrequent and the tax effect of such adjustments.

Adjusted diluted earnings/(loss) per share: A non-GAAP measure, defined by the Company as Adjusted net income/(loss) from continuing operations divided by the diluted weighted average number of common shares.

Gross Vacation Ownership Interest Sales: A non-GAAP measure, represents sales of vacation ownership interests (VOIs), including sales under the fee-for-service program before the effect of loan loss provisions. We believe that Gross VOI sales provide an enhanced understanding of the

performance of our vacation ownership business because it directly measures the sales volume of this business during a given reporting period.

Tours: Represents the number of tours taken by guests in our efforts to sell VOIs.

Volume Per Guest (VPG): Represents Gross VOI sales (excluding tele-sales upgrades, which are non-tour upgrade sales) divided by the number of tours. The Company has excluded non-tour upgrade sales in the calculation of VPG because non-tour upgrade sales are generated by a different marketing channel.

Average Number of Members: Represents paid members in our vacation exchange programs who are current on their annual membership dues or within the allowed grace period.

Exchange Revenue Per Member: Represents total revenues generated from fees associated with memberships, exchange transactions, and other servicing for the period divided by the average number of vacation exchange members during the period.

Panorama transactions: Represents Exchange System and Closed User Group bookings, net of cancellations.

Free Cash Flow from Continuing Operations (FCF): A non-GAAP measure, defined by the Company as net cash provided by operating activities from continuing operations less property and equipment additions (capital expenditures) plus the sum of proceeds and principal payments of non-recourse vacation ownership debt. The Company believes FCF to be a useful operating performance measure to evaluate the ability of its operations to generate cash for uses other than capital expenditures and, after debt service and other obligations, its ability to grow its business through acquisitions and equity investments, as well as its ability to return cash to shareholders through dividends and share repurchases. A limitation of using FCF versus the GAAP measures of net cash provided by operating activities as a means for evaluating Wyndham Destinations is that FCF does not represent the total cash movement for the period as detailed in the consolidated statement of cash flows.

Adjusted Free Cash Flow from Continuing Operations: A non-GAAP measure, defined by the Company as net cash provided by operating activities from continuing operations less property and equipment additions (capital expenditures) plus the sum of proceeds and principal payments of non-recourse vacation ownership debt, while also adding back transaction costs for acquisitions and divestitures, separation adjustments associated with the spin-off of Wyndham Hotels & Resorts, and certain adjustments related to COVID-19.

Net Debt: Net debt equals total debt outstanding, less non-recourse vacation ownership debt and cash and cash equivalents.

Leverage Ratio: The Company calculates leverage ratio as net debt divided by adjusted EBITDA, as defined in the credit agreement.
