

Perimeter Solutions Earns GreenScreen Certification For SOLBERG 3% MIL-SPEC Synthetic Fluorine-Free Foam Concentrate

- **GreenScreen Certification® confirms there is zero intentionally added PFAS in the Fluorine-Free Product and that it meets Clean Production Action standards**
- **SOLBERG® 3% MIL-SPEC SFFF is the first fluorine-free foam concentrate to be added to the Department of Defense Qualified Products List and earn Green Screen Certification®**

Clayton, Missouri--(Newsfile Corp. - February 20, 2024) - Perimeter Solutions (NYSE: PRM), a leading global manufacturer of high-quality fire retardant and firefighting foam, announced today that its [SOLBERG® 3% MIL-SPEC Synthetic Fluorine-Free Foam](#) is the first fluorine-free firefighting foam concentrate on the Department of Defense Qualified Products List (QPL) to be **GreenScreen Certified®** by Clean Production Action (CPA). Firefighting foams that are [GreenScreen Certified®](#) meet stringent requirements established by CPA and are confirmed to be fluorine-free with no intentionally added per- or polyfluoroalkyl substances (PFAs).

GreenScreen for Safer Chemicals is a globally recognized chemical hazard assessment method that specifies progress toward the use of increasingly safer chemicals. The **GreenScreen Certified®** Standard for Firefighting Foam requires the manufacturer to provide **GreenScreen** with a complete list of chemical ingredients used in the foam concentrate, then scores the foam for acute aquatic toxicity through in-depth analytical testing to certify the foam does not use PFAS as well as over 2,000 other chemicals.

When [SOLBERG® 3% MIL-SPEC SFFF was added to the DoD QPL](#) in September 2023, that gave airport authorities and other government agencies that are required to use MIL-SPEC-qualified products the ability to transition from aqueous film-forming foam (AFFF) to fluorine-free. Since then, Perimeter Solutions has helped hundreds of airports and U.S. military bases make the transition to fluorine-free foam.

"This is a significant milestone for Perimeter Solutions and SOLBERG® 3% MIL-SPEC SFFF," says Craig McDonnell, VP Fire Suppression Americas & Prevention & Protection Retardant at Perimeter Solutions. "After the MIL-SPEC product was added to the QPL, we talked with representatives from multiple airports who were eager to make the transition to fluorine-free foam technology, but wanted to wait until there was a product that was **GreenScreen Certified®**. Now that we have earned this designation, we are poised to help these airports make the switch to more environmentally responsible firefighting technology."
