IronNet Joins Microsoft Intelligent Security Association (MISA)

Membership builds on IronNet's ongoing efforts to transform cybersecurity through Collective Defense

MCLEAN, Va.--(BUSINESS WIRE)-- IronNet, Inc. (NYSE: IRNT) ("IronNet"), an innovative leader transforming cybersecurity through Collective Defense, announced it has joined the Microsoft Intelligent Security Association (MISA), a nomination-only association, demonstrating IronNet's long-term commitment with Microsoft to deliver better security solutions to customers.

As a Microsoft partner, IronNet, through its innovative Collective Defense platform, empowers Microsoft customers to execute safe and seamless migrations to the cloud amidst the increasing volume of highly-aggressive and sophisticated cyberattacks.

"As we continue to see an increase in malicious cyberattacks against both the public and private sectors, we are pleased to join the Microsoft Intelligent Security Association to advance how we defend together," said IronNet Founder and Co-CEO, General (Ret.) Keith Alexander. "MISA's mission directly aligns with our mission at IronNet: to develop integrated and innovative ways to better defend together against an evolving cyber threat landscape."

IronNet's bi-directional integration with Microsoft Azure Sentinel enables customers to better protect their on-premises, cloud, or hybrid infrastructure. This integration builds on IronNet's Azure virtual sensor, which provides on-premises protection of cloud workloads as well as IronNet's threat-detection integration with Microsoft 365. By using anonymized threat information gathered by both IronNet and Microsoft, IronNet's industry-leading Network Detection and Response (NDR) and Collective Defense capabilities equip enterprise customers with best-in-class tools to manage heightened security challenges brought on by accelerated digital transformation.

"The Microsoft Intelligent Security Association has grown into a vibrant ecosystem comprised of the most reliable and trusted security software vendors across the globe," said Maria Thomson, Microsoft Intelligent Security Association Lead. "Our members, like IronNet, share Microsoft's commitment to collaboration within the cybersecurity community to improve our customers' ability to predict, detect, and respond to security threats faster."

IronNet's Collective Defense platform offers a dynamic, radar-like view of potential incoming attacks—a capability that is especially critical for rapidly detecting and mitigating advanced persistent threat attacks (APT) and ensuring that individual companies and organizations do not have to defend alone against nation-state-level network intrusions. This real-time picture of the threat landscape—now leveraging access to anonymized Microsoft data and shared knowledge—empowers organizations and industries to more proactively defend against

cyberattacks, both on-premises and in the cloud.

About IronNet, Inc.

Founded in 2014 by GEN (Ret.) Keith Alexander, IronNet, Inc. (NYSE: IRNT) is a global cybersecurity leader that is transforming how organizations secure their networks by delivering the first-ever Collective Defense platform operating at scale. Employing a number of former NSA cybersecurity operators with offensive and defensive cyber experience, IronNet integrates deep tradecraft knowledge into its industry-leading products to solve the most challenging cyber problems facing the world today.

Forward-Looking Statements

This press release includes "forward-looking statements" within the meaning of the "safe harbor" provisions of the United States Private Securities Litigation Reform Act of 1995, including, without limitation, statements regarding IronNet's ability to strengthen the security profiles of its customers and partners. When used in this press release, the words "estimates," "projected," "expects," "anticipates," "forecasts," "plans," "intends," "believes," "seeks," "may," "will," "should," "future," "propose" and variations of these words or similar expressions (or the negative versions of such words or expressions) are intended to identify forward-looking statements. These forward-looking statements are not guarantees of future performance, conditions or results, and involve a number of known and unknown risks, uncertainties, assumptions and other important factors, many of which are outside IronNet's management's control, that could cause actual results or outcomes to differ materially from those discussed in the forward-looking statements. Important factors, among others, that may affect actual results or outcomes include: IronNet's inability to recognize the anticipated benefits of collaborations with IronNet's partners and customers; IronNet's ability to execute on its plans to develop and market new products and the timing of these development programs; the rate and degree of market acceptance of IronNet's products; the success of other competing technologies that may become available; IronNet's ability to identify and integrate acquisitions; the performance of IronNet's products; potential litigation involving IronNet; and general economic and market conditions impacting demand for IronNet's products. The foregoing list of factors is not exhaustive. You should carefully consider the foregoing factors and the other risks and uncertainties described under the heading "Risk Factors" in IronNet's registration statement declared effective by the Securities and Exchange Commission (the "SEC") on September 30, 2021 and other documents that IronNet has filed or will file with the SEC. These filings identify and address other important risks and uncertainties that could cause actual events and results to differ materially from those contained in the forward-looking statements. Forward-looking statements speak only as of the date they are made. Readers are cautioned not to put undue reliance on forward-looking statements, and IronNet does not undertake any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.
