FIBRA Prologis Successfully Completes Its First Green Private Placement in the US

MEXICO CITY, July 1, 2021 /PRNewswire/ -- FIBRA Prologis (BMV: FIBRAPL 14), a leading owner and operator of Class-A industrial real estate in Mexico, announced today that it has successfully completed the issuance of US\$300 million senior unsecured notes ("USPP notes") following the pricing of the USPP notes previously announced in May 2021.

The USPP notes have a weighted average interest expense, including the estimated corresponding withholding tax, of approximately 3.65% per annum and are senior, unsecured obligations of FIBRAPL.

The USPP notes were issued in the following five tranches: (i) US\$100 million in aggregate principal amount maturing on July 1, 2029, (ii) US\$80 million "green" tranche in aggregate principal amount maturing on July 1, 2031, (iii) US\$80 million in aggregate principal amount maturing on July 1, 2033, (iv) US\$25 million in aggregate principal amount maturing on July 1, 2036, and (v) US\$15 million in aggregate principal amount maturing on July 1, 2039. The USPP notes are governed by New York law.

The net proceeds from the notes will be used to refinance existing indebtedness and for general corporate purposes. The net proceeds from the "green" tranche will be used to finance or refinance, in whole or in part, certain eligible green projects.

"With this financing we were able to strengthen our balance sheet, extend our debt maturity and improve our fixed cost of debt in the long-term, all without increasing current leverage levels. This financing demonstrates once again the trust that our stakeholders have in our business strategy and our commitment to becoming a more sustainable company," said Jorge Girault, Senior Vice-President, Fund Asset Management Prologis Property Mexico.
