² Represent non-GAAP financial measures. For important presentation information, see slide 32.

³ Regulatory capital ratios at June 30, 2026, are preliminary. Bank of America Corporation (Corporation) reports regulatory capital ratios under both the Standardized and Advanced approaches. Capital adequacy is evaluated against the lower of the Standardized or Advanced approaches compared to their respective regulatory capital ratio requirements. The Corporation's binding ratio was the Tier 1 capital ratio under the Standardized approach at June 30, 2026, and the Total capital ratio under the Standardized approach at March 31, 2026, and June 30, 2025.

⁴ Effective 4Q25, the Corporation elected to change its accounting methods for certain tax-related equity investments and applied those changes retrospectively through cumulative adjustment to retained earnings. Under applicable bank regulatory rules, the Corporation is not required to revise previously-filed regulatory capital ratios and, accordingly, did not revise regulatory capital information as of 2Q25.

² Includes auto lending, securities-based lending, and other.

Net Interest Income

Net Interest Income (FTE, \$B)¹

- Net interest income of \$16.0B (\$16.2B FTE)¹
 - Increased \$1.3B from 2Q25, driven by higher NII related to Global Markets (GM) activity, higher loan and deposit balances, and fixed-rate asset repricing, partially offset by the impact of lower interest rates
 - Increased \$0.3B vs. 1Q26, as higher loan and deposit balances, one additional day of interest accrual, and fixed-rate asset repricing were partially offset by lower loan yields
- Net interest yield of 2.08% increased 14 bps from 2Q25 and 1 bp from 1Q26
 - Excluding GM, net interest yield of 2.57%¹
- Estimated impact to NII relative to the baseline forecast over next 12 months from parallel shift of the June 30, 2026 forward interest rate yield curve:²
 - +100 bps above curve: +\$1.0B higher NII
 - -100 bps below curve: (\$2.2B) lower NII

Net Interest Yield (FTE)¹

Net Interest Income Mix (FTE, \$B)¹

Note: Amounts may not total due to rounding.

¹ Represent non-GAAP financial measures. Net interest yield adjusted to exclude Global Markets NII of \$1.9B, \$1.9B, \$1.8B, \$1.5B, and \$1.3B and average earning assets of \$885.9B, \$874.3B, \$820.3B, \$813.2B, and \$825.8B for 2Q26, 1Q26, 4Q25, 3Q25, and 2Q25, respectively. The Corporation believes the presentation of NII and net interest yield excluding Global Markets provides investors with transparency of NII and net interest yield in core banking activities. For important presentation information, see slide 32.

² As of June 30, 2026. NII asset sensitivity represents banking book positions using behavioral deposit changes. See note B on slide 29 for information on asset sensitivity assumptions.

Expense and Efficiency

Total Noninterest Expense (\$B)

Efficiency Ratio

- Efficiency ratio of 59% improved 359 bps from 2Q25 and 220 bps from 1Q26
- Operating leverage of 6.6% in 2Q26 and 4.7% in 1H26
- 2Q26 noninterest expense of \$18.6B
 - Increased \$1.4B, or 8%, from 2Q25, driven equally by revenue-related expenses and investments in people, brand, and technology
 - Increased \$0.1B from 1Q26, as higher revenue-related expenses and marketing costs more than offset the absence of 1Q seasonally-elevated payroll taxes

Asset Quality

Net Charge-offs (\$MM)

Provision for Credit Losses (\$MM)

- Total net charge-offs of \$1.4B vs. \$1.5B in 2Q25 and \$1.4B in 1Q26
 - Consumer net charge-offs of \$1.0B declined \$19MM vs. both 2Q25 and 1Q26
 - Credit card charge-off rate of 3.55% in 2Q26; charge-off rate and both early- and late-stage delinquencies improved vs. 2Q25 and 1Q26
 - Commercial net charge-offs of \$372MM declined \$94MM vs. 2Q25 and increased \$22MM vs. 1Q26
 - Net charge-off ratio of 0.47% vs. 0.55% in 2Q25 and 0.48% in 1Q26¹
- Provision for credit losses of \$1.4B decreased \$0.2B vs. 2Q25 and was relatively flat to 1Q26
- Net reserve release of \$46MM in 2Q26 vs. net reserve build of \$67MM in 2Q25 and net reserve release of \$72MM in 1Q26²
- Allowance for loan and lease losses of \$13.1B represented 1.08% of total loans and leases³
 - Allowance for credit losses of \$14.3B included \$1.2B for unfunded commitments
- Nonperforming loans and leases of \$5.8B decreased \$230MM from 2Q25 and \$80MM from 1Q26
- Commercial reservable criticized utilized exposure of \$22.1B declined \$5.8B vs. 2Q25 and \$2.3B vs. 1Q26

¹ Net charge-off ratio is calculated as annualized net charge-offs divided by average outstanding loans and leases during the period. Excludes loans measured at fair value.

² For more information on reserve build (release), see note C on slide 29.

³ Allowance for loan and lease losses ratio is calculated as allowance for loan and lease losses divided by loans and leases outstanding at the end of the period. Excludes loans measured at fair value.

 - Equities revenue increased 70% to \$3.6B (incl. and excl. net DVA),³ driven by increased client activity and strong trading performance in derivatives and cash, particularly in Asia and the U.S.
 - FICC revenue increased 9% to \$3.5B (incl. and excl. net DVA),³ driven primarily by credit products and commodities
- Noninterest expense of \$4.5B increased 18% vs. 2Q25, driven by higher revenue-related expenses and investments in the business, including people and technology
 - Efficiency ratio improved to 56%
- Average VaR of \$49MM in 2Q26⁵

¹ The explanations for current period-over-period changes for Global Markets are the same for amounts including and excluding net DVA.

² Global Banking and Global Markets share in certain deal economics from investment banking, loan origination activities, and sales and trading activities.

³ Represent non-GAAP financial measures. Reported fixed income, currencies, and commodities (FICC) sales and trading revenue was \$3.5B, \$3.5B, and \$3.2B for 2Q26, 1Q26, and 2Q25, respectively. Reported Equities sales and trading revenue was \$3.6B, \$2.8B, and \$2.1B for 2Q26, 1Q26, and 2Q25, respectively. See note E on slide 29 and slide 32 for important presentation information.

⁴ Represents a non-GAAP financial measure. For more information and a reconciliation to the most directly comparable GAAP financial measure, see note D on slide 29. For important presentation information, see slide 32.

⁵ See note F on slide 29 for the definition of VaR.

Notes

- A Global Liquidity Sources (GLS) include cash and high-quality, liquid, unencumbered securities, inclusive of U.S. government securities, U.S. agency securities, U.S. agency MBS, and a select group of non-U.S. government and supranational securities, and other investment-grade securities, and are readily available to meet funding requirements as they arise. Transfers of liquidity among legal entities may be subject to certain regulatory and other restrictions.
- B Interest rate sensitivity as of June 30, 2026, reflects the potential pretax impact to forecasted net interest income over the next 12 months from June 30, 2026, resulting from an instantaneous parallel shock to the market-based forward curve. As part of our asset and liability management activities, we use securities, certain residential mortgages, and interest rate and foreign exchange derivatives in managing interest rate sensitivity. The sensitivity analysis assumes that we take no action in response to this rate shock and does not assume any change in other macroeconomic variables normally correlated with changes in interest rates. The sensitivity analysis incorporates potential movements in customer behavior that could result in changes in both total customer deposit balances and balance mix in various interest rate scenarios. In higher rate scenarios, the analysis assumes that a portion of low-cost or noninterest-bearing deposits is replaced with higher yielding deposits or market-based funding. In lower rate scenarios, the analysis assumes that a portion of higher-yielding deposits or market-based funding are replaced with low-cost or noninterest-bearing deposits.
- C Reserve build (or release) is calculated by subtracting net charge-offs for the period from the provision for credit losses recognized in that period. The period-end allowance, or reserve, for credit losses reflects the beginning of the period allowance adjusted for net charge-offs recorded in that period plus the provision for credit losses and other valuation accounts recognized in that period.
- D Pretax, pre-provision income (PTPI) at the segment level is a non-GAAP financial measure calculated by adjusting the segment's pretax income to add back provision for credit losses. Management believes that PTPI is a useful financial measure as it enables an assessment of the Corporation's ability to generate earnings to cover credit losses through a credit cycle as well as provides an additional basis for comparing the Corporation's results of operations between periods by isolating the impact of provision for credit losses, which can vary significantly between periods. See reconciliation below.

- E Revenue for all periods included net debit valuation adjustments (DVA) on derivatives, as well as amortization of own credit portion of purchase discount and realized DVA on structured liabilities. Net DVA gains (losses) were (\$57MM), \$63MM, and (\$51MM) for 2Q26, 1Q26, and 2Q25, respectively, and \$6MM, (\$32MM), (\$86MM), and (\$88MM) for 2026 YTD, 2025 YTD, 2024 YTD, and 2023 YTD, respectively. Net DVA gains (losses) included in FICC revenue were (\$60MM), \$49MM, and (\$54MM) for 2Q26, 1Q26, and 2Q25, respectively, and (\$11MM), (\$39MM), (\$71MM), and (\$86MM) for 2026 YTD, 2025 YTD, 2024 YTD, and 2023 YTD, respectively. Net DVA gains (losses) included in Equities revenue were \$3MM, \$14MM, and \$3MM for 2Q26, 1Q26, and 2Q25, respectively, and \$17MM, \$7MM, (\$15MM), and (\$2MM) for 2026 YTD, 2025 YTD, 2024 YTD, and 2023 YTD, respectively.
- F VaR model uses a historical simulation approach based on three years of historical data and an expected shortfall methodology equivalent to a 99% confidence level. Using a 95% confidence level, average VaR was \$23MM, \$23MM, and \$35MM for 2Q26, 1Q26, and 2Q25 respectively, and \$23MM, \$37MM, \$34MM, and \$31MM for 2026 YTD, 2025 YTD, 2024 YTD, and 2023 YTD, respectively. Beginning in 1Q25, the VaR amounts for all periods presented are those used in the Corporation's risk management of its trading portfolios. Previously, the VaR amounts presented were those used for regulatory capital. The trading portfolio represents trading assets and liabilities, primarily consisting of regular underwriting or dealing in securities and derivative contracts, and acquiring positions as an accommodation to customers.

Forward-Looking Statements

Bank of America Corporation (the Corporation) and its management may make certain statements that constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. These statements can be identified by the fact that they do not relate strictly to historical or current facts. Forward-looking statements often use words such as “anticipates,” “targets,” “expects,” “hopes,” “estimates,” “intends,” “plans,” “goals,” “outlook,” “believes,” “continue” and other similar expressions or future or conditional verbs such as “will,” “may,” “might,” “should,” “would” and “could.” Forward-looking statements represent the Corporation’s current expectations, plans or forecasts of its or its business segments’ future results, which may include, among other measures, revenue, liquidity, net interest income, other income, provision for credit losses, expenses, operating leverage, effective tax rate, efficiency ratio, capital measures, deposits and assets, as well as strategy, future business and economic conditions more generally, and other future matters. These statements are not guarantees of future results or performance and involve certain known and unknown risks, uncertainties and assumptions that are difficult to predict and are often beyond the Corporation’s control. Actual outcomes and results may differ materially from those expressed in, or implied by, any of these forward-looking statements.

You should not place undue reliance on any forward-looking statement and should consider the following uncertainties and risks, as well as the risks and uncertainties more fully discussed under Item 1A. Risk Factors of the Corporation’s 2025 Annual Report on Form 10-K and in any of the Corporation’s subsequent U.S. Securities and Exchange Commission (SEC) filings: the Corporation’s potential judgments, orders, settlements, penalties, fines and reputational damage, which are inherently difficult to predict, resulting from pending, threatened or future litigation and regulatory inquiries, demands, requests, investigations, proceedings and enforcement actions, which the Corporation is subject to in the ordinary course of business, including matters related to our processing of unemployment benefits for California and certain other states, the features of our automatic credit card payment service, the adequacy of the Corporation’s anti-money laundering and economic sanctions programs and the processing of electronic payments, including through the Zelle network, and related fraud, which are in various stages; in connection with ongoing litigation, the impact of certain changes to Visa’s and Mastercard’s respective card payment network rules and reductions in interchange fees for U.S.-based merchants; the possibility that the Corporation’s future liabilities may be in excess of its recorded liability and estimated range of possible loss for litigation, and regulatory and government actions; the impact of U.S. and global interest rates (including the potential for ongoing fluctuations in interest rates), inflation, currency exchange rates, economic conditions, trade policies and tensions, including changes in, or the imposition of, tariffs and / or trade barriers and the economic impacts, volatility and uncertainty resulting therefrom, which may have varying effects across industries and geographies, and geopolitical instability; uncertainties about the financial stability and growth rates of non-U.S. jurisdictions, the risk that those jurisdictions may face difficulties servicing their sovereign debt, and related stresses on financial markets, currencies and trade, and the Corporation’s exposures to such risks, including direct, indirect and operational; the impact of the interest rate, inflationary, macroeconomic, banking and regulatory environment on the Corporation’s assets, business, financial condition and results of operations; the impact of adverse developments affecting the U.S. or global banking industry, including a deterioration in private credit markets, bank failures and liquidity concerns, resulting in worsening economic and market volatility, and regulatory responses thereto; the possibility that future credit losses may be higher than currently expected, including due to changes in economic assumptions, which may include unemployment rates, real estate prices, gross domestic product levels and corporate bond spreads, customer behavior, adverse developments with respect to U.S. or global economic conditions and other uncertainties, such as the impact of trade policies, supply chain disruptions, commodity prices, inflationary pressures and labor shortages on economic conditions and our business; potential losses related to the Corporation’s concentration of credit risk; the Corporation’s ability to achieve its expense targets (including noninterest expense) and expectations regarding revenue, net interest income, operating leverage, other income, provision for credit losses, net charge-offs, effective tax rate, loan or deposit growth or other projections and targets; variances to the underlying assumptions and judgments used in estimating banking book net interest income sensitivity; adverse changes to the Corporation’s credit ratings from the major credit rating agencies; an inability to access capital markets or maintain deposits or borrowing costs; estimates of the fair value and other accounting values, subject to impairment assessments, of certain of the Corporation’s assets and liabilities; the estimated or actual impact of changes in accounting standards or assumptions in applying those standards; uncertainty regarding the content, timing and impact of regulatory capital and liquidity requirements; the impact of adverse changes to total loss-absorbing capacity requirements, stress capital buffer requirements and / or global systemically important bank surcharges; the potential impact of actions of the Board of Governors of the Federal Reserve System on the Corporation’s capital plans; the effect of changes in or interpretations of income tax laws and regulations, including impacts from the 2025 Budget Reconciliation Act; the impact of implementation and compliance with U.S. and international laws, regulations and regulatory interpretations, including recovery and resolution planning requirements, Federal Deposit Insurance Corporation assessments, fiduciary standards, derivatives regulations and potential changes to loss allocations between financial institutions and customers, including for losses incurred from the use of our products and services, including electronic payments and payment of checks, that were authorized by the customer but induced by fraud; the impact of failures or disruptions in or breaches of the Corporation’s operations or information systems, or those of various third parties, including regulators and federal and state governments, such as from cybersecurity incidents; the risks related to the development, implementation, use and management of emerging technologies, including artificial intelligence and the ability to achieve expected or potential benefits, such as increased productivity and cost savings; the risks related to the transition and physical impacts of climate change; our ability to achieve environmental goals or the impact of any changes in the Corporation’s sustainability or human capital management strategy or goals; the impact of uncertain or changing political conditions, federal government shutdowns, including partial shutdowns, and uncertainty regarding the federal government’s debt limit or changes in fiscal, monetary, trade or regulatory policy; the emergence of widespread health emergencies or pandemics; the impact of natural disasters, extreme weather events, military conflicts (including the Russia / Ukraine conflict, the conflicts in the Middle East, the possible expansion of such conflicts and potential geopolitical and economic consequences), civil unrest, terrorism or other geopolitical events; and other matters.

Forward-looking statements speak only as of the date they are made, and the Corporation undertakes no obligation to update any forward-looking statement to reflect the impact of circumstances or events that arise after the date the forward-looking statement was made.

Important Presentation Information

- The information contained herein is preliminary and based on Corporation data available at the time of the earnings presentation. It speaks only as of the particular date or dates included in the accompanying slides. Bank of America does not undertake an obligation to, and disclaims any duty to, update any of the information provided.
- The Corporation may present certain metrics and ratios, including year-over-year comparisons of revenue, noninterest expense, and pretax income, excluding certain items (e.g., DVA), and ratios utilizing tangible equity and tangible assets, that are non-GAAP financial measures. The Corporation believes the use of these non-GAAP financial measures provides additional clarity in understanding its results of operations and trends. For more information about the non-GAAP financial measures contained herein, please see the presentation of the most directly comparable financial measures calculated in accordance with GAAP and accompanying reconciliations in the earnings press release for the quarter ended June 30, 2026, and other earnings-related information available through the Bank of America Investor Relations website at: <https://investor.bankofamerica.com/quarterly-earnings>, the content of which is not incorporated by reference into this presentation.
- The Corporation presents certain key financial and nonfinancial performance indicators (KPIs) that management uses when assessing consolidated and / or segment results. The Corporation believes this information is useful because it provides management with information about underlying operational performance and trends. KPIs are presented herein, including in the 2Q26 Highlights on slides 2 and 4 and on Summary Income Statement for each segment.
- The Corporation also views net interest income and related ratios and analyses on a fully taxable-equivalent (FTE) basis, which when presented on a consolidated basis are non-GAAP financial measures. The Corporation believes managing the business with net interest income on an FTE basis provides investors with meaningful information on the interest margin for comparative purposes. The Corporation believes that the presentation allows for comparison of amounts from both taxable and tax-exempt sources and is consistent with industry practices. The FTE adjustments were \$163MM, \$162MM, \$165MM, \$154MM, and \$145MM for 2Q26, 1Q26, 4Q25, 3Q25, and 2Q25, respectively.
- The Corporation allocates capital to its business segments using a methodology that considers the effect of regulatory capital requirements in addition to internal risk-based capital models. Allocated capital is reviewed periodically and refinements are made based on multiple considerations that include, but are not limited to, risk-weighted assets measured under Basel 3 Standardized and Advanced approaches, business segment exposures and risk profile, and strategic plans. As a result of this process, in 1Q26, the Corporation adjusted the amount of capital being allocated to its business segments.
