Capstone Green Energy (NASDAQ: CGRN) Signs 20-Year Parts & Labor Service Contract on an 800KW Energy System Installed at a Premier Hotel in Jamaica

Capstone Green Energy Continues to Expand its Energy as a Service Business

VAN NUYS, CA / ACCESSWIRE / January 11, 2022 /Capstone Green Energy Corporation (www.CapstoneGreenEnergy.com) (NASDAQ:CGRN), ("Capstone", the "Company", "we" or "us"), a global leader in carbon reduction and on-site resilient green energy as a service (EaaS) solutions, announced today that Innovative Energy Company Limited (IEC), the exclusive Capstone distributor for Jamaica (www.ieclja.com), signed a 20-year Parts & Labor Factory Protection Plan (FPP) service contract for a C800S, 800 kilowatt (kW), Signature Series Capstone energy system installed at a premier hotel in Jamaica.

Capstone Green Energy continues to expand its Energy as a Service (EaaS) business, including its industry-leading FPP long-term comprehensive service product and its long-term rental program, both of which are important elements to Capstone achieving its near-term profitability goals as service contracts and rentals agreements generate higher contribution margin rates than traditional product sales.

The 225-room hotel commissioned the Capstone 800 kW energy system in June 2020 as they sought to reduce their energy costs by employing a Capstone Energy System tri-generation solution. The CCHP application has a project design efficiency of 83%. The Capstone C800S provides more than 95% of the hotel's annual electrical energy, 100% of the hotel's domestic hot water, and 80% of the hotel's peak cooling demand by utilizing the exhaust gas. With Capstone's energy system the hotel is reducing its annual energy costs while also reducing its greenhouse gas emissions. The C800S is also configured as Dual-Mode with integrated battery packs, which will allow the hotel to continue to operate in the event of a local grid outage.

Capstone's industry-leading FPP long-term comprehensive service product is designed to provide complete service coverage, parts and labor for both scheduled and unscheduled maintenance for the next 20-years and protect the end-use customer from future cost increases associated with labor, replacement spare parts pricing, commodities, import tariffs, and interest rates.

"Now is the time to prepare for more intense weather events ahead as climate change is affecting everyone on a global scale. Meeting the customer's operational needs for a stable power supply in a region impacted by severe weather while providing significant financial savings through a long-term full-coverage service contract is key to what Capstone Green

Energy brings to the energy market," said Tracy Chidbachian, Director of Customer Service.

"The 2021 Atlantic hurricane season was the third most active hurricane season on record with storms getting stronger and lasting longer, resulting in short and long-term physical and economical damages. In most cases, the unpredictable and severe weather results in extended grid outages," said Darren Jamison, Chief Executive Officer of Capstone Green Energy. "A Capstone on-site energy system reduces the operational risks of grid outages and is designed to provide resiliency and reliability by providing continuous operation, making the Capstone high efficiency and low emission energy system the ideal solution in the Caribbean," concluded Mr. Jamison.

About Capstone Green Energy

Capstone Green Energy (www.CapstoneGreenEnergy.com) (NASDAQ: CGRN) is a leading provider of customized microgrid solutions and on-site energy technology systems focused on helping customers around the globe meet their environmental, energy savings, and resiliency goals. Capstone Green Energy focuses on four key business lines. Through its Energy as a Service (EaaS) business, it offers rental solutions utilizing its microturbine energy systems and battery storage systems, comprehensive Factory Protection Plan (FPP) service contracts that guarantee life-cycle costs, as well as aftermarket parts. Energy Conversion Products are driven by the Company's industry-leading, highly efficient, low-emission, resilient microturbine energy systems offering scalable solutions in addition to a broad range of customer-tailored solutions, including hybrid energy systems and larger frame industrial turbines. The Energy Storage Products business line designs and installs microgrid storage systems creating customized solutions using a combination of battery technologies and monitoring software. Through Hydrogen Energy Solutions, Capstone Green Energy offers customers a variety of hydrogen products, including the Company's microturbine energy systems.

For customers with limited capital or short-term needs, Capstone offers rental systems; for more information, contact: rentals@CGRNenergy.com. To date, Capstone has shipped over 10,000 units to 83 countries and estimates that, in FY21, it saved customers over \$217 million in annual energy costs and approximately 397,000 tons of carbon. Total savings over the last three fiscal years are estimated at 1,115,100 tons of carbon and \$698 million in annual energy savings.
