About Babylon

At Babylon, our mission is to make quality healthcare accessible and affordable for every person on Earth. To this end we are building an integrated digital first primary care service that can manage population health at scale. Founded in 2013, we are reengineering how people engage with their care at every step of the healthcare continuum. Today, Babylon's technology and clinical services support a global patient network across 15 countries, and our digital healthcare platform is capable of operating in 16 languages. Babylon is also working with governments, health providers, employers and insurers across the globe to provide them with a new digital-first platform that any partner can use to deliver high-quality healthcare with lower costs and better outcomes.
