BIOLASE ANNOUNCES SUPPORT FOR PROJECT HOME

LAKE FOREST, Calif., June 27, 2022 /PRNewswire/ -- [BIOLASE](#), Inc. (NASDAQ: BIOL), the global leader in dental lasers, announced today that it has partnered with [Project HOME](#), an organization that provides dental services to patients from their first birthday to adulthood. Project HOME's Healthcare Services is a Federally Qualified Health Center (FQHC) and supports health care services, regardless of a person's ability to pay for the services, in Philadelphia.

The mission of Project HOME is to empower adults, children, and families to break the cycle of homelessness and poverty, alleviate the underlying causes of poverty, and enable individuals to attain their fullest potential as individuals and as members of the broader society. Project HOME strives to create a safe and respectful environment to support individuals struggling with self-esteem, recovery, confidence, as well as mental and physical health.

Project HOME's dental services are part of a patient-centered, integrated health care service model, where many dental patients are also primary care patients. This allows medical issues that may impact oral health to be identified early and for treatment to begin to improve the patients' overall well-being.

During a ride-along with the BIOLASE team in Philadelphia, BIOLASE's President and Chief Executive Officer, John Beaver, was invited to visit Project HOME to see how the company could assist people in need. "At BIOLASE, our goal is to develop dental laser technology that provides a higher standard of care to the patient and improves patients' oral health," said Beaver. "Supporting Project HOME in their mission gives BIOLASE an opportunity to make a meaningful contribution to the overall health of the community."

"It is a great honor that BIOLASE has partnered with Project HOME to help provide dental care to our members. With the donation of an iPlus Waterlase laser system and the training program offered to our doctors and staff at Project HOME's dental facility in Philadelphia, the modern technology offered by BIOLASE will help provide a new standard of care for Project HOME members," commented Dr. Janine Burkhardt, Project HOME's Dental Director. "Improving the already excellent care each member receives, while assisting the doctors to complete more treatments in one visit, will have a significant impact on our ability to achieve our mission and improve our members' oral health outcomes."

About Project HOME

Since 1989, Project HOME has helped thousands of people break the cycle of homelessness and poverty by providing a continuum of care that includes street outreach, supportive housing and comprehensive services that focus on health care, education and employment through both adult and youth education and enrichment programs. Cautionary Statement Regarding Forward-Looking Statements

This press release contains forward-looking statements, as that term is defined in the Private Litigation Reform Act of 1995, that involve significant risks and uncertainties, including statements regarding the anticipated roll out of new go-to-market sales strategies, the Company's efforts to achieve its goal of becoming EBITDA positive. Forward-looking statements can be identified through the use of words such as "anticipates," "expects," "intends," "plans," "believes," "seeks," "estimates," "may," "will," "should," and variations of these words or similar expressions. Readers are cautioned not to place undue reliance on these forward-looking statements, which reflect BIOLASE's current expectations and speak only as of the date of this release. Actual results may differ materially from BIOLASE's current expectations depending upon a number of factors. These factors include, among others, adverse changes in general economic and market conditions, competitive factors including but not limited to pricing pressures and new product introductions, uncertainty of customer acceptance of new product offerings and market changes, risks associated with managing the growth of the business, and those other risks and uncertainties that are described, from time-to-time, in the "Risk Factors" section of BIOLASE's annual reports filed on Form 10-K with the Securities and Exchange Commission. Except as required by law, BIOLASE does not undertake any responsibility to revise or update any forward-looking

statements.
