Sunrun Closes \$33 Million SREC Term Loan Facility

Facility supports SREC monetization and smart residential solar growth in the Northeast U.S.

SAN FRANCISCO, July 19, 2016 (GLOBE NEWSWIRE) -- [Sunrun](#) Inc. (Nasdaq:RUN), the largest dedicated residential solar company in the United States, today announced the closing of a \$33 million non-recourse term loan facility to support the growth of Sunrun's residential solar business in Maryland, Massachusetts and New Jersey. Sunrun will use the 5-year loan to finance a portfolio of solar renewable energy credits ("SRECs"). The loan will bring down overall system deployment costs, helping more families access affordable, clean residential solar energy systems. The initial lender, who was not disclosed, is a leading international financial institution.

"Sunrun continues to demonstrate that we can access flexible and attractive capital from diverse financial institutions to both enhance upfront cash proceeds and support sustainable growth," said Bob Komin, Chief Financial Officer of Sunrun. "The Northeast is a thriving pocket of the U.S. solar market and this loan further supports Sunrun's strong position in the region, which includes our customer origination partnerships with Constellation, NRG, and Ambit Energy."

The interest rate on the initially drawn amount is approximately 6.8 percent. The facility advances against both contracted and uncontracted SRECs. As such, this term loan facility marks the first time Sunrun has borrowed on a non-recourse basis against cash flows not included in its reported estimated retained value. Sunrun expects this innovative form of financing will act as a template for future SREC-related financings, enabling the upfront monetization of high-quality SREC cash flows.

About Sunrun

Sunrun (Nasdaq:RUN) is the largest dedicated residential solar company in the United States with a mission to create a planet run by the sun. Since establishing the solar as a service model in 2007, Sunrun continues to lead the industry in providing clean energy to homeowners with little to no upfront cost and at a savings to traditional electricity. The company designs, installs, finances, insures, monitors and maintains the solar panels on a homeowner's roof, while families receive predictable pricing for 20 years or more.
