APPENDIX

Reconciliation of GAAP and non-GAAP Financial Measures

The Company has used the non-GAAP financial measures of adjusted net income and adjusted EPS in today's earnings release. These measures should not be considered in isolation or as a substitute for net income, earnings per share or other performance measures prepared in accordance with GAAP.

The Company uses adjusted net income and adjusted EPS as a measure of operating performance because it allows it to compare performance consistently over various periods without regard to the impact of the property disposition gains.

A non-GAAP financial measure is a numerical measure of financial performance, financial position, or cash flows that either 1) excludes amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the most directly comparable measure calculated and presented in accordance with GAAP in the statement of operations, balance sheet or statement of cash flows, or 2) includes amounts, or is subject to adjustments that have the effect of including amounts, that are excluded from the most directly comparable measure so calculated and presented.

Set forth below is a reconciliation of adjusted net income and adjusted EPS with net income, the most comparable GAAP measure.
