# Amesite Now Enables Enterprise Customers to Import Legacy Learning Programs with its SCORM-Compliant V4 Platform

**SCORM is the most widely used eLearning technical standard available**

**Ability to rapidly transition to Amesite platform expected to drive significant new customer adoptions**

DETROIT, Oct. 25, 2021 /PRNewswire/ -- **Amesite Inc**., (NASDAQ: AMST), the leading artificial intelligence software company offering a cloud-based learning platform and content creation services for business, university, non-profit and government agency learning and upskilling, announced today that the latest iteration of its best-in-class A.I.-driven online learning platform, V4, is being delivered SCORM-compliant to customers starting November 1, 2021. SCORM is the most widely used eLearning technical standard available.

"Our Amesite V4 platform now enables our customers to launch their existing SCORM-compliant courses and benefit from our best-in-class A.I. technology and analytics," commented Dr. Ann Marie Sastry, founder and CEO of Amesite. "Our customers told us that they wanted to leverage our superior technology to deliver their existing portfolio courses in addition to new builds – and we listened. Organizations can rapidly deliver their existing courses, courses from our catalog, new courses they create themselves, and custom courses produced by Amesite, all with the user experience that their employees and users love. In just days, whole learning and development programs can be transitioned to Amesite's easy-to-use platform, all with a single purchase order. This development helps our customers – and us – build scale."

Amesite's V4 platform supports migration of SCORM-compliant courses into Amesite Learning Community Environment$^{TM}$ systems, with all the engagement benefits of an Amesite course, including best-in-class user experience, engaging interfaces, interactive lectures, livestreaming, and video conferencing.

Amesite's V4 platform infrastructure enables out-of-the-box scalability and agile improvements that support SCORM integration. Amesite's technology infrastructure focuses on speedy transit network, low latency, quality, and secure communication to provide best-in-class delivery of SCORM-compliant course catalogues.

The software-as-a-service (SaaS) market is expected to reach $171.9 billion in 2022, according to Statista, driven primarily by new innovations and increased customer adoptions. According to Grandview Research, the global A.I. market was valued at $62.4 billion in 2020 and is expected to grow at a compound annual growth rate of 40% through 2028, when it is forecasted to reach nearly $1 trillion.
