Amesite Announces AI-Powered Document Storage and Study Tools on NurseMagic™ App to Power Instantaneous Training for Nurses and Nursing Students

NurseMagic's Library Function Enables Nurses to Upload and Transcribe Video and Audio Files and Create Study Materials to Enhance Work and School Performance

DETROIT, July 11, 2024 (GLOBE NEWSWIRE) -- Amesite Inc. (NASDAQ: AMST), a leading artificial intelligence software company offering a cloud-based learning platform for business and education markets, announced that its NurseMagic™ app now supports nursing students and professionals ranging from CNAs and LPNs to APRN-CNPs and NPs. The functionality supports any type of documentation, training and learning. NurseMagic™ has experienced [rapid adoption by nurses following its release to the general public](#), targeting over 5.2 million nurses. Its proprietary technology has [demonstrated 93% accuracy when tested on prep questions for the NCLEX](#), the exam that must be passed by nurses in the U.S. and Canada in order to be licensed.

Users can upload pdf, video and audio files to instantly create transcripts, summaries and even quizzes and flashcards based on the material. Uploadable content spans recorded and written lecture materials, training materials and professional guidelines along with informal materials created via mentorship. With the new functionality, nurses can access instantaneous training. Additionally, users can share materials easily on the app and create their own file structures, enabling scaling of distribution of informal and formal learning, training and other professional materials.

McKinsey reports that 75% percent of early-tenure nurse respondents enjoy working with the most-experienced nurses, but more than 33% of these nurse veterans don't have the time or capacity to train or coach others. In academia, more than 70% of college students have used AI. The market for AI in healthcare is expected to grow to over \$187 billion by 2030.

Kalie Wortinger, Senior Engineering Manager at Amesite, said, "Our AI-powered capability to upload, digest and effectively use documents is an overwhelming advantage to nurses using it, for both professional and academic purposes, replacing hours of manual work with streamlined access to instantaneous training. We built our infrastructure at Amesite to stay ahead of the curve in key AI capabilities and are thrilled to consistently roll out tools that our users want and can use immediately."

CEO Dr. Ann Marie Sastry said, "Our nurse influencers like [Cynesse](#), [Nurse Tara](#) and

[Kesheen](#) are demonstrating the power of NurseMagic™ to their communities and driving user growth, and their communities are telling us what they want, and influencing our designs. We are focused on powering the work of millions of nurses around the world with AI, who can use our technology to be effective in this era of nurse shortages, burnout and high turnover."
