In 2018, over 1.1 million reusable bottles were filled with free freshly filtered water provided by the CamelBack Filling Stations, offsetting the number of disposable plastic water bottles and cutting down on waste. Over 145 tons of recycled and or compostable material was diverted from landfills thanks to efforts of fans, staff and ambassadors. Additionally, Lollapalooza offset 2.4 million pounds of carbon dioxide emissions; the work of 200,000 young trees over a year. About Lollapalooza

Launched by founder Perry Farrell in 1991 as a touring festival, Lollapalooza remains an innovator in festival culture over 25 years later. Lollapalooza was the first festival to bring together artists from a wide range of musical genres on one bill, it was also the first to travel, the first to expand to multiple days, the first to introduce a second stage, the first to blend art and activism, the first to offset its carbon emissions, the first to put electronic dance music artists on the main stage, the first to create family friendly programming, the first to make its home in an urban city center and the first to expand internationally.

Lollapalooza has grown into an annual world-class festival in Chicago (2005), as well as culturally rich countries including Chile, Argentina, Brazil, Germany, France and Sweden. Lollapalooza is one of the premier destinations both for music fans in the United States and abroad. The festival expanded to four days in 2016 in celebration of 25 years and continues to bring fans four full days of music and over 170 bands on 8 stages. In 2018 Lollapalooza brought in over 247 milliondollars in local economic impact and 1.445 billion dollars in total, since 2010.

Lollapalooza is produced by Perry Farrell, William Morris Endeavor Entertainment, and C3 Presents.
