Hercules Well Positioned to Benefit From Rising Rates and Expects to Realize Increased Net Investment Income From the Recent FOMC Rate Increase

- ~98.2% of Hercules Existing Loan Portfolio is Priced at Floating Interest Rates
- Prime Rate has increased from 3.25% to 3.50%, per the Wall Street Journal today
- Each 25 Basis Points Rise in the Prime Rate Generates Approximately \$2.0 Million, or \$0.03 per Share of Additional Net Investment Income or NII

PALO ALTO, Calif.--(BUSINESS WIRE)-- [Hercules Technology Growth Capital, Inc.](#) (NYSE:HTGC) ("Hercules" or the "Company"), the leading specialty financing provider to innovative venture growth stage companies backed by leading venture capital firms, today announced the estimated accretive impact to its investment loan portfolio attributed to the Federal Reserve - Federal Open Market Committee's ("FOMC") increase in the federal funds rate by 25 basis points, or 0.25%. Hercules anticipates each 25 basis points increase in the Prime Rate will contribute approximately \$2.0 million, or \$0.03 per share, of net investment income per annum. As of September 30, 2015, 98.2% of Hercules' loan investment portfolio of \$1.1 billion was primarily priced at PRIME or LIBOR-based floating interest rates, while 100% of the Company's outstanding debt obligations have a fixed rate of interest, well positioned Hercules for additional future rate increases. The expected net investment income benefit is expected to be realized beginning in Q1 2016.

Based on Hercules' Consolidated Statement of Assets and Liabilities as of September 30, 2015, the following table illustrates the approximate annualized increase in components of net income resulting from hypothetical base rate changes in interest rates, such as prime rate, assuming no changes in the Company's investments and borrowings.
