Tom Mendoza Joins UiPath Board of Directors

NEW YORK, Nov. 29, 2017 /PRNewswire/ -- [UiPath](#), the Enterprise Robotic Process Automation (RPA) software platform for business and IT, announced today that Tom Mendoza, Vice Chairman at NetApp, Inc. (Nasdaq: NTAP), has joined the company's board of directors.

Tom Mendoza brings considerable growth leadership and expertise to UiPath. Building on years of experience growing NetApp since 1994, both as head of sales and later president, Tom brings proven capabilities of rapidly scaling business operations worldwide while maintaining a strong focus on customers and culture.

"Tom is a seasoned technology executive and I am excited to welcome him to the UiPath board of directors," said Daniel Dines, CEO and Co-Founder, UiPath. "Our company is experiencing tremendous growth and we are looking forward to applying Tom's leadership experience. His counsel will help UiPath continue to gain share in the rapidly-growing RPA market while maintaining our product innovation and quality, as well as our responsiveness and continued focus on our customers' success."

"UiPath's phenomenal growth is indicative of an explosive market propelled by a great

company," commented Tom Mendoza. "I have been very impressed with Daniel's vision for UiPath as a platform to not only easily digitize a customer's business process, but also as a path to AI. He has a long-term view that will ensure UiPath's role as an increasingly important partner in enterprise digital transformation. I am looking forward to helping UiPath continue on this year's incredible momentum."

About UiPath

Built for both business and IT, UiPath is the leading platform for Enterprise Robotic Process Automation (RPA). The company is at the forefront of the digital business revolution achieving over 500% yearly revenue growth since 2015. A global community exceeding 30,000 users and over 450 enterprise customers and government agencies use UiPath's Enterprise RPA platform to deploy attended and unattended software robots quickly and accurately resulting in better business outcomes, stronger security and compliance, and higher job satisfaction.

Based in New York City, US, UiPath also maintains offices in Australia, France, India, Japan, Romania, and the United Kingdom with an employee base over 400 people.
