Anixa Biosciences to Present at Biotech Showcase 2023

SAN JOSE, Calif., Dec. 19, 2022 /PRNewswire/ -- [Anixa Biosciences, Inc.](#) (NASDAQ: ANIX), a biotechnology company focused on the treatment and prevention of cancer and infectious diseases, today announced that it will present at the Biotech Showcase 2023 conference being held in-person on January 9-11, 2023, at the Hilton San Francisco Union Square in San Francisco, California, and virtually on January 18-19, 2023.

The presentation will provide an overview of Anixa's business and highlight recent corporate achievements, including updates on its clinical programs.

Details of the presentation are as follows:

Event: Biotech Showcase 2023
Date: Monday, January 9, 2023
Time: 3:30 PM PST
Location: Yosemite-A, Hilton San Francisco Union Square

Anixa management will be available for one-on-one meetings throughout the conference.

Biotech Showcase is one of the industry's largest annual healthcare investor and partnering conferences, bringing together biopharmaceutical and life sciences company executives, investors, sector analysts, bankers, and industry stakeholders. More than 350 presentations from mid-, small- and micro-cap public and private companies are expected to present at the event. Qualified investors and buy- and sell-side analysts are invited to request a complimentary registration to attend Biotech Showcase. For more information on attending [click here](#).

About Anixa Biosciences, Inc.

Anixa is a clinical-stage biotechnology company with programs addressing cancer and infectious disease. Anixa's portfolio of therapeutics includes a cancer immunotherapy program being developed in collaboration with Moffitt Cancer Center, which uses a novel type of CAR-T, known as chimeric endocrine receptor T-cell (CER-T) technology, and, with partner MolGenie GmbH, a COVID-19 program focused on compounds targeting the M^{pro} enzyme of SARS-CoV-2, which is largely conserved across all recently identified variants.

The company's vaccine portfolio includes a novel vaccine being developed in collaboration with Cleveland Clinic to prevent breast cancer – specifically triple negative breast cancer (TNBC), the most lethal form of the disease – as well as a vaccine to prevent ovarian cancer. These vaccine technologies focus on immunizing against "retired" proteins that have been found to be expressed in certain forms of cancer. Anixa's unique business model of partnering with world-renowned research institutions on clinical development allows the company to continually examine emerging technologies in complementary fields for further development and commercialization.
