## Introducing the BEARTRAP 950 UAV

BOZEMAN, Mont., May 5, 2015 /PRNewswire/ -- Bridger Aerospace is proud to announce the Beartrap 950 UAV, featuring our lightest, most compact, and rugged camera system, the CM100 gimbal.

The Beartrap 950 is designed to fulfill the needs of the commercial, industrial, and military\law enforcement market. Constructed from aircraft grade aluminum and carbon fiber, the Beartrap 950 is designed and built in America, and features a patent pending space saving retractable design.

Key features include:

- Collapsibility – folds down for packing in ten seconds for easy transport
- Ultra-high efficiency flow-through design
- American made motors and motor controllers
- 30+ minute flight time with fully automated flight
- 256 bit encrypted Video downlink enabled
- CM 100 gimbal- compact and rugged camera system with High definition Electro-Optic and Infrared cameras, object tracking, real-time video stabilization, motion detection and geo-lock feature.
