CarCharging and City Park Form Partnership to Increase Availability of Electric Vehicle Charging Infrastructure in San Francisco

Electric Car Charging Service Provider Supports EV Drivers in Northern California by Expanding EV Charging Locations

MIAMI BEACH, Fla., Feb. 13, 2013 /PRNewswire/ -- [Car Charging Group, Inc.](#) (OTCQB: CCGI) ("CarCharging"), a nationwide provider of convenient electric vehicle (EV) charging services, announced its partnership with City Park, a premier parking management company in Northern California. CarCharging and City Park inaugurate their partnership with the availability of EV charging services at City Park's MOMA Garage located at 147 Minna Street and the 750 Bush Garage located at 750 Bush Street, both in San Francisco, California.

The MOMA Garage is centrally located in downtown San Francisco, between 3rd Street and New Montgomery Street, and provides easy access to the San Francisco Museum of Modern Art as well as the Moscone Center. The 750 Bush garage is located near the world class shopping district, Union Square, and provides parking to many of the boutique hotels in the area.

"San Francisco is one of the leading markets for electric car sales and CarCharging believes that is imperative to support the EV drivers in the area by providing convenient and accessible EV charging locations," said Michael D. Farkas, CEO of CarCharging. "We are thankful to have partners such as City Park, who are leaders in their industry and understand the added value of this amenity."

"At City Park, we are dedicated to making a positive impact on the environment and we see EV charging stations as one of the amenities that benefits our customers, our clients, their tenants and guests, and our community as a whole," said Spencer Sechler, Director of Marketing at City Park. "As a company who relies on passenger vehicles to generate our revenues, we are committed to help provide "green" alternatives to fossil based fuels."

CarCharging's services utilize EV charging stations manufactured by ChargePoint[®], which provide 240 volts with 32 amps of power to quickly recharge an EV's battery. EV drivers can easily request CarCharging's evCharge card on [CarCharging's website](#) to initiate use and payment at any intelligent CarCharging station. CarCharging's evCharge card also allows

drivers to use charging locations on the ChargePoint® Network, the largest national online network connecting EV drivers to EV charging stations.

Users can pinpoint EV charging station locations using the CarCharging map at www.CarCharging.com. The ChargePoint® mobile application for iPhone, Android, and Blackberry phones also provides real-time charging station location information with turn-by-turn directions. Drivers will soon be able to reserve a time slot, guaranteeing access to EV charging stations to recharge their electric vehicle.
