

## Callon Petroleum Company Reports First Quarter 2007 Results of Operations

NATCHEZ, Miss.--

Callon Petroleum Company (NYSE: CPE) today reported results of operations for the three-month period ended March 31, 2007.

The company reported that average production in the first quarter was 60.3 million cubic feet of natural gas equivalent per day (MMcfe/d) compared to 56.0 MMcfe/d in the first quarter of 2006, or an increase of 8%. Revenue in the first quarter of 2007, at \$45.5 million, was essentially flat with the \$45.6 million of revenue reported in the first quarter of 2006. Net income for the three-month period ended March 31, 2007 was \$5.8 million, or \$0.27 per diluted share, compared to \$12.8 million, or \$0.60 per diluted share, for the same period in 2006. The difference in net income is almost entirely attributable to a spike in the depreciation, depletion and amortization (DD&A) rate to \$4.03 per thousand cubic feet equivalent (Mcfe) in the first quarter of 2007. The DD&A rate is expected to be within a range of \$3.28 to \$3.38 per Mcfe for the second quarter of 2007 and the balance of 2007. This range is very close to the full year rate in 2006 of \$3.14 per Mcfe.

First Quarter 2007 Discretionary Cash Flow. For the quarter ended March 31, 2007, discretionary cash flow remained consistent at \$33.5 million compared to \$33.8 million during the same period in 2006. Net cash flow provided by operating activities, as defined by GAAP, totaled \$32.9 million and \$41.0 million during the quarter ended March 31, 2007 and 2006, respectively. (See "Non-GAAP Financial Measure" and the accompanying financial information for a reconciliation of discretionary cash flow, a non-GAAP measure, to net cash flow provided by operating activities.)

Non-GAAP Financial Measure - This news release refers to a non-GAAP financial measure as "discretionary cash flow." Callon believes that the non-GAAP measure of discretionary cash flow is useful as an indicator of an oil and gas exploration and production company's ability to internally fund exploration and development activities and to service or incur additional debt. The company also has included this information because changes in operating assets and liabilities relate to the timing of cash receipts and disbursements which the company may not control and may not relate to the period in which the operating activities occurred. Discretionary cash flow should not be considered an alternative to net cash provided by operating activities or net income as defined by GAAP.

Reconciliation of Non-GAAP Financial Measure:
