

Nature's Sunshine Reports Third Quarter 2022 Results

LEHI, Utah, Nov. 03, 2022 (GLOBE NEWSWIRE) -- Nature's Sunshine Products, Inc. (Nasdaq: NATR) (Nature's Sunshine), a leading natural health and wellness company of high-quality herbal and nutritional products, reported financial results for the third quarter ended September 30, 2022.

Third Quarter 2022 Financial Summary vs. Same Year-Ago Quarter

- Net sales were \$104.5 million compared to \$114.7 million (down 2% in constant currency).
- GAAP net income was \$0.2 million, or \$0.00 per diluted common share, compared to \$5.5 million, or \$0.24 per diluted common share.
- Adjusted EBITDA was \$6.8 million compared to \$12.9 million.

Management Commentary

"Despite unprecedented external headwinds, we delivered third quarter sales of \$105 million on a reported basis, or \$112 million when removing the impact of foreign exchange," said CEO Terrence Moorehead. "The resilience of our portfolio was on full display, where despite the macroeconomic challenges, we were only down 2% versus prior year on a constant currency basis and year-to-date, sales were actually up 3% in local currency. Both measures reflect the underlying strength of our business.

"The current environment represents a unique challenge as inflation and volatile foreign exchange has dramatically increased our cost of goods, negatively impacting third quarter gross margins by as much as 300 basis points. We are meeting these challenges head-on by committing to gross savings of \$10 - \$12 million through gross margin and SG&A expense improvement and expect the key initiatives will be launched over the next 18 months. We remain confident that we will navigate this unique period of volatility and uncertainty, bolstered by our strong balance sheet and team of experts on the ground."

Net sales in the third quarter were \$104.5 million compared to \$114.7 million in the same year-ago quarter. Excluding the impact from foreign exchange rates, net sales in the third quarter of 2022 decreased 2.3% compared to the year-ago quarter.

Gross profit margin in the third quarter was 71.6% compared to 74.4% in the year-ago quarter. The decline was driven by changes in market mix, increases in material, production, transportation and distribution costs, as well as changes in exchange rates.

Volume incentives as a percentage of net sales were 31.6% compared to 31.2% in the year-ago quarter. The increase is primarily due to changes in market mix.

Selling, general and administrative expenses ("SG&A") in the third quarter were \$36.8 million compared to \$39.5 million in the year-ago quarter. Reduced service fees in China and current year compensation costs more than offset higher costs associated with the implementation of business transformation and sales growth initiatives in some markets and an increase in planned events and travel-related costs. As a percentage of net sales, SG&A expenses were 35.2% for the third quarter of 2022 compared to 34.4% in the year-ago quarter.

Operating income in the third quarter was \$5.0 million, or 4.8% of net sales, compared to \$10.0 million, or 8.7% of net sales, in the year-ago quarter.

Other loss, net, in the third quarter of 2022 was a loss of \$2.3 million compared to a loss of \$0.9 million in the third quarter of 2021. Other loss, net, primarily consists of foreign exchange losses as a result of net changes in foreign currencies, mostly in Asia, Europe and Latin America. The provision for income taxes was \$2.5 million in the third quarter of 2022 compared to \$3.7 million for the year-ago quarter.

GAAP net income attributable to common shareholders was \$0.1 million, or \$0.00 per diluted common share, compared to \$4.9 million, or \$0.24 per diluted common share, in the third quarter of 2021. Net income attributable to NSP China decreased to \$0.6 million, or \$0.03 per diluted common share, for the third quarter of 2022, compared to \$3.0 million, or \$0.15 per diluted common share, for the third quarter of 2021.

Non-GAAP net loss attributable to common shareholders in the third quarter of 2022 was \$1.1 million, or \$0.06 per diluted common share, compared to non-GAAP net income of \$4.1 million, or \$0.21 per diluted common share, in the prior year period. Non-GAAP net income (loss), which is a non-GAAP financial measure, is defined here as net income (loss) from continuing operations before less-frequent items including, among other things, value-added-tax (VAT) refunds. A reconciliation of Non-GAAP net income (loss) to GAAP net income (loss) is provided in the attached financial tables.

Adjusted EBITDA was \$6.8 million in the third quarter of 2022 compared to \$12.9 million in the third quarter of 2021. The decrease was driven primarily by the aforementioned decrease in gross profit. Adjusted EBITDA, which is a non-GAAP financial measure, is defined here as net income (loss) from continuing operations before taxes, depreciation, amortization, and other income (loss) adjusted to exclude share-based compensation expense and certain noted adjustments. A reconciliation of net income (loss) to Adjusted EBITDA is provided in the attached financial tables.

Balance Sheet and Cash Flow

Non-GAAP Financial Measures

We have included information which has not been prepared in accordance with generally accepted accounting principles (GAAP), such as information concerning non-GAAP net income (loss), Adjusted EBITDA and net sales excluding the impact of foreign currency exchange fluctuations.

We utilize the non-GAAP measures of non-GAAP net income (loss) and Adjusted EBITDA in the evaluation of our operations and believe that these measures are useful indicators of our ability to fund our business. These non-GAAP financial measures should not be considered as an alternative to, or more meaningful than, U.S. GAAP net income (loss) as an indicator of our operating performance.

Other companies may use the same or similarly named measures, but exclude different items, which may not provide investors with a comparable view of our performance in relation to other companies. We have included a reconciliation of net income to Adjusted EBITDA, the most comparable GAAP measure. We have also included a reconciliation of GAAP net income (loss) to Non-GAAP net income (loss) and Non-GAAP Adjusted EPS, in the attached financial tables.

Net sales in local currency removes, from net sales in U.S. dollars, the impact of changes in exchange rates between the U.S. dollar and the functional currencies of our foreign subsidiaries. This is accomplished by translating the current period net sales into U.S. dollars using the same foreign currency exchange rates that were used to translate the net sales for the previous comparable period.

We believe presenting the impact of foreign currency fluctuations is useful to investors because it allows a more meaningful comparison of net sales of our foreign operations from period to period. Net sales excluding the impact of foreign currency fluctuations should not be considered in isolation or as an alternative to net sales in U.S. dollar measures that reflect current period exchange rates, or to other financial measures calculated and presented in accordance with U.S. GAAP.
