Comments from the Company's President, Robert L. Marcotte: "Our results for the 2014 fiscal year end were positive as we were able to grow our net investments and maintained our average yield at 11.6% in the face of a competitive environment, which resulted in net investment income equal to 104% of the common dividends paid. During the year, we closed a diversified mix of debt and equity investments totaling \$102.0 million, which exceeded repayments by \$34.2 million, for a total increase in our portfolio assets year over year of 9.5%. Looking into 2015, we have maintained ample investment capacity to support the continued prudent growth of our investment portfolio, which we hope will serve to enhance our net investment income and dividend outlook."

Highlights for the Quarter: During the fourth quarter ended September 30, 2014, the following significant events occurred:

- **Portfolio Activity:**

- Invested \$8.8 million in Southern Petroleum Laboratories, Inc., a provider of independent lab, measurement and field metering services and well production allocation services to the oil and gas production industry. Additionally, we made a follow-on investment of \$7.1 million in a combination of subordinated term debt and equity in Francis Drilling Fluids, Ltd. in support of a strategic acquisition.
- Received \$20.5 million in aggregate scheduled and unscheduled principal repayments from existing portfolio companies, including five payoffs at or above par, which generated \$0.2 million in prepayment fees and a realized gain of \$1.1 million. In total these payoffs generated a weighted average IRR of approximately 14.2%.

- **Recurring Distributions:** Paid monthly distributions for each of July, August and

September 2014 to common stockholders of \$0.07 per common share and to preferred stockholders of \$0.140625 per preferred share for the Company's 6.75% Series 2021 Term Preferred Stock.

Fourth Quarter 2014 Results: Net Investment Income for the quarters ended September 30 and June 30, 2014, were \$4.4 million, or \$0.21 per share, and \$5.1 million, or \$0.24 per share, respectively. Net investment income decreased by 12.9% in the three months ended September 30, 2014, as compared to the prior quarter, primarily due to the decrease in other income of \$0.9 million associated with higher dividend income and a litigation settlement received during the prior quarter. This decrease in other income, as compared to the prior quarter, was partially offset by an increase in the net incentive fee waiver for the current quarter to ensure net investment income covered 100% of stockholder distributions for the quarter.

Net Increase (Decrease) in Net Assets Resulting from Operations for the quarters ended September 30 and June 30, 2014 increased to \$23.0 million, or \$1.09 per share, compared to a decrease of (\$20.2) million, or (\$0.96) per share, respectively. The quarter over quarter increase is primarily due to a large reversal of unrealized depreciation on one investment relative to the prior quarter, as well as incremental improvement in the financial and operating performance of certain investments and the full recovery of an underperforming investment during the current quarter.

Year Ended 2014 Results: Net Investment Income for the years ended September 30, 2014 and 2013, was unchanged at \$18.4 million, or \$0.87 per share and \$0.88 per share, respectively. Net investment income remained unchanged year over year as investment income increased by \$0.4 million primarily due to an increase in success fees and dividend income, while expenses increased by \$0.4 million primarily due to an increase in dividend expense associated with the increase in our outstanding mandatorily redeemable preferred stock, partially offset by a decrease in interest expense on our credit facility. Interest expense on our credit facility decreased year over year due primarily to decreased borrowings and, to a lesser extent, the January 2013 amendment to remove the LIBOR floor on our advances, which was in effect for the full year ended September 30, 2014.

Net Increase in Net Assets Resulting from Operations for the years ended September 30, 2014 and 2013, were \$11.2 million, or \$0.53 per share, compared to \$32.2 million, or \$1.53 per share, respectively. The year over year decrease is primarily due to the increase in net realized loss and lower net unrealized appreciation of investments relative to the prior year. The largest driver of the net unrealized appreciation of investments in the prior year was the reversal of unrealized depreciation of \$14.0 million related to the sale of certain assets on a then non-accrual portfolio company. The largest driver of the net realized loss in the current year was due to the sale of a non-accrual portfolio company during the current year for a realized loss of \$10.8 million.

Subsequent Events: Subsequent to September 30, 2014, the following significant events occurred:

- **Portfolio Activity:** Invested \$4.0 million in a follow-on investment in Vitera Healthcare Solutions, LLC. Additionally, we received an aggregate of \$2.6 million in scheduled and unscheduled principal repayments from existing portfolio companies, which included the early payoff of \$2.5 million in debt and equity investments at cost from North

American Aircraft Services, LLC. This early payoff resulted in a realized gain of \$1.6 million and success fees of \$0.6 million, resulting in an IRR of 18.0%.

- **Distributions Declared:** Declared the following monthly cash distributions to stockholders on October 7, 2014:

<u>Record Date</u>	<u>Payment Date</u>	<u>Distribution per Common Share</u>	<u>Distribution per Series 2021 Term Preferred Share</u>
October 22	October 31	\$ 0.07	\$ 0.140625
November 17	November 26	0.07	0.140625
December 19	December 31	0.07	0.140625
Total for the Quarter		\$ 0.21	\$ 0.421875
