Atlas Energy Intelligence Report Ranks Ameresco as ESCO Market Leader by Revenue for 2020-2022

Ameresco ranked ahead of category competitors with nearly 17% of total ESCO market share

FRAMINGHAM, Mass.--(BUSINESS WIRE)-- Atlas Energy Intelligence recently ranked Ameresco, Inc. (NYSE: AMRC), a leading cleantech integrator specializing in energy efficiency and renewable energy, as the U.S. energy service company (ESCO) market leader by revenue for 2020-2022, according to its June 2021 report, "[The North American Energy Service Company \(ESCO\) Market](#)."

Source: Atlas Energy Intelligence Report: "The North American Energy Service Company (ESCO) Market"

Currently, the U.S. ESCO market is dominated by ten major organizations

that collectively represent 70% of the industry. Ameresco leads the pack with an estimated 16.9% share of the market by revenue.

The [report](#) offers a comprehensive overview of the U.S. and Canadian ESCO markets and provides clarity on the opportunities afforded to market participants by the energy transition. As government agencies face increasing pressure to take definitive action on climate change and innovate economic rebuilding efforts in the wake of the Covid-19 pandemic, ESCOs are poised to play an integral role in developing clean energy and diversifying offered energy solutions.

"When I started this company over 20 years ago, the importance of sustainability was not a topic that other businesses and the greater public were openly focused on," said Ameresco CEO and Founder George Sakellaris. "Finally, we've reached a point where those conversations are no longer just conversations. They're innovative, tangible projects that are actively transforming the way we view our world and are gaining us recognition by esteemed organizations like Atlas Energy Intelligence. We are honored to be included in such a notable ranking and cannot wait to continue this upward trajectory."

According to Atlas Energy Intelligence, the North American ESCO market will increase from \$4.9B in 2021 to \$6.5B in 2027 at a compound annual growth rate of 4.8% across all customer sectors. Organizations are drawn to ESCOs for their ability to help businesses achieve lower energy costs, reduce carbon emissions and boost resiliency.

"ESCOs today are called upon to go beyond energy efficiency and offer innovative

distributed energy solutions that help customers address priorities such as decarbonization, resiliency, and others,” said Eric Bloom, managing director at Atlas Energy Intelligence. “In recent years, Ameresco has emerged as a market leader in the U.S. federal sector, and the company’s development of a broadened solutions portfolio has positioned them well for continued growth.”
