

Motus GI to Participate in the New York Society for Gastrointestinal Endoscopy 43rd Annual New York Course

- *Hands-On Training on the Pure-Vu[®] System During Advanced Course Session*
- *Symposium on Inadequate Bowel Preparation: New Solutions to an Old Problem*
- *In-Booth Live Demonstrations of the Pure-Vu System*

FORT LAUDERDALE, Fla.--(BUSINESS WIRE)-- [Motus GI Holdings, Inc.](#), (NASDAQ: MOTS) ("Motus GI" or the "Company"), a medical technology company providing endoscopy solutions that improve clinical outcomes and enhance the cost-efficiency associated with the diagnosis and management of gastrointestinal conditions, announced today it will participate in the New York Society for Gastrointestinal Endoscopy (NYSGE) 43rd Annual New York Course, and pre-conference activities at the New York Marriott Marquis Hotel from December 18 – 20, 2019.

Motus GI's activities at NYSGE will include a hands-on training, sponsorship of a lunch symposium on addressing inadequate bowel preparation and in-booth live demonstrations of the Pure-Vu System. The Pure-Vu System is a U.S. FDA cleared medical device indicated to help facilitate the cleaning of a poorly prepared colon during the colonoscopy procedure.

Tim Moran, chief executive officer of Motus GI, commented, "The rate of insufficient bowel preparation for colonoscopies remains high despite the current standard of care. This leads to frequently rescheduled procedures and longer hospital stays, adding costs to both the patient and hospital. We look forward to demonstrating how the Pure-Vu System can fit into the colonoscopy procedural workflow to quickly, safely and effectively cleanse a patient's colon. This allows a physician to perform a quality examination even when the patient does not or is not able to complete a successful bowel prep on his or her own."

Additional details can be found below.

Date/Time: December 19 – 20, 2019 from 9:45 AM – 4:00 PM ET

Presenter: Motus GI Staff

Location: Westside Ballroom 3&4, Booth# 300

About Motus GI and the Pure-Vu® System

Motus GI Holdings, Inc. is a medical technology company, with subsidiaries in the U.S. and Israel, providing endoscopy solutions that improve clinical outcomes and enhance the cost-efficiency associated with the diagnosis and management of gastrointestinal conditions. The Company's flagship product is the Pure-Vu® System, a U.S. FDA cleared medical device indicated to help facilitate the cleaning of a poorly prepared colon during the colonoscopy procedure. The device integrates with standard and slim colonoscopes to enable safe and rapid cleansing during the procedure while preserving established procedural workflow and techniques. Challenges with bowel preparation for inpatient colonoscopy represent a significant area of unmet need that directly affects clinical outcomes and increases the cost of care in a market segment that comprises approximately 1.5 million annual procedures in the U.S. and approximately 4 million annual procedures worldwide. Motus GI believes the Pure-Vu® System may improve outcomes and lower costs for hospitals by reducing the time to successful colonoscopy, minimizing delayed and incomplete procedures, and improving the quality of an exam. In clinical studies to date, the Pure-Vu® System significantly increased the number of patients with an adequate cleansing level, according to the Boston Bowel Preparation Scale Score, a validated assessment instrument.
