Airgain Announces AirgainConnect™ Fleet: an Innovative Roof-Mounted 5G Vehicle Gateway

All-in-one device integrates 5G modem and Wi-Fi router, providing performance, ruggedness, and ease of use in a stealth form factor

SAN DIEGO--(BUSINESS WIRE)-- [Airgain, Inc. \(NASDAQ: AIRG\)](#), a leading provider of wireless connectivity solutions that creates and delivers embedded components, external antennas, and integrated systems across the globe, today announced the launch of AirgainConnect™ Fleet, its second generation AirgainConnect™ device, at the Consumer Electronics Show in Las Vegas, Nevada. AirgainConnect Fleet will be the industry's first low profile, roof-mounted 5G vehicle gateway, combining the latest 5G NR modem and a Wi-Fi 6 router all in one covert form factor. At only two inches tall, this low-profile 5G gateway provides flexibility across multiple vertical markets, offering wide area cellular and local area Wi-Fi connectivity across public safety, transportation, public, and private vehicle fleets.

AirgainConnect Fleet, also known as AC-Fleet™, is the evolution of Airgain's flagship vehicle connectivity line. AC-Fleet not only offers significant innovation in wireless systems design to achieve its performance and compact size, but also uses eSIM technology to enable carrier flexibility and multi-carrier connectivity. It is designed for rugged outdoor environmental use, with its completely sealed enclosure and IP67 and IP69K rating. Furthermore, AC-Fleet is easy to install, with fewer cables to run and simple setup, configuration, and maintenance due to its streamlined software and remote cloud management.

"The need for 5G connectivity in commercial and public fleets continue to grow exponentially. This trend presents a significant opportunity for Airgain to solve unique challenges in this space," said Patrick Hibbs, Senior Director Product Line Management at Airgain. "We designed AirgainConnect Fleet from the ground up to be the ideal combination of compact size, high performance, ease-of-use, and lower cost. The all-in-one nature of AC-Fleet makes it the optimal device for rapid deployment across multiple different fleet applications, including first responder, public agencies, utility companies, public transportation, commercial and private fleet vehicles, and recreational vehicles (RVs). This truly delivers on our company mission to simplify wireless connectivity."

"AirgainConnect™ Fleet is another innovative 5G connectivity product in our mission to improve the customer experience," said Dr. Ali Sadri, Chief Technology Officer at Airgain. "Over the past year, we announced several 5G connectivity products including our Lighthouse™ smart Network Controlled Repeater (NCR), Lighthouse™ Micro Smart Repeater, Lantern™ outdoor Fixed Wireless Access device, Lodestar™ Network Antennas, and the latest, AirgainConnect™ Fleet. This wide range of new products brings differentiated, high-performance 5G capabilities to the market. We are excited to announce

availability of the AC-Fleet during the Consumer Electronics Show and expect to start shipping in volume this summer. Come visit us in booth #10562 to see it in person.”

About Airgain, Inc.

Airgain simplifies wireless connectivity across a diverse set of devices and markets, from solving complex connectivity issues to speeding time to market to enhancing wireless signals. Our products are offered in three distinct sub-brands: Airgain Embedded, Airgain Integrated and Airgain Antenna+. Our mission is to connect the world by making wireless simple. Airgain's expertise in custom cellular and antenna system design pairs with our focus on high-growth technologies and our dedication to simplify the growing complexity of wireless. With a broad portfolio of products across the value chain, from embedded components to fully integrated products, we are equipped to solve critical connectivity needs in both the design process and the operating environment across the enterprise, automotive, and consumer markets. Airgain is headquartered in San Diego, California. For more information, visit airgain.com, or follow Airgain on [LinkedIn](#) and [Twitter](#).
