

Management Presentation

Reliable power when and where you need it. Clean and simple.

Safe Harbor Statement

This presentation contains "forward-looking statements" regarding future events or financial performance of the Company, within the meaning of the Safe Harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements relate to, among other things, benefits from our cost reduction initiatives, improved operating leverage and organizational efficiency, strengthened distribution channels, new product development and the success of our Signature Series product, benefits and competitive advantage associated with our product, compliance with government regulations, increased sales in Russia, implementation of the Capstone Energy Finance business, growth of our aftermarket service business, growth and diversification of our end markets, increase in revenue and performance in light of macroeconomic headwinds, and attaining profitability. Forward-looking statements may be identified by words such as "believe," "expect," "objective," "intend," "targeted," "plan" and similar phrases.

These forward-looking statements are subject to numerous assumptions, risks and uncertainties described in Capstone's Form 10-K, Form 10-Q and other recent filings with the Securities and Exchange Commission that may cause Capstone's actual results to be materially different from any future results expressed or implied in such statements. Because of the risks and uncertainties, Capstone cautions you not to place undue reliance on these statements, which speak only as of today. We undertake no obligation, and specifically disclaim any obligation, to release any revision to any forward-looking statements to reflect events or circumstances after the date of this conference call or to reflect the occurrence of unanticipated events.

Distributed Generation Megatrend

Driven by attractive economics and resiliency, power users are increasingly searching for ways to reduce their dependence on grid power. Capstone is able to solve this problem by providing a highly reliable and efficient power source to solve power demand issues for users across numerous industries.

What is a Microturbine?

Air Foil

	EFFICIENCY		
CHP/TYPE	ELECTRIC	TOTAL	
Hot Water	33.0%	85.0%	
Steam	33.0%	60.0-95.0%	
Chilled Water	33.0%	85.0%	

Competitive Advantages

Features	
-----------------	--

Benefits

*	Inverter based with one moving part	Factory guaranteed low operating costs
	Patented air bearing technology	No lubricants or coolants needed - unmanned projects
<	Stand alone or grid connect	Supports aging utility infrastructure
	Fuel availability	Operates on gaseous, renewable and liquid fuels
心	High power density	Compact footprint, small modular design
111	Low emissions	No exhaust aftertreatment
	Free clean waste heat	Thermal energy for cogeneration/trigeneration
?	Remote monitoring	View performance and diagnostics 24/7
	Scalable to match demand	Multiple applications and industries

Capstone Strategic Plan

Three-Pronged Capstone Business Profitability Plan

Reduce Breakeven from \$160M at \$25% GM to \$100M at 25% GM

Action: Reduce business expenses 35% from Q1 FY2016 levels.

Result: Achieved 38% reduction in operating expenses in Q3 from the same period last year. Dropped from \$9.9M to \$6.1M - which is a 14 year low.

Status: GOAL ACHIEVED

Comments: Management plans to focus on continued cost reductions.

Develop New CHP Focused Products & Accelerate Aftermarket Business

Action: Launch new product focused on Energy Efficiency Markets. Drive FPP and Warranty revenue growth.

Result: Launched new Signature Series product in December 2015 and new FPP and Extended Warranty products.

Status: GOAL ACHIEVED

Comments: New Signature Series is performing well in the field. FPP Contract Backlog has grown 19% over the last 12 months to \$77.2M at Q3FY17.

Finance Solutions to Capture
Orders that were Lost from
Lack of Capital

Action: Develop a 30% JV with a high net worth individual to provide PPAs to customers who have lack of capital.

Result: Launched Capstone Energy Finance JV in November 2015 and developed \$40M in highly qualified projects.

Status: IN PROCESS

Comments: Added Sky Solar for additional capital beyond first \$10M. Initial PPAs anticipated in the coming quarters.

Previous, New and Future Quarterly Business Models

Capstone Product Development Roadmap

Capstone Energy Finance

A distribution of the second s

- CEF offers PPA agreements
 exclusively for projects that utilize
 Capstone's proven microturbine
 technology to deliver low-cost, clean
 and reliable energy to a customer's
 site or facility.
- Near-term goal is to leverage up to \$10M in third party equity with reasonably priced debt with "blue chip" U.S. customers.

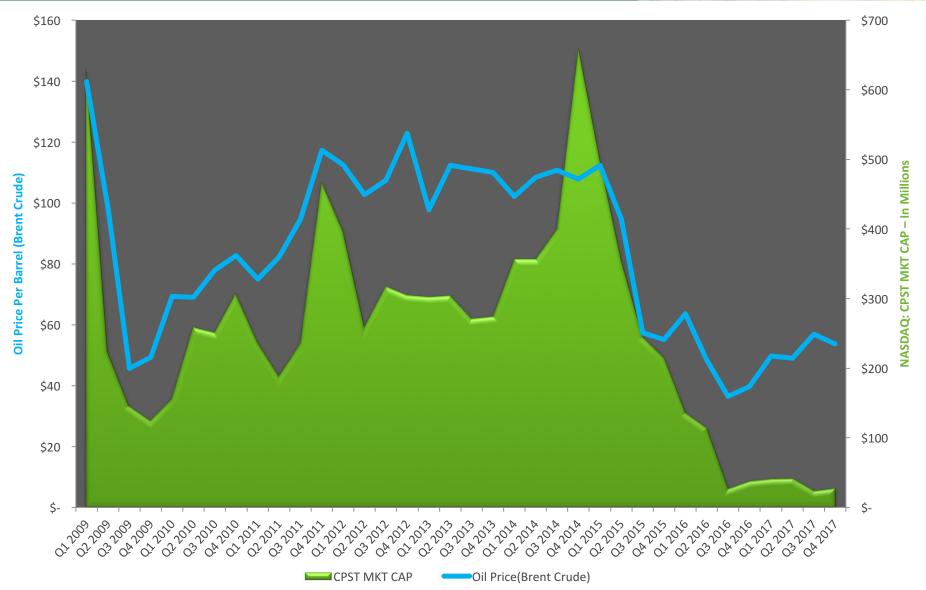

- Signed agreement with Sky Capital (subsidiary of Sky Solar Group) to provide up to \$150M in project financing.
- Distributors lost approximately \$42M in FY16 and over \$50M in FY15 due to lack of financing options.
