

The Management's Discussion and Analysis ("MD&A") for Mount Logan Capital Inc. (the "Company," "we," "us," or "our") is provided to enable readers to assess our financial condition and results of operations as at and for the three and nine months ended September 30, 2021, compared to the corresponding period in the prior fiscal year. This MD&A should be read in conjunction with our consolidated interim financial statements for the three and nine months ended September 30, 2021 and the accompanying notes thereto as well as our audited annual consolidated financial statements for the year ended December 31, 2020 and the accompanying notes thereto and the annual MD&A for the year ended December 31, 2020. This MD&A is dated November 9, 2021.

Unless otherwise indicated, all amounts are in thousands of United States dollars ("USD"), except for securities and per share data, and are based on financial statements prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

Additional information about the Company, including our audited annual consolidated financial statements and our annual information form for the year ended December 31, 2020 (the "Annual Information Form") are available on SEDAR at www.sedar.com.

NON-IFRS MEASURES AND FORWARD-LOOKING STATEMENTS

The Company has included herein certain supplemental measures of key performance, such as net asset value ("NAV") per share. We utilize NAV per share in managing our business, including performance measurement. We believe that providing this performance measure on a supplemental basis is helpful to investors in assessing the overall performance of the Company's business. However, this measure is not recognized under IFRS. The definition and calculation of the non-IFRS measure used in this MD&A is provided in Section 7.

Certain information contained in this MD&A constitutes forward-looking information, which is information regarding possible events, conditions or results of operations of the Company that is based upon assumptions about future economic conditions and courses of action and which is inherently uncertain. All information other than statements of historical fact may be forward-looking information. Forward-looking information is often, but not always, identified by the use of words such as "seek", "anticipate", "budget", "plan", "continue", "estimate", "expect", "forecast", "may", "will", "might", "project", "predict", "potential", "target", "intend", "would", "could", "should", "believe" and similar words or phrases (including negative variations) suggesting future outcomes or statements regarding an outlook. Forward-looking information contained in this MD&A includes, without limitation, statements and information about the receipt by the Company of proceeds from the sale by Cline (as defined below) to Allegiance (as defined below) of all the shares of NECC (as defined below), the timing thereof and the distribution of any proceeds to the holders of CVRs (as defined below); SCIM (as defined below) remaining the investment adviser of CIF (as defined below) following each one year renewal period following its initial two-year term and that the Company will continue to receive the net economic benefit derived by SCIM under the CIF Advisory Agreement (as defined below); ML Management (as defined below) remaining the collateral manager of the CLOs (as defined below) and the investment manager of Logan Ridge (as defined below); the Company's plans to extend the maturity of its CLOs in light of expiring reinvestment periods or launch new collateralized loan obligations to create new incomes streams; the Company's plans to reposition Logan Ridge's portfolio and the Company's expectations for higher portfolio income as a result thereof; the Company's plans to scale the business of Logan Ridge through strategic acquisitions; the expected benefits to the Company of the acquisition of Ability Insurance Company ("Ability") including, without limitation, a significant increase in the Company's assets under management, the generation of recurring management fees and increased income through insurance earnings as the Company transitions to a hybrid asset management business and insurance solutions model; the Company's minority investment in CPCP (as defined below) will further expand the Company's reach in the Canadian private debt market; the phaseout of LIBOR (as defined below) and the timing thereof; our expansion from a lending-oriented credit platform to an alternative asset management company and insurance solutions provider and the related asset management fee income; our expectations regarding anticipated investment activities and results, financing activities, the sufficiency of taxable income to support deferred tax assets and other factors that may impact our operating results, and the performance of global capital markets and interest rates.

Forward-looking information involves known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking information. Readers are cautioned not to place undue reliance on the forward-looking information contained in this MD&A, as a number of factors – many of which are beyond our control and the effects of which are difficult to predict – could cause actual future results, conditions, actions or events to differ materially from the targets, expectations, estimates or intentions expressed in the forward-looking information. Some of the risks and other factors that could cause results to differ materially from those expressed in the forward-looking information contained in this MD&A include, but are not limited to: risks relating to investment performance and our ability to generate taxable income from operations, market fluctuations, the strength of the Canadian, U.S. and other economies, foreign exchange fluctuations, political and economic conditions in the countries in which the interests of the Company's portfolio investments are located, the continued impact of the novel coronavirus including the progression of the virus, the emergence of variants and the timing of the manufacture and distribution of vaccines, that the CIF Advisory Agreement is subject to approval every year following its initial two-year term by the CIF's board of trustees, including a majority of its independent trustees, and such approvals may not be obtained, the risk that collateral management agreements in respect of the CLOs may be terminated at the direction of holders of a specified supermajority in principal amount of the notes issued by the CLO, the risk that the assets held by the CLOs are prepaid or go into default resulting in a reduction in collateral management fees, the investment advisory agreement in respect of Logan Ridge is subject to approval every year following its initial two-year term by Logan Ridge's board of directors, including a majority of its independent directors, and such approvals may not be obtained, the Company may not be able to identify and complete strategic acquisitions through

Logan Ridge in order to scale the business, the management of assets of Ability may not generate recurring management fees for ML Management as currently contemplated and the Company may not achieve sufficient income through insurance earnings to provide meaningful diversification having regard to the Company's business model, the business and future activities of CPCP may not result in a significant benefit to the Company and other risks included elsewhere in this MD&A under the heading "Risks Factors" and in the Annual Information Form and other public disclosure documents filed with certain Canadian securities regulatory authorities and available under the Company's profile at www.sedar.com. Should one or more of these risks or uncertainties materialize, or should assumptions underlying the forward-looking information prove to be incorrect, actual results may vary materially from those described in this MD&A as anticipated, believed, estimated or expected.

Readers are cautioned that the foregoing lists of factors are not exhaustive. Although the Company has attempted to identify important factors that could cause actual events and results to differ materially from those described in the forward-looking information, there may be other factors that cause events or results to differ from those intended, anticipated or estimated. The forward-looking information contained in this MD&A is provided as of the date hereof and the Company undertakes no obligation to update publicly or revise any forward-looking information, whether as a result of new information, future events or otherwise, except as otherwise required by law. All of the forward-looking information contained in this MD&A is expressly qualified by this cautionary statement.

1. NATURE OF BUSINESS

1.1 Overview

The common shares of the Company trade on the Neo Exchange Inc. (the "NEO Exchange") under the symbol "MLC".

Loans

The Company is an alternative asset management company that is focused on investing in public and private debt securities in the North American market. The Company seeks to source and actively manage loans and other debt-like securities with credit-oriented characteristics. The Company actively sources, evaluates, underwrites, monitors, and primarily invests in loans, debt securities, and other credit-oriented instruments that present attractive risk-adjusted returns and present low risk of principal impairment through the credit cycle.

The Company applies rigorous and deep due diligence to the credit opportunities it assesses. Priorities include: establishing downside protection and principal preservation through financial and structural protections; seeking to generate attractive returns utilizing the skill and experience of management; and leveraging the expertise and network of management.

The origination, negotiation and documentation of highly structured investments by management of the Company permits the construction of a diversified portfolio of investments through the use of flexible and innovative loan strategies.

While focused on senior secured middle-market credit, depending on market conditions, the Company may evaluate employing a variety of credit investing strategies as part of its investment program. These could include: leveraged yield strategies; private and mezzanine lending and structured equity; dislocated structured credit/regulatory capital investments; and other credit-oriented investments as further discussed below:

Leveraged Yield Strategies

- *Low leveraged bank loan funds*: employing various strategies to invest in primarily secured bank loans with low loan-to-value ("LTV") metrics and selective and prudent financing at the asset level. This is a strategy typically employed during periods of market or sector dislocation or when an individual company's loans do not reflect true fundamental value.
- *Synthetic baskets*: investments in par or near-par performing bank loans via total return swaps or similar financing structures.

Private and Mezzanine Lending and Structured Equity

- *Private and mezzanine lending*: providing creative financing solutions to borrowers with custom documentation. Borrowers in the middle-market seek resourceful financing partners that have industry expertise, can provide certainty of execution, and can transact on an expedited timeline.
- *Structured Equity*: investing in minority structured convertible preferred equity with significant downside protection through company selection and robust negative controls.

Dislocated Structured Credit/Regulatory Capital

- *Primary and secondary structured products*: opportunistic investments in non-traditional credit instruments with varying counterparty credit risk.
- *Regulatory capital relief*: structured financing solutions to mitigate regulatory capital constraints for borrowers. Rising regulatory capital requirements for financial institutions create an opportunity for non-traditional capital providers to structure capital solution programs aimed at mitigating banks' risk of near-term capital losses in return for insurance-like payments on first loss pieces assumed by financial investors.

Investments are made and are expected to be made primarily in developed markets with a focus on North America although the Company may invest in markets outside of North America if the Company identifies investment opportunities that offer particular value.

Advisory

During 2020 and into 2021, the Company continued expansion of its focus from a lending-oriented credit platform to an alternative asset management platform and, through its subsidiaries, acquired certain investment management contracts and/or the economic benefit thereof in order to grow a stream of asset management fee income for the Company.

On August 21, 2020, the Company, through its wholly-owned subsidiary, Mount Logan Management LLC ("ML Management") entered into an asset purchase agreement with Garrison Investment Management LLC and other sellers (collectively, "GARS Sellers") with respect to the acquisition by ML Management of the rights of the GARS Sellers under certain investment management agreements, the general partnership interests of the GARS Sellers under certain partnership agreements and the rights of the GARS Sellers under certain collateral management agreements relating to Garrison Funding 2018-1 LP and Garrison MML CLO 2019-1 LP (collectively, the "CLOs") for a purchase price of \$3 million (the "CLO Acquisition"). On closing of the CLO Acquisition on November 12, 2020, ML Management became the investment manager of the CLOs and is entitled to receive management fees based upon aggregate gross assets under management, paid quarterly, and subject to various reductions based on caps, transaction fees, and fee-sharing arrangements. Following the completion of the CLO Acquisition, the names of Garrison Funding 2018-1 LP and Garrison MML CLO 2019-1 LP were changed to Mount Logan Funding 2018-1 LP and Mount Logan MML CLO 2019-1 LP, respectively.

On October 30, 2020, the Company entered into a services agreement (the "SCIM Services Agreement") with Sierra Crest Investment Management LLC ("SCIM") pursuant to which the Company will provide certain administrative services to SCIM in respect of the management of an interval fund ("CIF"). On December 17, 2020, the SCIM Services Agreement was amended to be between the Company's wholly-owned subsidiary, MLC US Holdings LLC, and SCIM. Under the SCIM Services Agreement, in exchange for the administrative services, SCIM will pay to the Company, on a quarterly basis, an amount equal to the aggregate base management and incentive fees received by SCIM from CIF in respect of such quarter, net of debt service, a quarterly fee to be retained by SCIM comprised of a specified amount, plus an allocable portion of the compensation of SCIM's investment professionals in connection with their performance of investment advisory services for CIF (collectively, the "Retained Benefits"). In addition, SCIM will be reimbursed by the Company quarterly for certain expenses it incurs in connection with the investment advisory services provided to CIF. Pursuant to this arrangement, the Company will receive the net economic benefit derived by SCIM under the CIF advisory agreement (the "CIF Advisory Agreement"), subject to the holdback of the Retained Benefits and expense reimbursements.

On April 20, 2021, the Company, through ML Management, entered into an Asset Purchase Agreement with Capitala Investment Advisors, LLC ("CIA") with respect to the acquisition by ML Management of certain assets from CIA and whereby ML Management will become the investment adviser of Capitala Finance Corp. ("Capitala"), a U.S. publicly traded business development company whose common stock is listed on NASDAQ (the "Capitala Acquisition"). ML Management, as the investment adviser of Capitala, receives a fee for investment advisory and management services consisting of two components – a 1.75% annual base management fee based upon gross assets and an incentive tied to performance. The Capitala Acquisition closed on July 1, 2021 and Capitala changed its name to Logan Ridge Finance Corporation ("Logan Ridge").

The following is a list of the investment vehicles managed by the Company and its subsidiaries:

- Mount Logan Middle Market Funding LP
- Mount Logan Middle Market Funding A LP
- Mount Logan Middle Market Funding II LP
- Mount Logan Middle Market Funding II A LP
- Mount Logan Funding 2018-1 LP
- Mount Logan MML CLO 2019-1 LP
- Logan Ridge Finance Corporation

1.2 Investment restrictions

The Company conducts its activities within the general parameters of its investment objective and strategy but subject to certain specific restrictions. In pursuing its investment strategy, the Company generally aims to adhere to the following investment restrictions:

- *Diversification* – the net amount invested by the Company in the investments of any one issuer (on a look through basis) will not exceed 20% of the portfolio of the Company, as determined at the time of such investment other than securities issued or guaranteed by the government of Canada, the government of the United States or a province, state or territory thereof.
- *Foreign exposure* – the net amount invested by the Company in securities outside of Canada and the United States will not exceed 50% of the net asset value of the Company, as determined at the time of such investment.
- *Liquidity* – the nature of the Company's business allows for investments in public and private securities, and there are no specific restrictions on the liquidity of the assets in which the Company may invest. However, management will ensure that the Company's investment portfolio has sufficient liquidity to satisfy any borrowing obligations, to manage the dividend policy, if any, adopted by the board of directors (the "Board") of the Company from time to time and any share buy-back arrangements.
- *Hedging* – the Company may use derivatives to hedge credit risk, its exposure to changes in interest rates and currency fluctuations and to gain exposure to individual securities and markets instead of directly buying the securities. The Company may use treasury futures and/or government bonds to hedge against changes in interest rates and may use credit default swaps and credit default indices to hedge credit risk.

1.3 Recent developments

On July 1, 2021, the Company, through ML Management, completed the Capitala Acquisition whereby ML Management became the investment advisor of Capitala.

On July 12, 2021, the Company acquired a minority stake in Crown Private Credit Partners Inc. ("CPCP"), a Canadian alternative corporate financing business that was partially divested from Crown Capital Partners Inc. ("CCPI"). CPCP will serve as a strategic partner for the Company to expand the Company's reach in the Canadian private credit market.

On July 20, 2021, the Company completed a non-brokered private placement and issued 2,165,000 common shares of the Company at a purchase price of CAD\$3.20 per share for gross proceeds of CAD\$6.9 million.

On August 12, 2021, our board of directors (the "Board") declared a cash dividend in the amount of CAD\$0.02 per common share which was paid on September 24, 2021 to shareholders of record as of August 24, 2021.

On August 20, 2021, the Company, through MLC US Holdings LLC ("MLC US Holdings"), a wholly-owned subsidiary of the Company, entered into a credit facility with a large US-based asset manager, as administrative agent and collateral agent for the lenders, whereby MLC US Holdings may borrow up to \$25.0 million by December 31, 2021 (the "MLC US Holdings Credit Facility"). The MLC US Holdings Credit Facility matures on August 20, 2027. Amounts drawn under the MLC US Holdings Credit Facility will bear interest at LIBOR plus a spread of 7.50%. A commitment fee of 0.50% per annum is charged on undrawn amounts. Payment of principal and interest are made on each payment date in March, June, September and December, with the remaining principal outstanding and accrued but unpaid interest payable on August 20, 2027. The MLC US Holdings Credit Facility is collateralized by assets held by MLC US Holdings. MLC is a guarantor of the MLC US Holdings Credit Facility. As at September 30, 2021, the outstanding balance on the MLC US Holdings Credit Facility was \$16.5 million.

Also on August 20, 2021, MLCSC Holdings Finance LLC, a wholly-owned indirect subsidiary of the Company, repaid in full its outstanding credit facility and the facility was terminated.

On October 29, 2021, the Company completed its previously announced acquisition of 100% of the equity of Ability Insurance Company ("Ability") for a purchase price of \$20.0 million, comprised of the issuance of an unsecured promissory note in the amount of \$15.0 million and an aggregate of 1,579,671 common shares of the Company having an aggregate value of \$5.0 million. ML Management has now been engaged as an investment adviser for a meaningful portion of Ability's assets, increasing ML Management's assets under management.

On October 29, 2021, the Company issued an aggregate of 1,258,931 common shares of the Company having an aggregate value of \$4.0 million and paid \$1.0 million in cash to CIA as part of the deferred purchase price payable by the Company pursuant to the Capitala Acquisition.

On November 9, 2021, the Board declared a cash dividend in the amount of CAD\$0.02 per common share to be paid on December 23, 2021 to shareholders of record as of November 22, 2021.

1.4 Outlook

The Canadian, U.S., and global capital markets have in the past and may in the future experience periods of volatility and disruption during economic downturns and recessions. While, until recently, credit markets and the U.S. economy have experienced relative stability since the global financial crisis from 2007-2009, there can be no assurance that market conditions will normalize or improve in the near future.

The outbreak of the novel coronavirus, or COVID-19, in many countries continues to adversely impact global commercial activity and has contributed to significant volatility in financial markets. The global impact of the outbreak has been rapidly evolving, and many countries have reacted by instituting or reinstating quarantines, restrictions on travel and other measures to mitigate the impact of this pandemic. While many of these measures have been relaxed in certain jurisdictions, spread of the virus continues and restrictions generally remain in place. Such actions have created disruption in global supply chains, and have adversely impacted a number of industries, including, among others, transportation, hospitality and entertainment. The outbreak has triggered a period of global economic slowdown and continued volatility and could have a continued impact on economic and market conditions, even after restrictive measures were relaxed or removed. The rapid development and continued fluidity of this situation precludes any prediction as to the duration and extent of this pandemic and its impact on the Company's business, financial condition and results of operations, as well as the business, financial condition and results of operations of the Company's portfolio companies. Nevertheless, the novel coronavirus presents material uncertainty and risk with respect to our and our portfolio companies' performance and financial results, including following the relaxation or removal of restrictive measures. The Company continues to actively monitor developments with respect to this pandemic and its impact as part of the Company's overall investment objective and strategy.

Each company in the Company's investment portfolio has from time to time faced different pressures as a result of the COVID-19 pandemic. Some portfolio companies have been affected more severely than others, while some have even benefitted from the impact of COVID-19. In respect of portfolio companies that have been negatively impacted by COVID-19, certain adverse consequences experienced have included declines in demand for products and/or services, increased costs, disruptions to supply chains, and interruptions to operations thus necessitating certain cost-cutting measures including, but not limited to, permanent

layoffs, temporary reductions in force, curtailed operations, renegotiation of supply contracts, and reduced discretionary spending and capital expenditures. In addition, a number of portfolio companies have evaluated or participated in government programs for financing or tax breaks in order to supplement reduced cash flow. Furthermore, in order to adapt, a number of portfolio companies have: (i) adjusted their internal business operations to permit more effective remote work; (ii) shifted their sales to new channels amid disruptions in distribution; and/or (iii) altered their products or services to adapt to new customer needs in light of COVID-19. The adverse impacts of the COVID-19 pandemic on the Company's portfolio companies have the potential to affect the Company's operations, including a higher risk of defaults which could lead to lower cash flow and increased credit risk of borrowers, potentially ultimately leading to declines in the fair value of the Company's investment portfolio. In order to remain informed of potential negative impacts, the Company remains in contact with its underlying borrowers and receives information (such as near term cash flow forecasts to gauge liquidity) to understand the outlook and potential risks affecting the borrowers. As an asset manager and a lender to its portfolio companies holding a portion of debt, the Company generally has access to certain operational information concerning its portfolio companies customary for asset managers and lenders, but the Company is not actively involved in the operations of its portfolio companies. As such, the Company's understanding and assessments of the risks, trends and uncertainties facing its portfolio companies are based on the information available to the Company as a lender, which could be limited in certain circumstances. The Company seeks to actively monitor its investment portfolio and have regular communications with its portfolio companies to continuously update, re-assess and mitigate these risks, trends and uncertainties. Furthermore, from a risk mitigation perspective, the Company aims to maintain a portfolio that is diversified by industry. As of September 30, 2021, the Company's portfolio based on fair market value, excluding the Company's investment in Cline Mining Corporation ("Cline"), had the following exposures to each industry: 31.7% financials, 19.5% information technology, 17.1% consumer, 9.0% health care, 5.1% industrials and 17.6% other. Excluding Cline, the Company does not have direct exposure to sectors such as automotive, energy, metals and mining, hotel, casinos and leisure, advertising, restaurants, and cruise lines.

The foregoing adverse impacts of the COVID-19 pandemic could continue even as certain jurisdictions begin or continue the process of permitting the reopening of businesses and other organizations and easing restrictions on social interactions. The overall impact of the COVID-19 pandemic remains uncertain and depends on, among other things, the progression of the virus, the emergence of variants, the timing of the manufacture and distribution of vaccines and the level of public acceptance thereof and that the actions taken by governments in different jurisdictions vary. Given the continuing development of the COVID-19 pandemic and the uncertainty surrounding its long-term impact, it is not possible to say with certainty whether the foregoing trends and uncertainties will continue. However, as of the date hereof, there have not been any payment defaults in the Company's investment portfolio. All borrowers remain current on their interest payments and the Company remains in frequent contact with its borrowers and loan agents regarding the ongoing performance of borrowers and any potential business disruptions.

Depending on the duration of the novel coronavirus pandemic and the extent of its impact on our portfolio companies' operations and our net investment income, any future distributions to our shareholders may be for amounts less than our historical distributions, may be made less frequently than historical practices or may not be made at all.

Business Environment and Developments/Outlook

The Canadian and U.S. capital markets are experiencing a period of extreme volatility and disruption. In December 2019, a novel strain of coronavirus (i.e., COVID-19) surfaced in China and has since been detected in almost every country worldwide, COVID-19 has spread quickly and has been identified as a global pandemic by the World Health Organization. In response, governmental authorities imposed restrictions on travel and the temporary closure of many corporate offices, retail stores, restaurants and manufacturing facilities and factories in affected jurisdictions, including, beginning in March 2020, in Canada and the United States, and many restrictive measures continue to be in effect in varying forms. While we have been carefully monitoring the COVID-19 pandemic and its impact on our business and the business of our portfolio companies, we have continued to fund our existing debt commitments. In addition, we have continued to make, and expect to continue to make, investments in new loans.

We cannot predict the full impact of the COVID-19 pandemic, including its duration in Canada, the United States and worldwide and the magnitude of the economic impact of the outbreak, including with respect to the travel restrictions, business closures and other quarantine, stay-at-home orders and social distancing measures imposed on service providers and other individuals by various local, state, and federal governmental authorities, as well as non-Canadian and non-U.S. governmental authorities. As such, we are unable to predict the duration of any business and supply-chain disruptions, the extent to which the COVID-19 pandemic will negatively affect our portfolio companies' operating results or the impact that such disruptions may have on our results of operations and financial condition. Depending on the duration and extent of the disruption to the operations of our portfolio companies, we expect that certain portfolio companies will experience financial distress and possibly default on their financial obligations to us and their other capital providers. It is possible that some of our portfolio companies may significantly curtail business operations, furlough or lay off employees and terminate service providers, and defer capital expenditures if subjected to prolonged and severe financial distress, which would likely impair their business on a permanent basis. These developments would likely result in a decrease in the value of our investment in any such portfolio company.

The COVID-19 pandemic and the resulting economic dislocations have had adverse consequences for the business operations of some of our portfolio companies and have adversely affected, and threaten to continue to adversely affect, our operations. The operational and financial performance of the portfolio companies in which we make investments depends on future developments, including the duration and spread of the outbreak, potential treatments and therapies and the manufacture and distribution of vaccines, and such uncertainty may in turn impact our valuation of the portfolio companies. The COVID-19 pandemic and the related disruption and financial distress experienced by our portfolio companies may have material adverse effects on our

investment income, particularly our interest income received from our investments. In connection with the adverse effects of the COVID-19 pandemic, we may need to restructure our investments in some of our portfolio companies, which could result in reduced interest payments, an increase in the amount of PIK interest we receive, or result in permanent impairments on our investments.

We carry certain of our investments at fair value as determined in good faith by management and with input from independent third-party valuation firm(s), as necessary. Decreases in fair values of our investments are recorded as unrealized depreciation. Depending on market conditions, we could incur substantial losses in future periods, which could have a material adverse impact on our business, financial condition and results of operations.

During the last half of 2020 and through the third quarter of 2021, the Company experienced a partial recovery of fair value in certain of its investments which had decreased earlier in 2020 as a result of the impact of the COVID-19 pandemic. As of September 30, 2021, management approved the fair value of our investment portfolio in good faith in accordance with our valuation procedures, based on information available at the time. As a result of the uncertainty of the COVID-19 pandemic, the fair value of our portfolio investments may be further negatively impacted in future periods by circumstances and events that are not yet known.

Future outlook

During 2020 and into 2021, the Company continued expansion of its focus from a lending-oriented credit platform to an alternative asset management platform and, through its subsidiaries, acquired certain investment management contracts and/or the economic benefit thereof in order to grow a stream of asset management fee income for the Company.

On October 29, 2021, the Company completed its previously announced acquisition of Ability, a Nebraska domiciled insurer of long-term care policies. ML Management has now been engaged as an investment adviser for a meaningful portion of Ability's assets, increasing ML Management's assets under management and generating recurring management fees. With the acquisition of Ability, the Company will transition from a balance sheet oriented investment vehicle to a hybrid asset management business and insurance solutions model, further increasing the Company's income through insurance earnings.

The Company may consider extending the maturity date of managed CLOs as the reinvestment period expires or have expired, and/or opportunistically launch new CLOs, which would create new streams of management fee income.

2. FINANCIAL REVIEW

The following section should be read in conjunction with the Company's unaudited consolidated interim financial statements and accompanying notes for the nine months ended September 30, 2021.

2.1 Third quarter highlights

The Company reported interest income of \$795 in the third quarter of 2021, as compared to \$763 in the same period in 2020, representing an increase of \$32. The Company also reported dividend income of \$15 in the third quarter of 2021, as compared to \$208 in the same period in 2020. The Company also reported management fee and other income of \$1,902 in the third quarter of 2021, as compared to \$nil in the same period in 2020. Total revenue was \$2,712 in the third quarter of 2021, as compared to \$971 in the same period in 2020, representing an increase of \$1,741.

Income (loss) and comprehensive income (loss) attributable to shareholders for the third quarter of 2021 was \$479 or \$0.03 per basic and diluted share, as compared to an income (loss) and comprehensive income (loss) of \$1,270 or \$0.12 per basic and diluted share in the same period in 2020. Net investment income (loss) decreased from \$95 in the third quarter of 2020 to \$(400) in the same period in 2021. Net realized and unrealized gain (loss) decreased from \$1,175 in the third quarter in 2020 to \$473 in the same period in 2021.

During the third quarter of 2021, the Company made nine new and one add-on loan investments with a total principal amount of \$23.6 million and two new equity investments of \$20 and made four full dispositions with a total principal amount of \$6.0 million. As at September 30, 2021, based on carrying value, our portfolio consisted of 77.9% first lien loans (including delayed draw term loans), 5.6% bonds and 16.5% equity investments. As at September 30, 2021, our weighted average contractual interest rate of the portfolio at par was 6.4%.

On August 12, 2021, the Board declared a cash dividend in the amount of CAD\$0.02 per common share which was paid on September 24, 2021 to shareholders of record as of August 24, 2021.

MANAGEMENT'S DISCUSSION AND ANALYSIS
for the three and nine months ended September 30, 2021

2.2 Income statement

	Three Months Ended		Nine Months Ended	
	September 30, 2021	September 30, 2020	September 30, 2021	September 30, 2020

Loss and comprehensive loss before income tax	73	1,270	35	(1,036)
Income tax recovery (expense)	406	—	509	—
Income (loss) and comprehensive income (loss)	\$ 479	\$ 1,270	\$ 544	\$ (1,036)

We generate revenue in the form of interest income on the debt securities that we own, dividend income on any equity that we own, and management fee income from investment management and related services. Our investments in debt securities will typically have loan maturities of three to ten years and bear interest at a fixed or floating rate.

The increase in interest income from investments for the nine months ended September 30, 2021 as compared to the corresponding period in 2020 was primarily due to an increase in the size of our investment portfolio. Dividend income relates to the Company's investment in BCP Great Lakes Holdings LP. Management fee and other income represents fees earned from investment management services provided, net of related expenses allocated to the Company, and the Company's share of profit or loss from investments in associates that are accounted for using the equity method. The Company classifies investments in entities over which it has significant influence, and that are neither subsidiaries nor joint ventures, as associates. Generally, the Company is considered to exert significant influence when it holds, directly or indirectly, between 20% and 50% of the voting power of the investee. The size of our portfolio increased from \$59.0 million at cost as at September 30, 2020 to \$73.4 million at cost as at September 30, 2021.

On July 27, 2017, the Financial Conduct Authority ("FCA") announced that it would phase out the London Interbank Offered Rate ("LIBOR") as a benchmark by the end of 2021. On November 30, 2020, Intercontinental Exchange, Inc. ("ICE") announced that the ICE Benchmark Administration Limited, a wholly-owned subsidiary of ICE and the administrator of LIBOR, is considering extending the LIBOR transition deadline to the end of June 2023. As an alternative to LIBOR, for example, the U.S. Federal Reserve, in conjunction with the Alternative Reference Rates Committee, a steering committee comprised of large U.S. financial institutions, is considering replacing U.S.-dollar LIBOR with the Secured Overnight Financing Rate ("SOFR"), a new index calculated by short-term repurchase agreements, backed by Treasury securities. Abandonment of or modifications to LIBOR could have adverse impacts on newly issued financial instruments and our existing financial instruments which reference LIBOR. Uncertainty as to the nature of alternative reference rates and as to potential changes or other reforms to LIBOR, or any changes announced with respect to such reforms, may result in a sudden or prolonged increase or decrease in the reported LIBOR rates and the value of LIBOR-based loans and securities, including those of other issuers we or our funds currently own or may in the future own. It remains uncertain how such changes would be implemented and the effects such changes would have on us, issuers of instruments in which we invest and financial markets generally.

The expected discontinuation of LIBOR could have a significant impact on our business. The dollar amount of our outstanding debt investments and borrowings that are linked to LIBOR with maturity dates after the anticipated discontinuation date of 2021 is material. We anticipate significant operational challenges for the transition away from LIBOR including, but not limited to, amending

existing loan agreements with borrowers on investments that may have not been modified with fallback language and adding effective fallback language to new agreements in the event that LIBOR is discontinued before maturity. Beyond these challenges, we anticipate there may be additional risks to our current processes and information systems that will need to be identified and evaluated by us. Due to the uncertainty of the replacement for LIBOR, the potential effect of any such event on our cost of capital and net investment income cannot yet be determined. In addition, any further changes or reforms to the determination or supervision of LIBOR may result in a sudden or prolonged increase or decrease in reported LIBOR, which could have an adverse impact on the market value for or value of any LIBOR-linked securities, loans, and other financial obligations or extensions of credit held by or due to us and could have a material adverse effect on our business, financial condition and results of operations.

On February 22, 2019, Great Lakes Senior MLC I LLC ("MLC I") entered into a facility and security agreement which provides for a revolving loan facility of up to \$50.0 million (the "MLC I Revolving Senior Loan Facility"). The MLC I Revolving Senior Loan Facility bears interest at LIBOR plus the applicable spread. On February 4, 2021, the MLC I Revolving Senior Loan Facility was terminated and repaid in full. On December 17, 2020, MLCSC Holdings Finance LLC ("MLCSC Holdings Finance"), an indirectly wholly-owned subsidiary of the Company, entered into a credit agreement providing a credit facility for \$5.3 million (the "MLCSC Credit Facility"), which bears interest at 9.5% per annum. On August 20, 2021, the MLCSC Credit Facility was terminated and repaid in full. On May 7, 2021, MLC I entered into a revolving credit and security agreement which provides for a revolving loan facility of up to \$60.0 million (the "MLC I Revolving Credit Facility"). The MLC I Revolving Credit Facility bears interest at LIBOR plus the applicable spread. On August 20, 2021, MLC US Holdings entered into a credit facility for up to \$25.0 million, which bears interest at LIBOR plus the applicable spread. The decrease in interest and credit facility expenses for the nine months ended September 30, 2021 as compared to the corresponding period in 2020 was primarily due to the decrease in LIBOR rates.

Transaction costs are related to costs incurred primarily for professional services, in connection with the Company's continued expansion to an alternative asset management platform. Intangible assets include payments made to purchase existing investment management contracts from third-party investment managers, which is amortized over the estimated useful lives of the contracts. Professional fees consists primarily of audit, tax, legal and consulting fees. The increase in professional fees is related to the Company's continued expansion to an alternative asset management platform.

For the nine months ended September 30, 2021, we had net realized gain on investments of \$315, primarily driven by seven investments.

For the nine months ended September 30, 2021, we had \$1.0 million unrealized gains on nine portfolio company investments, which was offset by \$1.0 million in unrealized losses on twelve portfolio company investments. Unrealized gains resulted from an increase in fair value, primarily due to tightening of credit spreads and positive credit-related adjustments. Unrealized losses primarily resulted from negative credit-related adjustments.

MANAGEMENT'S DISCUSSION AND ANALYSIS
for the three and nine months ended September 30, 2021

2.3 Balance sheet

The Company's investment portfolio, based on carrying value, as at September 30, 2021 consisted of 77.9% first lien loans (including delayed draw term loans), 5.6% bonds and 16.5% equity investments. We made twenty-seven new and two add-on investments with a total principal amount of \$48.3 million and four new and one add-on equity investments of \$4.6 million and made twelve full and one partial dispositions with a total principal amount of \$17.5 million during the nine months ended September 30, 2021. As at September 30, 2021, we had investments in eighteen portfolio companies with an aggregate carrying value of \$71.5 million.

Deferred tax assets, measured at the tax rates expected to apply, represents management's estimate of temporary differences that will be able to be realized. Deferred tax assets are recognized only when it is probable that sufficient taxable profit will be available in future periods against which deductible temporary differences may be utilized. As at September 30, 2021, based on the evidence available, including management projections of income, we believe that it is probable there will be sufficient taxable income generated by our business operations to support the deferred tax assets.

Intangible assets include fees incurred to secure investment management contracts and is amortized, for definite useful lives intangible assets, using the straight-line method based on the estimated useful lives between 3 to 6 years.

On February 22, 2019, MLC I entered into the MLC I Revolving Senior Loan Facility, which was amended on January 31, 2020 and further amended on July 31, 2020, of up to \$50.0 million with a large financial institution as initial lender, and such other additional institutions who from time to time are parties thereto. U.S. Bank N.A. serves as administrative agent, custodian, collateral agent and collateral administrator. The MLC I Revolving Senior Loan Facility is guaranteed by the Company. On February 4, 2021, the MLC I Revolving Senior Loan Facility was terminated and repaid in full. On December 17, 2020, MLCSC Finance Holdings entered into a credit agreement providing the MLCSC Credit Facility for \$5.3 million in connection with the acquisition of a minority interest in SCIM. The MLCSC Credit Facility is guaranteed by the Company. On August 20, 2021, the MLCSC Credit Facility was terminated and repaid in full. On May 7, 2021, MLC I entered into the MLC I Revolving Credit Facility that provides for a revolving loan facility of

up to \$60.0 million. The MLC I Revolving Credit Facility is guaranteed by ML Management. As at September 30, 2021, there was \$20.5 million of principal amount outstanding under the MLC I Revolving Credit Facility. On August 20, 2021, MLC US Holdings entered into a credit agreement providing the MLC US Holdings Credit Facility for up to \$25.0 million. The MLC US Holdings Credit Facility is collateralized by assets held by MLC US Holdings. MLC is a guarantor of the MLC US Holdings Credit Facility. As at September 30, 2021, there was \$16.5 million of principal outstanding under the MLC US Holdings Credit Facility.

As of September 30, 2021, there was \$0.5 million remaining payable for the acquisition of a minority interest in SCIM, which is inclusive of the amount payable by the Company for the acquisition of an additional equity stake in SCIM on June 8, 2021.

As of September 30, 2021, there was \$9.8 million remaining payable for the Capitala Acquisition, consisting of \$4.0 million seller note due on July 1, 2025, \$1.0 million in cash payable by October 31, 2021 and \$4.0 million in cash or MLC stock payable by October 31, 2021.

Due to affiliates includes amount reimbursable to BC Partners Advisors L.P. ("BC Partners") for operating expenses paid by BC Partners on behalf of the Company and costs reimbursable to the Servicing Agent (as defined below) for an allocable portion of the compensation paid by the Servicing Agent (or its affiliates) to the Company's Chief Financial Officer and his staff (based on a percentage of time such individuals devote, on an estimated basis, to the business affairs of the Company).

On March 22, 2021, the Board declared a cash dividend in the amount of CAD\$0.02 per common share which was paid on April 7, 2021 to shareholders of record as of March 31, 2021. On May 12, 2021, the Board declared a cash dividend in the amount of CAD\$0.02 per common share which was paid on June 25, 2021 to shareholders of record as of May 27, 2021. On August 12, 2021, the Board declared a cash dividend in the amount of CAD\$0.02 per common share which was paid on September 24, 2021 to shareholders of record as of August 24, 2021.

On closing of the Company's plan of arrangement carried out under the *Business Corporations Act* (Ontario) (the "Arrangement") on October 19, 2018 and in accordance with the terms of the Arrangement, the Company issued to its shareholders an aggregate of 17,288,140 contingent value rights ("CVR"). As part of the Arrangement, each shareholder of the Company (other than U.S. shareholders) received one (1) CVR in respect of Cline for each common share held as of the record date for the determination of shareholders entitled to receive CVRs. Pursuant to the indenture governing the terms of the CVRs, the Company will seek to dispose of Cline for the five (5) year period following the closing of the Arrangement and will distribute to the holders of the CVRs: (a) distributions received from Cline; and (b) the net proceeds from the sale of the Company's holdings in Cline (each, a "Contingent Payment Event"). On July 15, 2019, Marret Asset Management Inc. (the "Former Manager") announced that Cline had entered into a conditional term sheet with Allegiance Coal Limited ("Allegiance") for the purchase and sale of all the shares of New Elk Coal Company ("NECC"), which holds all the mining assets of Cline. On January 22, 2020, the Former Manager announced that Cline had entered into a binding agreement for the sale by Cline to Allegiance Coal Limited of all the shares in NECC. The total acquisition cost was CAD\$55.0 million to be comprised of a mix of cash, shares of Allegiance Coal Limited and deferred cash payments that will be subject to certain conditions. Completion of the sale was to take place before July 15, 2020 and was subject to certain conditions, including Allegiance raising start-up capital for the mine, which was estimated to be \$55.0 million at the time of the announcement. On June 5, 2020, the Former Manager announced that Cline had amended the binding agreement for the sale by Cline to Allegiance of all the shares of NECC with respect to, among other things, the structure of the consideration payable by Allegiance, and subsequently announced that completion of the transaction is estimated to take place before the end of October 2020. On October 27, 2020, the Former Manager announced that the completion of the transaction took place on October 26, 2020. On February 24, 2021, the Company received \$0.5 million from the Former Manager in connection with the sale. The distribution by the Company of any proceeds received from the Cline transaction will be made in accordance with the terms of the indenture governing the CVRs. On June 9, 2021, the Company distributed CAD\$0.3 million to the holders of the CVRs and CAD\$0.2 million is payable as at September 30, 2021.

3. MANAGEMENT FEE INCOME

On November 20, 2018, the Company, through ML Management, entered into a Monitoring Agreement with BC Partners pursuant to which, among other things, the Company will receive a fee for providing monitoring services in respect of certain investments managed by BC Partners, all as agreed to by ML Management and BC Partners from time to time.

On August 21, 2020, the Company, through ML Management, entered into an asset purchase agreement with Garrison Investment Management LLC and other sellers (collectively, "GARS Sellers") with respect to the acquisition by ML Management of the rights of the GARS Sellers under certain investment management agreements, the general partnership interests of the GARS Sellers under certain partnership agreements and the rights of the GARS Sellers under certain collateral management agreements relating to Garrison Funding 2018-1 LP and Garrison MML CLO 2019-1 LP (collectively, the "CLOs") (the "CLO Acquisition"). On closing of the CLO Acquisition on November 12, 2020, ML Management became the investment manager of the CLOs and is entitled to receive management fees based upon aggregate gross assets under management, paid quarterly, and subject to various reductions based on caps, transaction fees, and fee-sharing arrangements. Following the completion of the CLO Acquisition, the names of Garrison Funding 2018-1 LP and Garrison MML CLO 2019-1 LP were changed to Mount Logan Funding 2018-1 LP and Mount Logan MML CLO 2019-1 LP, respectively.

On October 30, 2020, the Company and SCIM entered into the SCIM Services Agreement pursuant to which the Company will provide certain administrative services to SCIM in respect of the management of an investment fund. On December 17, 2020, the SCIM Services Agreement was amended to be between the Company's wholly-owned subsidiary, MLC US Holdings LLC, and SCIM. Under the SCIM Services Agreement, in exchange for the administrative services, SCIM will pay to the Company, on a quarterly basis, an amount equal to the aggregate base management and incentive fees received by SCIM from the investment fund in respect of such quarter, net of debt service, a quarterly fee to be retained by SCIM comprised of a specified amount, plus an allocable portion of the compensation of SCIM's investment professionals in connection with their performance of investment advisory services for the investment fund (collectively, the "Retained Benefits"). In addition, SCIM will be reimbursed by the Company quarterly for certain expenses it incurs in connection with the investment advisory services provided to the investment

fund. Pursuant to this arrangement, the Company will receive the net economic benefit derived by SCIM under the investment fund advisory agreement, subject to the holdback of the Retained Benefits and expense reimbursements.

On April 20, 2021, the Company, through ML Management, entered into an asset purchase agreement with CIA with respect to the acquisition by ML Management of certain assets from CIA and whereby ML Management will become the investment adviser of Capitala. ML Management, as the investment adviser, receives a fee for investment advisory and management services consisting of two components – a 1.75% annual base management fee based upon gross assets and an incentive tied to performance. The Capitala Acquisition closed on July 1, 2021 and Capitala changed its name to Logan Ridge Finance Corporation.

On October 29, 2021, the Company completed its previously announced acquisition of 100% of the equity of Ability for a purchase price of \$20.0 million, comprised of the issuance of an unsecured promissory note in the amount of \$15.0 million and an aggregate of 1,579,671 common shares of the Company having an aggregate value of \$5.0 million. ML Management has now been engaged as an investment adviser for a meaningful portion of Ability's assets, increasing ML Management's assets under management.

4. RELATED PARTY TRANSACTIONS

Servicing Agreement

On November 20, 2018, the Company entered into a servicing agreement (the "Servicing Agreement") with BC Partners. Under the terms of the Servicing Agreement, BC Partners as servicing agent (the "Servicing Agent") performs, or oversees the performance of, the administrative services necessary for the operation of the Company, including, without limitation: (i) provision of office facilities, equipment, clerical, bookkeeping, compliance and recordkeeping services and such other administrative services as the Servicing Agent, subject to review by the Board, shall from time to time determine to be necessary or useful to perform its obligations under the Servicing Agreement, and (ii) on behalf of the Company, conducting relations with custodians, depositories, transfer agents, dividend disbursing agents, other shareholder servicing agents, accountants, attorneys, underwriters, brokers and dealers, corporate fiduciaries, insurers, banks and such other persons in any such other capacity deemed to be necessary or desirable. The Servicing Agent is authorized to enter into sub-administration agreements as the Servicing Agent determines necessary in order to carry out the administrative services. The Company pays fees to BC Partners at amounts to be agreed by the parties for services performed for it pursuant to the terms of the Servicing Agreement. While the Servicing Agent performs certain administrative functions for the Company pursuant to the Servicing Agreement, the management functions of the Company are wholly performed by the Company's management team. For the nine months ended September 30, 2021, the Company incurred costs reimbursable to the Servicing Agent of \$822 (September 30, 2020 – \$468) for an allocable portion of the compensation paid by the Servicing Agent (or its affiliates) to the Company's Chief Financial Officer and his staff (based on a percentage of time such individuals devote, on an estimated basis, to the business affairs of the Company) and out-of-pocket expenses. As at September 30, 2021, reimbursable operating expenses paid by the Servicing Agent on behalf of the Company were \$1.6 million (December 31, 2020 – \$nil).

Unless earlier terminated as described below, the Servicing Agreement will remain in effect until November 20, 2021 and shall continue automatically for successive annual periods, if approved annually by (i) the vote of the Board and (ii) the vote of a majority of the Company's directors who are not parties to the Servicing Agreement or a "related party" of the Servicing Agent, or of any of its affiliates, as defined in the Multilateral Instrument 61-101 under Canadian securities law. The Servicing Agreement may be terminated at any time, without the payment of any penalty, upon 60 days' written notice by the vote of the Board or by the Servicing Agent.

Unitranche Lending Program

On November 28, 2018, the Company entered into a commitment of \$10 million (to be drawn over time) to invest in a unitranche lending program through Great Lakes Holdings, a Delaware limited partnership formed as a co-investment vehicle to facilitate the participation of certain co-investors to invest, directly or indirectly, in BCP Great Lakes Funding LLC. The program underwrites and holds senior secured unitranche loans and seeks to build a diverse portfolio of floating rate, sponsor-backed middle-market loans paying a quarterly cash yield. Funding of \$9.5 million was made under this program through 2019, with an additional \$0.8 million during 2020, and the Company received return of capitals totaling \$10.3 million during 2020. This investment was disposed of during the fourth quarter of 2020 and as at December 31, 2020, the Company does not own any investment, and has no ongoing investment commitment, in Great Lakes Holdings.

Compensation

Certain directors and officers of the Company are affiliated with BC Partners. Common shares held by directors and officers of the Company who are affiliated with BC Partners at September 30, 2021 were 1,073,728 (December 31, 2020 – 792,797). The total directors' fees incurred to the directors who are affiliated with BC Partners during the nine months ended September 30, 2021 was \$nil (September 30, 2020 – \$11).

Key management personnel of the Company include the chief executive officer, the chief financial officer and co-presidents and directors. Compensation incurred to officers who are affiliated with BC Partners for employee services, based on employment agreements, for the nine months ended September 30, 2021 was \$181 (September 30, 2020 – \$167).

Other Transactions with Affiliates of BC Partners

The Company may, from time to time, enter into transactions in the normal course of operations with entities that are considered affiliates of BC Partners. At September 30, 2021, the Company held investments in BC Partners Lending Corporation, EAB Global,

Inc., Portman Ridge Finance Corp. and Sierra Crest Management LLC, each of which are considered to be affiliated with BC Partners.

5. FINANCIAL CONDITION, LIQUIDITY AND CAPITAL RESOURCES

5.1 Liquidity and financing strategy

Our liquidity and capital resources are generated primarily from proceeds from investment sales and principal repayments, income earned on investments, and the MLC US Holdings Credit Facility and the MLC I Revolving Credit Facility. We may borrow funds to make investments to the extent we determine that additional capital would allow us to take advantage of additional investment opportunities, if the market for debt financing presents attractively priced debt financing opportunities, or if the Board determines that leveraging our portfolio would be in the best interests of the Company. Where appropriate, we may seek to raise equity through the public markets to finance our growth and strengthen our financial position.

Credit Facilities

On May 7, 2021, MLC I entered into a credit and security agreement providing the MLC I Revolving Credit Facility of up to \$60.0 million with a large US-domiciled financial institution as administrative agent, which bears interest at LIBOR plus a spread of 4.00% for the first three months, 5.50% for the following three months, and 8.00% thereafter. Payment of principal and interest will be made on the maturity date, on February 7, 2022. As at September 30, 2021, \$39.5 million remains undrawn on the MLC I Revolving Credit Facility.

On August 20, 2021, MLC US Holdings entered into a credit agreement providing the MLC US Holdings Credit Facility of up to \$25.0 million with a large US-based asset manager, as administrative agent and collateral agent for the lenders, which bears interest at LIBOR plus a spread of 7.50% per annum and matures on August 20, 2027. As at September 30, 2021, \$8.5 million remains undrawn on the MLC US Holdings Credit Facility.

Working capital

Working capital is the excess of current assets over current liabilities. The Company defines working capital as the sum of cash, restricted cash, receivable for investments sold, accrued interest and dividend receivable, and prepaid expenses less the sum of debt obligations, payable for investments purchased, amounts due to affiliates, payable for equity units purchased, and other liabilities that are payable within one year of the reporting date.

As at September 30, 2021, the Company has working capital deficit of \$(8,522), reflecting current assets of \$5,925, offset by current liabilities of \$14,447, as compared with working capital of \$2,031 as at December 31, 2020, reflecting current assets of \$40,554, offset by current liabilities of \$38,523. The outstanding amount under the MLC I Revolving Senior Loan Facility was fully repaid and terminated on February 4, 2021. The outstanding amount under the MLCSC Credit Facility was fully repaid and terminated on August 20, 2021. The Company has the ability to raise additional liquidity through the issuance of common shares and through the sale of its portfolio investments. The Company has a total of \$48.0 million undrawn on its credit facilities.

Off-balance sheet transactions

Portfolio company commitments

Pursuant to certain lending agreements, we are committed to fund additional loan advances. The funding commitments may expire without being drawn upon, and commitments do not necessarily represent future cash requirements for future earning assets for the Company. We are also committed to provide our proportionate share of additional capital to joint operations in accordance with contractual agreements.

As at September 30, 2021 and December 31, 2020, we had the following outstanding commitments to fund investments in portfolio companies:

Portfolio Company	Investment	Currency	September 30, 2021	December 31, 2020
Gastro Health Holdco, LLC	First lien delayed draw term loan	USD	\$ 410	\$ —
Marble Point Credit Management LLC	First lien delayed draw term loan	USD	563	—
The PromptCare Companies Inc.	First lien delayed draw term loan	USD	—	327
Sierra Crest Management LLC	Promissory note	USD	2,496	2,496
			\$ 3,469	\$ 2,823

5.2 Capital resources

Equity issuance

On October 27, 2020 and November 25, 2020, the Company completed private placements of an aggregate of 6,358,381 common shares at a price of CAD\$2.75 per share for aggregate gross proceeds of \$13.3 million. On May 7, 2021, the Company completed a

private placement of 223,214 common shares at a price of CAD\$2.80 per share for gross proceeds of \$0.5 million. On July 20, 2021, the Company completed a private placement and issued 2,165,000 common shares of the Company at a purchase price of CAD\$3.20 per share for gross proceeds of CAD\$6.9 million. As September 30, 2021 there were 19,351,593 common shares of the Company issued and outstanding (December 31, 2020 – 16,963,379) and there are 22,190,196 common shares issued and outstanding as of the date of this MD&A.

The Company has no stock options outstanding.

On closing of the Arrangement and in accordance with the terms of the Arrangement, the Company issued to shareholders who made an election to acquire warrants under the Arrangement, warrants to acquire an aggregate of 20,468,128 common shares of the Company. As at September 30, 2021 and December 31, 2020, the Company had 20,468,128 common share purchase warrants ("Arrangement Warrants") outstanding, which are exercisable at any time up to October 19, 2025. As a result of the share consolidation completed on December 3, 2019, every eight (8) Arrangement Warrants entitle the holder to receive, upon exercise, one common share of the Company at a price of CAD\$6.16 per common share. Accordingly, an aggregate of up to 2,558,516 common shares are issuable upon the exercise of the 20,468,128 outstanding Arrangement Warrants as at September 30, 2021 and December 31, 2020.

In connection with the private placement on July 20, 2021, the Company issued an aggregate of 76,923 Broker Warrants, each of which is exercisable to acquire one common share at any time up to January 20, 2023 at an exercise price of CAD\$3.90.

As at September 30, 2021, there were 20,545,051 warrants outstanding (December 31, 2020 – 20,468,128).

5.3 Management of capital

The Company includes the following in its capital:

	September 30, 2021	June 30, 2021	March 31, 2021	December 31, 2020	September 30, 2020	June 30, 2020	March 31, 2020	December 31, 2019
Shareholders' equity comprised of:								
Share capital	\$ 99,091	\$ 93,957	\$ 93,480	\$ 93,480	\$ 80,988	\$ 80,988	\$ 80,988	\$ 80,988
Warrants	1,129	1,086	1,086	1,086	1,086	1,086	1,086	1,086
Contributed surplus	7,240	7,240	7,240	7,240	7,240	7,240	7,240	7,240
Deficit	(37,089)	(37,259)	(36,772)	(36,770)	(34,744)	(35,855)	(35,691)	(33,247)
Cumulative translation adjustment	(21,858)	(21,858)	(21,858)	(21,858)	(21,858)	(21,858)	(21,858)	(21,858)
	<u>\$ 48,513</u>	<u>\$ 43,166</u>	<u>\$ 43,176</u>	<u>\$ 43,178</u>	<u>\$ 32,712</u>	<u>\$ 31,601</u>	<u>\$ 31,765</u>	<u>\$ 34,209</u>
Net asset value per share	\$ 2.51	\$ 2.51	\$ 2.55	\$ 2.55	\$ 3.08	\$ 2.98	\$ 3.00	\$ 3.23

The Company's objectives when managing capital are:

1. to ensure that the Company maintains the level of capital necessary to meet its ongoing obligations;
2. to allow the Company to respond to changes in economic and/or marketplace conditions by maintaining its ability to purchase new investments;
3. to give shareholders sustained growth in shareholder value by increasing shareholders' equity; and
4. to maintain a flexible capital structure which optimizes the cost of capital at acceptable levels of risk.

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of its underlying assets. The Company maintains or adjusts its capital level to enable it to meet its objectives by:

1. realizing proceeds from the disposition of its investments and fixed income instruments;
2. utilizing leverage in the form of margin or debt financing; and
3. raising capital through equity financings;

The Company is not subject to any capital requirements imposed by a regulator.

6. CRITICAL ACCOUNTING ESTIMATES

6.1 Investments

The Company's classification of financial assets is based on the business model for managing the portfolio of assets and the contractual cash flow characteristics of these financial assets. Debt investments held within a business model with the objective of realizing cash flows through sale and meets the definition of held for trading, rather than holding to collect the contractual cash flows, are classified and measured at fair value through profit or loss ("FVTPL"). Financial assets measured at amortized cost are debt financial instruments with contractual cash flows that meet the "solely payment of principal and interest" ("SPPI") test and are managed on a "hold to collect" basis. These financial assets are recognized initially at fair value plus or minus direct and incremental transaction costs, and are subsequently measured at amortized cost, using the effective interest method, net of an allowance for expected credit losses ("ECL"). Equity investments are generally carried at fair value through profit or loss. These values are periodically assessed by management of the Company to ensure that they are reasonable.

Investments held that are traded in an active market, through recognized public stock exchanges, over-the-counter markets, or through recognized investment dealers are valued at their closing sale prices. Investments held that are not traded in an active market are valued based on the results of valuation techniques using observable market inputs, if available, on such basis and in such manner established by management. The fair value of certain securities may be estimated using valuation techniques based on assumptions that are not supported by observable market inputs. Investments for which reliable quotations are not readily available are valued at fair value, as determined using management's best estimates thereof pursuant to procedures established by the Company. These values are periodically assessed by management of the Company to ensure that they are reasonable.

Management undertakes a multi-step valuation process, which includes, among other procedures, the following:

- The Company's quarterly valuation process begins with each portfolio company or investment being initially valued by the investment professionals responsible for the portfolio investment. The Company may utilize an independent valuation firm from time to time to provide valuation on material illiquid securities;
- Management will review the recommended valuations and determine the fair value of each investment. Valuations that are not based on readily available market quotations will be valued in good faith based on, among other things, the input of management and, where applicable, other third parties.

The Company's contingent value rights liability is measured at fair value through profit and loss, and represents a contingent cash entitlement in respect of its investment in Cline.

Investment transactions are recorded on the trade date. Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss and are treated as an expense. The change in the difference between fair value and amortized cost of the investments is recorded as an unrealized appreciation or depreciation on investments in the consolidated interim statements of comprehensive income (loss).

Realized gains (losses) on investments are calculated using the average cost method as the difference between the net proceeds received (excluding prepayment fees, if any) and the amortized cost basis of the investment without regard to unrealized appreciation or depreciation previously recognized, and include investments charged off during the period, net of recoveries. Net change in unrealized appreciation or depreciation reflects the change in portfolio investment values during the reporting period, including any reversal of previously recorded unrealized appreciation or depreciation with respect to investments realized during the period.

Investment in Cline

The Company, along with affiliates of the Former Manager (the "Group"), holds an investment in the equity and bonds of Cline. Under a restructuring plan involving Cline, approved by the courts in 2015, the Group owns all of the equity and the senior secured bonds of Cline post-restructuring. On July 15, 2019, the Former Manager announced that Cline had entered into a conditional term sheet with Allegiance for the purchase and sale of all of the shares of NECC, which owns the mining assets of Cline. The fair value of Cline was determined based the net present value of expected proceeds resulting from the proposed sale of Cline's mining assets. The estimate fair value is based on assumptions related to the completion of the announced transaction and the future operations of the mine. The assumptions are limited by the uncertainty related to completion of the proposed transaction, economic uncertainty of proposed mining operations and the appropriateness of discount rates used in the estimates. Accordingly, by their nature, estimates of fair value of this type are subjective and do not necessarily result in precise determinations. As a result of the entering into of the conditional term sheet for the sale of all the shares of NECC, the fair value of Cline was written-down to reflect expected proceeds from the proposed sale. On January 22, 2020, the Former Manager announced that Cline had entered into a binding agreement for the sale by Cline to Allegiance Coal Limited of all the shares in NECC. The total acquisition cost is CAD\$55.0 million and completion of the sale was to take place before July 15, 2020. On June 5, 2020, the Former Manager announced that Cline had amended the binding agreement for the sale by Cline to Allegiance of all the shares of NECC with respect to, among other things, the structure of the consideration payable by Allegiance, and subsequently announced that the completion of the transaction is estimated to take place before the end of October 2020. On October 27, 2020, the Former Manager announced that the Cline transaction was completed on October 26, 2020. On February 24, 2021, the Company received \$0.5 million from the Former Manager in connection with the sale. The distribution by the Company of any proceeds received from the Cline transaction will be

made in accordance with the terms of the indenture governing the CVRs. On June 9, 2021, the Company distributed CAD\$0.3 million to the holders of the CVRs and CAD\$0.2 million is payable at September 30, 2021.

Cline has advised the Company that it plans to manage its continued liquidity utilizing existing current assets and expected proceeds from disposal of surplus assets.

The Company makes estimates related to its Level 3 investments and, in particular its investment in Cline. The estimated fair value of this investment depends upon, among other things, (i) estimates involving anticipated costs and timing associated with bringing the mine to production, which in turn depends upon assumptions regarding coal prices in the future, economic cycles, and the performance of the broader coal mining sector and (ii) assumption regarding the use of a specific market comparables. These assumptions are limited by the availability of reliable comparable data, economic uncertainty, and the uncertainty of predictions regarding commodity markets, which may impact the ability of Cline to divest of its mine asset. Accordingly, by their nature, estimates of fair value of this type are subjective and do not necessarily result in precise determinations. Should the underlying assumptions used by the Company and the Former Manager change, the estimated fair value could change by a material amount.

6.2 Accounting estimates and policies

Accounting estimates

The Company makes estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. These estimates are based on management's historical experience and various other assumptions that are believed by management to be reasonable under the circumstances. Such assumptions are evaluated on an ongoing basis and form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ materially from these estimates. Refer to the notes to the consolidated interim financial statements for the nine months ended September 30, 2021 for details on critical accounting estimates.

Dividends

Dividends to the Company's shareholders are recorded on the declaration date. The amount to be paid out as a dividend is determined by the Board. Distributions in excess from the Company's cash flow from operations may constitute a return of capital.

7. NON-IFRS MEASURES

The Company has included in this MD&A a supplemental measures of performance as described below. We utilize these measures in managing the business and evaluating its performance. Non-IFRS financial measures used by the Company from time to time, including as referred to in this MD&A do not have any standardized meaning under IFRS and therefore may not be comparable to similar measures presented by other issuers.

7.1 Net asset value per share

The net asset value ("NAV") per share as at September 30, 2021 was \$2.51 compared to \$2.55 as at December 31, 2020. NAV per share is a non-IFRS measure defined as shareholders' equity divided by the total number of common shares outstanding at a point in time. The term NAV per share does not have any standardized meaning under IFRS and therefore may not be comparable to similar measures presented by other companies. We believe that NAV per share provides information useful to our shareholders in understanding our performance and provides a meaningful measure to evaluate our business relative to others in the investment industry.

8. RISK FACTORS

An investment in the securities of the Company is subject to various risks and uncertainties, including those set out below, and in the Annual Information Form which is available for review under the Company's SEDAR profile at www.sedar.com. Such risks and uncertainties should be carefully considered by an investor before making any investment decision. If any of the possibilities described in such risks actually occurs, the Company's business, financial condition and operating results could be materially adversely affected. Investors should carefully consider the risks and uncertainties described below as well as the other information contained in this MD&A and in the Annual Information Form. The risks and uncertainties described below are not the only ones the Company may face. The following risks, together with additional risks and uncertainties not currently known to the Company or that the Company may deem immaterial, could impair the Company's business, financial condition and results of operations. The market price of the securities of the Company could decline if one or more of these risks and uncertainties develop into actual events, and investors in the Company's securities may lose all or part of their investment.

Risks Related to the Business – General

Dependence upon key management

The Company depends on the business and technical expertise of its Board and its key personnel. There is little possibility that this dependence will decrease in the near term. As the Company's operations expand, additional management resources will be required. The Company may not be able to attract and retain additional experienced qualified personnel in respect of the Company's

insurance solutions business. The failure to attract and retain qualified personnel for the Company's current and expected business plans would have a negative effect on operations and could adversely affect the Company's business, financial condition and results of operations

Limited operating history for the Company's current strategy

Following the completion of the Arrangement, the Company changed its investment strategy from a focus on natural resource lending to a broader lending-oriented credit platform with an increasing focus on the alternative asset management business. Prior to the Arrangement, the Company did not have any record of operating under an investment strategy with a focus on a broader lending-oriented credit platform or as an asset management and investment firm. With the recent acquisition of Ability, the Company has continued its transition from a balance sheet oriented investment vehicle to a hybrid asset management business and insurance solutions business. As such, the Company is subject to all of the business risks and uncertainties associated with the broadening of its businesses, including the risk that the Company will not achieve its financial objectives as estimated by management. Furthermore, past successes of the Board and management in other ventures do not guarantee future successes or the success of the Company in executing its current strategy. The Company may alter its business strategies at any time without notice to its shareholders and there is no guarantee that such changes will yield similar or improved results.

No assurance of profitability

There is no assurance that the Company will earn profits in the future, or that profitability will be sustained. There is no assurance that future revenues will be sufficient to generate the funds required to continue the Company's operations. If the Company does not have sufficient capital to fund its operations, it may be required to reduce its operations accordingly.

Risks of fluctuations in the value of the Company and its Shares

The net asset value and market value of the Company's shares will fluctuate with changes in, among other things, the value of the Company's investments, changes in the amount of the Company's dividends, adverse market reaction to any acquisitions or other transactions, a lack of liquidity in the trading of the Company's common shares and fluctuations in currency exchange rates. Such changes in value may occur as a result of various factors, including general economic and market conditions, the performance of companies who have borrowed from the Company, the performance of the Company relative to entities engaged in similar businesses and changes in interest rates which may affect the value of interest-bearing securities owned or managed by the Company or interest-sensitive products sold by the Company. An investment in the Company is speculative and may result in the loss of a shareholder's investment in the Company. Only shareholders who are experienced in high risk investments and who can afford to lose their investment should consider an investment in the Company.

The Company is exposed to risks associated with changes in market rates

The Company is subject to financial market risks, including changes in interest and currency exchange rates. General interest and currency exchange rate fluctuations may have a substantial negative impact on the Company's investments and investment opportunities and, accordingly, have a material adverse effect on its ability to achieve its investment objectives and its target rate of return on invested capital. In addition, an increase in interest rates would make it more expensive to use debt for the Company's financing needs, if any.

Financing risks

Additional funding will be required for the Company to acquire and source new loans and expand its alternative asset management and insurance businesses. There is no assurance that any such funds will be available or available on favorable terms. Failure to obtain additional financing, if required, on a timely basis, could cause the Company to reduce or delay its proposed operations. The primary source of funds currently available to the Company is derived from the issuance of equity and the incurrence of debt. There is no assurance that the Company will be able to obtain adequate financing in the future or that such financing will be on terms advantageous to the Company. Ability's capital requirements will depend on the rate of its sales growth, reserve levels and the level of risk in the insurance products and the investment assets. Additional funding may be required to maintain Ability's statutory capital and surplus. Adverse market conditions may affect the availability and cost of additional funding, which will impact Ability's profitability, liquidity, and growth prospects.

There may be conflicts of interest related to obligations that management has to other clients

Certain of the Company's directors and officers serve or may serve as officers, directors or principals of entities that operate in the same or a related line of business (notably BC Partners) as the Company does, or of investment funds managed by the same personnel. In serving in these multiple capacities, they may have obligations to other clients or investors in those entities, the fulfillment of which may not be in the Company's best interests or in the best interest of its stakeholders. The Company's investment objective may overlap with the investment objectives of such investment funds, accounts or other investment vehicles. Certain of the directors, officers and employees of the Company and its affiliates will have conflicts of interest in allocating their time between the Company and other activities in which they are or may become involved, including the management of BC Partners' affiliated funds. Directors and officers of the Company with conflicts of interest will be subject to and required to comply with the procedures set out in the *Business Corporations Act (Ontario)* and other applicable legislation, regulations, rules and policies.

The Company may acquire various financial instruments for purposes of "hedging" or reducing its risks, which may be costly and ineffective and could reduce its cash available for distribution to its shareholders

The Company may seek to hedge against interest rate and currency exchange rate fluctuations and credit risk by using financial instruments such as futures, options, swaps and forward contracts. These financial instruments may be purchased on exchanges or

may be individually negotiated and traded in over-the-counter markets. Use of such financial instruments for hedging purposes may present significant risks, including the risk of loss of the amounts invested. Defaults by the other party to a hedging transaction can result in losses in the hedging transaction. Hedging activities also involve the risk of an imperfect correlation between the hedging instrument and the asset being hedged, which could result in losses both on the hedging transaction and on the instrument being hedged. Use of hedging activities may not prevent significant losses and could increase the Company's losses. Further, hedging transactions may reduce cash available to pay distributions to its shareholders.

Capital markets and the economy may experience periods of disruption and instability. These market and economic conditions could materially adversely affect the Company's business, financial condition and results of operations

The Canadian, U.S., and global capital markets and economic conditions have in the past and may in the future experience periods of volatility and disruption from changes in interest rates, credit availability, inflation rates, uncertainty, legal and regulatory changes, trade barriers, commodity prices, fluctuation in currency exchange rates, and political conditions. While credit markets and the economy have experienced relative stability since the global financial crisis from 2007-2009, there can be no assurance that market conditions will remain or improve further in the near future.

The outbreak of the novel coronavirus, or COVID-19, continues to adversely impact global commercial activity and has contributed to significant volatility in financial markets and economies. The global impact of the outbreak has been rapidly evolving, and many countries have reacted by instituting or reinstating quarantines, restrictions on travel and other measures to mitigate the impact of this pandemic. While many of these measures have been relaxed in certain jurisdictions, spread of the virus continues and some of these restrictions remain in place. Such actions have created disruption in global supply chains, and have adversely impacted a number of industries, including, among others, transportation, hospitality and entertainment. The outbreak has triggered a period of global economic slowdown and continued volatility and could have a continued adverse impact on economic and market conditions even after restrictive measures are relaxed or removed. The rapid development and continued fluidity of this situation precludes any prediction as to the duration and extent of this pandemic and its impact on the business, financial condition and results of operations of the Company and its subsidiaries, as well as the business, financial condition and results of operations of their portfolio companies. Nevertheless, the novel coronavirus presents material uncertainty and risk with respect to our and our portfolio companies' performance and financial results, including following the relaxation or removal of restrictive measures. The Company continues to actively monitor developments with respect to this pandemic and its impact as part of the Company's overall investment objective and strategy. To the extent the Company's portfolio companies continue to be adversely impacted by the effects of COVID-19, it may have a material adverse impact on the Company's future net investment income, the fair value of its portfolio investments, its financial condition and the results of its operations and financial condition.

Such periods of disruption may be accompanied by depressed levels of consumer and commercial spending, a lack of liquidity in debt capital markets, significant write-offs in the financial services sector and the re-pricing of credit risk. The Company, its subsidiaries and the portfolio companies in which it invests may be adversely affected by these deteriorations in the financial markets and economic conditions throughout the world.

A weak economy could impact the quality, quantum and frequency of the deals available to the Company. Adverse economic conditions also may decrease the estimated value of the collateral securing the Company's financing structures. Further or prolonged economic slowdowns or recessions could lead to financial losses in the Company's loan portfolio and a decrease in the Company's net finance income, net income and book value. Any of these events, or any other events caused by turmoil in global financial markets, could have a material adverse effect on the Company.

The insurance market is affected by capital market and global economic conditions. Conditions of perceived or actual stress, volatility and disruption in capital markets and asset classes may decrease the returns and value of the investment portfolio and impact Ability's claim liability. During unfavorable economic conditions policyholders may defer premium payments, surrender policies, or stop paying premiums. Uncertain economic conditions may also discourage potential policyholders from purchasing Ability's products. Claim rates may increase in certain economic conditions which could lead to operating losses and capital increases from Ability's products.

Competitive business environment

The Company's ability to acquire and access new opportunities could be significantly affected by the activities of other industry participants. New competitors may enter the credit, asset management and insurance industries in which the Company operates, or current market participants may significantly increase their activities in these areas. There can be no assurance that the Company will be able to compete effectively with its competitors. If competitors were to engage in aggressive pricing policies, the Company may have difficulty originating new financing opportunities, securing new investment management mandates or, in the case of Ability, offering crediting rates at an appropriate service standard, all of which could have a material adverse effect on the Company. Some of the Company's competitors offer a broader range of financing services than the Company and can leverage their existing relationships to offer and sell products and services that compete directly with the Company's products and services. Further, the Company's competitors may have greater financial, technical, marketing and other resources, and may have greater access to lower cost of capital. As a result of competition, the Company's ability to profitably expand its business lines may decline.

Because the Company's business model depends to a significant extent upon relationships with private equity sponsors, investment banks and commercial banks, the inability of the Company to maintain or develop these relationships, or the failure of these relationships to generate investment opportunities, could adversely affect the Company's business

The Company depends on its and its broader organization's relationships with private equity sponsors, investment banks and commercial banks, and the Company relies to a significant extent upon these relationships to provide it with potential investment opportunities. If the Company or its organizations fails to maintain their existing relationships or develop new relationships with other sponsors or sources of investment opportunities, the Company may not be able to grow its investment portfolio. In addition, individuals with whom the Company or its broader organizations have relationships are not obligated to provide the Company with

investment opportunities, and, therefore, there is no assurance that such relationships will generate investment opportunities for the Company.

Inability to realize potential benefits from growth

The Company's inability to realize the potential benefits from its growth strategy may adversely impact its operating results. The Company's ability to realize such benefits will be based on its management of growth and will require it to continue to build its operational, financial and management controls, human resource policies, and reporting systems and procedures. The Company's ability to manage its growth will depend in large part upon a number of factors, including the ability of the Company to rapidly: (i) secure additional sources of funding to fund new loans and asset management opportunities, while maintaining a prudent capital structure for the Company; and (ii) attract and retain qualified personnel in order to continue to develop the Company's pipeline of investment opportunities and provide services that respond to evolving financing needs. The Company's inability to achieve any of these objectives could have a material adverse effect on the Company.

Ability's growth depends on the size of the capital base supporting the growth. Ability may need to seek additional funding, invest additional assets and hire additional personnel in order to facilitate its growth. As Ability grows there is a risk that service quality to its customers declines if it does not commit additional resources. There is a risk that Ability may not be able to realize the potential benefits from growth if it does not adequately manage the scaling of its business. An inability to realize the benefits from growth may have a material adverse effect on its business.

Changes in laws or regulations governing the Company's operations may adversely affect the Company's business or cause the Company to alter its business strategy

The Company and its portfolio companies and Ability are and will be subject to regulation at the municipal, local, state, provincial, and federal level. New legislation may be enacted, or new interpretations, rulings or regulations could be adopted, including those governing the types of investments the Company is permitted to make and the insurance products sold or anticipated to be sold by Ability, any of which could harm the Company and its shareholders, potentially with retroactive effect. Additionally, any changes to the laws and regulations governing the Company's operations relating to permitted investments may cause the Company to alter its investment strategy to avail itself of new or different opportunities. Such changes could result in material differences to the Company's strategies and may result in the Company's investment focus shifting from the areas of expertise of the Company to other types of investments in which the Company may have less expertise or little or no experience. Thus, any such changes, if they occur, could have a material adverse effect on the Company's financial condition and results of operations.

Any changes in tax regulations or tax reform may have an adverse impact on investors and policyholders

Given the Company expects to have investment holdings in both Canada and the U.S., there is potential that tax changes in Canada or the U.S. could result in adverse effects on the Company's financial results and share price. The Company cannot predict how changes in tax legislation will affect the Company, the Company's business (including Ability), or the business of its portfolio companies but these provisions may in certain circumstances increase the tax burden on the Company's portfolio companies, which, in turn, could negatively affect their ability to meet their borrowing obligations to the Company or result in reduced asset management fees for the Company. Ability's annuity products offer income tax advantages to policyholders as compared to other savings instruments. Income tax can be deferred on the earnings during the accumulation of an annuity. Tax reforms could change this tax deferral benefit or reduce the taxation of competing products which could adversely affect Ability's annuity product sales and result in more policy surrenders. If Ability's corporate income tax rate was increased, Ability's earning would decrease accordingly.

The Company may experience fluctuations in its quarterly financial results

The Company could experience fluctuations in its quarterly operating results due to a number of factors, including its ability or inability to make investments in companies that meet its investment criteria, the interest rate payable on the debt securities it acquires, the level of its expenses (including the Company's borrowing costs), variations in and the timing of the recognition of realized and unrealized gains or losses, fluctuations in currency exchange rates, the degree to which it encounters competition in its markets and general economic conditions. As a result of these factors, financial results for any previous period should not be relied upon as being indicative of performance in future periods.

A significant portion of the Company's investment portfolio is and will be recorded at fair value as determined in good faith by management and, as a result, there is and will be uncertainty as to the value of the Company's portfolio investments

The Company is required to carry a significant portion of its portfolio investments at market value or, if there is no readily available market value, at fair value as determined by the Company's management. There is not a public market for the securities of the privately-held companies in which the Company invests. Most of the Company's investments will not be publicly traded or actively traded on a secondary market. As a result, the Company values these securities quarterly at fair value as determined in good faith by the management team.

Certain factors that may be considered in determining the fair value of the Company's investments include investment dealer quotes for securities traded on the secondary market for institutional investors, the nature and realizable value of any collateral, the portfolio company's earnings and its ability to make payments on its indebtedness, the markets in which the portfolio company does business, comparison to comparable publicly traded companies, discounted cash flow and other relevant factors. As a result, the Company's determinations of fair value may differ materially from the values that would have been used if a ready market for these nontraded securities existed. Due to this uncertainty, the Company's fair value determinations may cause the net asset value of the

Company on a given date to materially differ from the value that it may ultimately realize upon the sale of one or more of its investments.

The fair market value determination of the majority of Ability's investments is based on readily available market value. For Ability's investments without readily available market value, fair value will be determined by the Company's management consistent with the methodology described above. The assumptions required to reach the fair market value may change which will impact the fair market value and the net income under IFRS, which may have material adverse impact on the Company's financial position.

No guarantee as to timing or amount of dividends

Holders of the Company's shares do not have a right to dividends on such shares unless declared by the Board. The declaration of dividends is at the discretion of the Board, even if the Company has sufficient distributable cash to pay such dividends. The declaration of any dividend will depend on the Company's financial results, cash requirements, future prospects and other factors deemed relevant by the Board.

Dividends are not guaranteed, and the amount of any dividend may fluctuate or be reduced or eliminated. There can be no assurance as to the levels of dividends to be paid by the Company, if any. The market value of the common shares may deteriorate if the Company is unable to pay dividends in accordance with its intended dividend strategy, or not at all, and such deterioration may be material.

Cash flows/investment income

The Company generates income and cash flows primarily from interest and dividends from its portfolio investments, from financing activities, from investment management activities, from insurance contracts and from proceeds of the disposition of its investments. The availability of these sources of funds and the amount of funds generated from these sources are dependent upon various factors, many of which are outside of the Company's direct control. The Company's liquidity and operating results may be adversely affected if access to the capital markets is hindered, whether as a result of a downturn in market conditions generally or to matters specific to the Company, or if the value of the Company's investments decline, resulting in lesser proceeds on disposition and capital losses for the Company upon disposition.

Foreign exchange risk

A significant portion of the Company's investment portfolio is invested in U.S. dollar-denominated investments. To the extent that such exposure is not hedged, changes in the value of the U.S. dollar could have a negative impact on the Company's reported financial results and overall financial performance.

Major public health issues, and specifically the novel coronavirus COVID-19, could have an adverse impact on our financial condition and results of operations and other aspects of our business.

We are closely monitoring developments related to the COVID-19 pandemic to assess its impact on our and our portfolio companies' business. While, due to the evolving and highly uncertain nature of this event, it currently is not possible to estimate its impact precisely, the COVID-19 pandemic could impact the business, financial condition, results of operations, liquidity or prospects of the Company (including Ability) as well as our portfolio companies in a number of ways. For instance, our investment portfolio (and, specifically, the valuations of investment assets we hold) has been, and may continue to be, adversely affected as a result of market developments from the COVID-19 pandemic and uncertainty regarding its outcome. Moreover, changes in interest rates, reduced liquidity or a continued slowdown in U.S. or global economic conditions may also adversely affect the business, financial condition, results of operations, liquidity or prospects of the Company as well as our portfolio companies. Further, extreme market volatility may leave us and our portfolio companies unable to react to market events in a prudent manner consistent with our historical practices in dealing with more orderly markets. Although it is impossible to predict with certainty the potential full magnitude of the business and economic ramifications of this pandemic, including after restrictive measures have been relaxed or removed, COVID-19 has impacted, and may further impact, our business in various ways, including but not limited to:

- from an operational perspective, the activities of the Company's employees, as well as those of workforces of our vendors, service providers and counterparties, may be limited by the COVID-19 pandemic or efforts to mitigate the pandemic, including as a result of government-mandated shutdowns, requests or orders for employees to work remotely, and other social distancing measures, which could result in an adverse impact on our ability to conduct our business in the normal course;
- while the market dislocation caused by the COVID-19 pandemic may present attractive investment opportunities, due to increased volatility in the financial markets, we may not be able to complete those investments;
- if the impact of the COVID-19 pandemic continues, we may have more limited opportunities to successfully exit existing investments, due to, among other reasons, lower valuations, decreased revenues and earnings, or lack of potential buyers with financial resources to pursue an acquisition, resulting in a reduced ability to realize value from such investments;
- our portfolio companies are facing or may face in the future increased credit and liquidity risk due to volatility in financial markets, reduced revenue streams, and limited or higher cost of access to preferred sources of funding, which may result in potential write-downs or write-offs in the value of our investments. Changes in the debt financing markets are impacting, or, if the volatility in financial market continues, may in the future impact, the ability of our portfolio companies to meet their respective financial obligations;

- borrowers of loans, notes and other credit instruments in our portfolio may be unable to meet their principal or interest payment obligations or satisfy financial covenants, resulting in a decrease in the value of our investments and lower than expected return. In addition, for variable interest instruments, lower reference rates resulting from government stimulus programs in response to the COVID-19 pandemic could lead to lower interest income;
- many of our portfolio companies operate in industries that are materially impacted by the COVID-19 pandemic, including but not limited to healthcare and consumer. Many of these companies are facing operational and financial hardships resulting from the spread of COVID-19 and related governmental measures, such as the closure of stores, restrictions on travel, quarantines or stay-at-home orders. If the disruptions caused by COVID-19 continue and the restrictions put in place are not lifted, the businesses of these portfolio companies could suffer materially or become insolvent, which would decrease the value of our investments;
- an extended period of remote working by the Company's employees could strain its technology resources and introduce operational risks, including heightened cybersecurity risk. Remote working environments may be less secure and more susceptible to hacking attacks, including phishing and social engineering attempts that seek to exploit the COVID-19 pandemic; and
- COVID-19 presents a significant threat to the Company's employees' well-being and morale. While the Company has implemented a business continuity plan to protect the health of its employees and has contingency plans in place for key employees or executive officers who may become sick or otherwise unable to perform their duties for an extended period of time, such plans cannot anticipate all scenarios, and the Company may experience potential loss of productivity or a delay in the roll out of certain strategic plans.

The Company may require authorizations as it expands the scope of its business

As the Company expands the scope of its business and investment strategy, aspects of its operations may require registration with regulatory authorities in the jurisdictions in which it operates. There can be no assurance that all required approvals or authorizations will be obtained on a timely basis or at all. If such approvals or authorizations are obtained, there can be no assurance that the Company will be successful in obtaining such approvals or authorizations on terms that permit the Company to expand the scope of its business and investment strategy successfully and realize potential benefits.

Deficiencies in the Company's financial reporting and disclosures could adversely impact its reputation

As the Company expands the size and scope of its business, there is a greater susceptibility that its financial reporting and other public disclosure documents may contain material misstatements and that the controls the Company maintains to ensure the complete accuracy of its public disclosures may fail to operate as intended. The occurrence of such events could adversely impact the Company's reputation and financial condition. In addition, the Company discloses certain metrics that do not have standardized meaning and are based on its own methodologies and assumptions, and which may not properly convey the information they purport to reflect.

Management is responsible for establishing and maintaining adequate internal controls over financial reporting to give the Company's stakeholders assurance regarding the reliability of its financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. However, the process for establishing and maintaining adequate internal controls over financial reporting has inherent limitations, including the possibility of human error. The Company's internal controls over financial reporting may not prevent or detect misstatements in the Company's financial disclosures on a timely basis, or at all. Some of these processes may be new for certain subsidiaries in the Company's structure and in the case of acquisitions may take time to be fully implemented.

The Company's disclosure controls and procedures are designed to provide assurance that information required to be disclosed by the Company in reports filed or submitted under Canadian securities laws is recorded, processed, summarized and reported within the time periods specified. The Company's policies and procedures governing disclosures may not ensure that all material information regarding the Company is disclosed in a proper and timely fashion, or that the Company will be successful in preventing the disclosure of material information to a single person or a limited group of people before such information is generally disseminated.

Failure to maintain the security of the Company's information and technology systems could have a material adverse effect on the Company

The Company relies on certain information and technology systems, including the systems of others with whom the Company does business, which may be subject to security breaches or cyber-terrorism intended to obtain unauthorized access to proprietary information or personally identifiable information, destroy data or disable, degrade or sabotage these systems, through the introduction of computer viruses, fraudulent emails, cyber-attacks or other means. Such acts of cyber-terrorism could originate from a variety of sources including our own employees or unknown third parties. In the ordinary course of our business, the Company collects and stores sensitive data, including personally identifiable information of the Company's employees and clients. Data protection and privacy rules have become a focus for regulators globally. Although the Company takes various measures to ensure the integrity of its systems and to safeguard against failures or security breaches, there can be no assurance that these measures will provide adequate protection, and a compromise in these systems could go undetected for a significant period of time. If these information and technology systems are compromised, the Company could suffer a disruption in one or more of our businesses and experience, among other things, financial loss; a loss of business opportunities; misappropriation or unauthorized release of confidential or personal information; damage to our systems and those with whom the Company does business; violations of privacy and other laws, litigation, regulatory penalties or remediation and restoration costs (particularly in light of increased regulatory focus

on cyber-security by regulators around the world); as well as increased costs to maintain the Company's systems. This could have a negative impact on the Company's operating results and cash flows and result in reputational damage.

The failure of the Company's information technology systems, or those of our third-party service providers, could adversely impact our reputation and financial performance

The Company operates in businesses that are dependent on information systems and technology, and the Company relies on third-party service providers to manage certain aspects of the Company's businesses, including for certain information systems and technology, data processing systems, and the secure processing, storage and transmission of information. In particular, the Company's financial, accounting and communications processes are all conducted through data processing systems. The Company's information technology and communications systems and those of its third-party service providers are vulnerable to damages or disruption from fire, power loss, telecommunications failure, system malfunctions, natural disasters, acts of war or terrorism, employee errors or malfeasance, computer viruses, cyber-attacks or other events which are beyond the Company's control. The Company's information systems and technology and those of our third-party vendors may not continue to be able to accommodate the Company's growth and the cost of maintaining such systems may increase from its current level, either of which could have a material adverse effect on the Company. Any interruption or deterioration in the performance or failures of the information systems and technology that are necessary for the Company's businesses, including for business continuity purposes, could impair the quality of the Company's operations and could adversely affect the Company's business, financial condition and reputation.

Risks Related to the Company's Securities

No current market for Warrants

There is currently no market through which the Warrants may be sold, and such a market may not develop, therefore, holders may not be able to resell the Warrants. This may affect the pricing of the Warrants in the secondary market, the transparency and availability of trading prices and the liquidity of the Warrants. The Company does not intend to apply to list the Warrants on the NEO Exchange or any other stock exchange.

Valuation of Cline

The Group holds an investment in the equity and bonds of Cline. Under a restructuring plan involving Cline, approved by the courts in 2015, the Group owns all of the equity and the senior secured bonds of Cline post-restructuring. On July 15, 2019, the Former Manager announced that Cline had entered into a conditional term sheet with Allegiance Coal Limited for the purchase and sale of all of the shares of NECC, which holds all the mining assets of Cline. The fair value of Cline was determined based on the net present value of expected proceeds resulting from the proposed sale of Cline's mining assets. The estimated fair value is based on assumptions related to the completion of the announced transaction and the future operations of the mine. Should the underlying assumptions change, the estimated fair value could change by a material amount.

On January 22, 2020, the Former Manager announced that Cline had entered into a binding agreement for the sale by Cline to Allegiance Coal Limited of all the shares in NECC. The total acquisition cost is CAD\$55.0 million to be comprised of a mix of cash, shares of Allegiance Coal Limited and deferred cash payments that will be subject to certain conditions. Completion of the sale was to take place before July 15, 2020 and was subject to certain conditions, including Allegiance Coal Limited raising start-up capital for the mine, which was estimated to be \$55 million at the time of the announcement. On June 5, 2020, the Former Manager announced that Cline had amended the binding agreement for the sale by Cline to Allegiance of all the shares of NECC with respect to, among other things, the structure of the consideration payable by Allegiance, and subsequently announced that the completion of the transaction is estimated to take place before the end of October 2020. On October 27, 2020, the Former Manager announced that the completion of the transaction took place on October 26, 2020. On February 24, 2021, the Company received \$0.5 million from the Former Manager in connection with the sale. The distribution by the Company of any proceeds received from the Cline transaction will be made in accordance with the terms of the indenture governing the CVRs.

CVR holders may not receive a further payment on the CVRs

Other than a residual balance currently held by the Company for payment on the CVRs, the right to receive any further payment on the CVRs will be contingent upon the satisfaction of Contingent Payment Events. If a Contingent Payment Event is not achieved for any reason, payments will not be made on the CVRs. Accordingly, the value, if any, of the CVRs is speculative, and the CVRs may ultimately have no value.

The CVRs are difficult to value

If any payment is made on the CVRs, it will not be made until the satisfaction of the Contingent Payment Event. As such, it may be difficult to value the CVRs, which may affect the market price and/or make it difficult or impossible for a holder to sell its CVRs. In addition, the amount payable to holders of CVRs in respect of a particular Contingent Payment Event will be net of certain fees, expenses, costs (including transaction costs) and taxes payable by the Company in respect of such Contingent Payment Event.

The Canadian federal income tax treatment of the CVRs is unclear

There is no legal authority directly addressing the Canadian federal income tax treatment of the CVRs and the consequences of the acquisition, holding and disposition of the CVRs are therefore unclear for such purposes. Holders are urged to consult their own tax advisors regarding the Canadian federal income tax consequences to them of the acquisition, holding and disposition of CVRs.

No current market exists for CVRs

There is currently no market through which the CVRs may be sold, and such a market is not expected to develop. Accordingly, holders may not be able to resell the CVRs. This may affect the pricing of the CVRs in the secondary market, the transparency and availability of trading prices, the liquidity of the CVRs and the extent of issuer regulation. The Company does not intend to apply to list the CVRs on the NEO Exchange or any other stock exchange.

Because there will not be an active public market for the CVRs, the market price of the CVRs, if any, may be volatile
The market price of the CVRs, if any, could fluctuate significantly for many reasons, including, without limitation:

- as a result of the risk factors listed in the Annual Information Form;
- it is not expected that the CVRs will be posted for trading on any stock exchange;
- an inability to complete a Contingent Payment Event;
- Cline's operating performance;
- legal or regulatory changes that could impact the business of Cline; and
- general economic, securities markets and industry conditions.

Risks Related to the Business – Lending

Credit risks

The assets and other debt securities in which the Company invests are subject to credit and liquidity risk. Any loan investment may become a defaulted obligation for a variety of reasons, including non-payment of principal or interest, as well as covenant violations by the borrower in respect of the underlying loan documents. A defaulted loan may become subject to either substantial workout negotiations or restructuring, which may entail, among other things, a substantial reduction in the interest rate, a substantial write-down of principal, and a substantial change in the terms, conditions and covenants with respect to such defaulted loan. In addition, such negotiations or restructuring may be extensive and protracted over time, and therefore may result in substantial uncertainty with respect to the ultimate recovery on such defaulted loan. In addition, substantial costs and resources in such situations may be imposed on the Company, further affecting the value of the investment. The liquidity in defaulted loans may also be limited, and to the extent that defaulted loans are sold, it is highly unlikely that the proceeds from such sale will be equal to the amount of unpaid principal and interest thereon, which would adversely affect the Company's net asset value and consequently, the market value of the Company's common shares.

Due diligence risks

The due diligence process undertaken by the Company in connection with investments that it makes or wishes to make, may not reveal all relevant facts in connection with an investment. Before making investments, the Company will conduct due diligence investigations that it deems reasonable and appropriate based on the facts and circumstances applicable to each investment. When conducting due diligence investigations, the Company may be required to evaluate important and complex business, financial, tax, accounting, environmental and legal issues. Outside consultants, legal advisors, accountants and investment banks may be involved in the due diligence process in varying degrees depending on the type of investment. Nevertheless, when conducting due diligence investigations and making an assessment regarding an investment, the Company relies on resources available, including information provided by the target of the investment and, in some circumstances, third party investigations. The due diligence investigations that are carried out with respect to any investment opportunity may not reveal or highlight all relevant facts that may be necessary.

Price declines in the medium- and large-sized corporate debt market may adversely affect the fair value of the Company's portfolio, reducing the net asset value through increased net unrealized depreciation

Conditions in the medium- and large-sized corporate debt market may deteriorate, as seen during the 2008 financial crisis, which may cause pricing levels to similarly decline or be volatile. During the 2008 financial crisis, many institutions were forced to raise cash by selling their interests in performing assets in order to satisfy margin requirements or the equivalent of margin requirements imposed by their lenders and/or, in the case of hedge funds and other investment vehicles, to satisfy widespread redemption requests. This resulted in a forced deleveraging cycle of price declines, compulsory sales, and further price declines, with falling underlying credit values, and other constraints resulting from the credit crisis generating further selling pressure. If similar events again occurred in the medium- and large-sized corporate debt market, the Company's net asset value could decline through an increase in unrealized depreciation and incurrence of realized losses in connection with the sale of the Company's investments, which could have a material adverse impact on the Company's business, financial condition and results of operations.

Financing of mid-market businesses

The Company's loan portfolio consists and is expected to consist primarily of loans provided to mid-market businesses, including privately-owned companies, many of which do not publicly report their financial condition and are not subject to the same accounting rules and securities laws that govern disclosure and financial controls of public companies. Compared to larger, publicly-traded companies, loans offered to these types of businesses may carry more inherent risk. Borrowers of the Company may generally have limited access to capital and have higher funding costs. Such businesses may need more capital to expand or compete and may be unable to obtain financing from public capital markets or from traditional sources, such as commercial banks. Mid-market businesses may also have shorter operating histories, narrower product lines and smaller market shares than larger businesses, which tend to render them more vulnerable to competitors' actions and market conditions, as well as general economic downturns. Additionally, because many of the borrowers of the Company will not publicly report their financial condition and may not have sophisticated financial controls and oversight, the Company is more susceptible to a client's misrepresentation. The failure of a

borrower to accurately report its financial position could result in the Company providing loans to a borrower that does not meet the Company's underwriting criteria, defaults on payments owing to the Company, the loss of some or all of the principal of a loan, or non-compliance by a borrower with applicable covenants. Accordingly, loans offered to these types of businesses involve higher risk than loans offered to larger businesses with greater financial resources or that are otherwise able to access traditional credit sources.

Dependence on the performance of borrower clients

The Company is dependent on the operations, assets and financial health of borrowers to which it directly and indirectly provides capital. If the financial performance of its borrowers decline, cash payments to the Company will likely decline. The failure of any borrower to fulfill its payment obligations to the Company could adversely affect the Company's financial condition and cash flow.

Risks facing borrower clients

Each borrower client is also subject to risks which affects its financial condition. As the Company is not privy to all aspects of its clients' businesses, it is impossible to predict exactly what risks borrowers will face. Nonetheless, typical risks include the following: (i) the success of the Company's borrowers may depend on the management talents and efforts of certain key persons or a small group of persons. The death, disability or resignation of one or more of these persons could have a material adverse effect on a borrower; (ii) borrowers may require additional working capital to carry out their business activities and to expand their businesses. If such working capital is not available, or is not available on beneficial terms, the financial performance and development of the businesses of the borrowers may be adversely affected; (iii) damage to the reputation of the borrowers' brands could negatively impact consumer opinion of those businesses or their related products and services, which could have an adverse effect on their business; (iv) borrowers may face competition, including competition from companies with greater financial or other resources, more extensive development, manufacturing, marketing, and other capabilities. There can be no assurance that the Company's borrower clients will be able to successfully compete against their competitors or that such competition will not have a material adverse effect on their businesses; (v) borrowers may experience reduced revenues from the loss of one or more customers representing a high percentage of their revenues; (vi) borrowers may experience reduced revenues due to an inability to meet regulatory requirements, or may experience losses of revenues due to unforeseeable changes in regulations imposed by various levels of government; (vii) borrowers may rely on government or other subsidy programs for revenue or profit generation. Changes to or elimination of such programs may have an adverse effect on the borrower; and (viii) borrowers may derive some of their revenues from foreign sources and may experience negative financial results based on foreign exchange losses, hedging costs or foreign investment restrictions.

Prepayment by borrower client

Certain of the loans provided by the Company may be prepayable by the borrowers, subject to prepayment penalties. The Company is unable to predict if or when a borrower will make a prepayment. Typically, a borrower's decision to prepay depends on its continued positive economic performance and the existence of favorable financing market conditions that permit the borrower to replace its existing financing with less expensive capital. As market conditions change frequently, it is difficult to predict if or when a borrower may deem market and business conditions to be favorable for prepayment. Prepayment by a borrower may have the effect of reducing the achievable yield of the loan to a level below that which was anticipated by the Company. Such a reduction may occur when the Company is unable to invest the funds prepaid by the borrower in other transactions with an expected yield greater than or equal to the yield the Company expected to receive from the prepaying borrower.

Default by and bankruptcy of a borrower client

A borrower's failure to satisfy its borrowing obligations, including any covenants imposed by the Company, could lead to defaults and the termination of the borrower's loans and enforcement against its assets. In order to protect and recover its investments, the Company may be required to bear significant expenses (including legal, accounting, valuation and transaction expenses) to the extent necessary to seek recovery upon default or to negotiate new terms with a defaulting borrower. In certain circumstances, a borrower's default under one loan could also trigger cross-defaults under other agreements and jeopardize that borrower's ability to meet its obligations under a loan agreement it may have with the Company.

Second priority liens on collateral securing debt investments that the Company makes to its portfolio companies may be subject to control by senior creditors with first priority liens. If there is a default, the value of the collateral may not be sufficient to repay in full both the first priority creditors and the Company

Certain debt investments that the Company makes in portfolio companies may be secured on a second priority basis by the same collateral securing first priority debt of such companies. The first priority liens on the collateral will secure the portfolio company's obligations under any outstanding senior debt and may secure certain other future debt that may be permitted to be incurred by the Company under the agreements governing the loans. The holders of obligations secured by the first priority liens on the collateral will generally control the liquidation of and be entitled to receive proceeds from any realization of the collateral to repay their obligations in full before the Company. In addition, the value of the collateral in the event of liquidation will depend on market and economic conditions, the availability of buyers and other factors. There can be no assurance that the proceeds, if any, from the sale or sales of all of the collateral would be sufficient to satisfy the debt obligations secured by the second priority liens after payment in full of all obligations secured by the first priority liens on the collateral. If such proceeds are not sufficient to repay amounts outstanding under the debt obligations secured by the second priority liens, then the Company, to the extent not repaid from the proceeds of the sale of the collateral, will only have an unsecured claim against the Company's remaining assets, if any.

The rights the Company may have with respect to the collateral securing the debt investments it makes to its portfolio companies with senior debt outstanding may also be limited pursuant to the terms of one or more intercreditor agreements that the Company enters into with the holders of senior debt. Under such an intercreditor agreement, at any time that obligations that have the benefit of the first priority liens are outstanding, any of the following actions that may be taken in respect of the collateral will be at the direction of the holders of the obligations secured by the first priority liens: the ability to cause the commencement of enforcement proceedings against the collateral; the ability to control the conduct of such proceedings; the approval of amendments to collateral documents; releases of liens on the collateral; and waivers of past defaults under collateral documents. The Company may not have the ability to control or direct such actions, even if its rights are adversely affected.

Collateral securing the Company's loans

Where the loans provided by the Company are secured by a lien on specified collateral of the borrower (particularly inventory, receivables and tangible fixed assets), there is no assurance that the Company will have obtained or properly perfected its liens, or that the value of the collateral securing any particular loan will protect the Company from suffering a partial or complete loss if the loan becomes non-performing and the Company moves to enforce against the collateral. In such event, the Company could suffer losses that could have a material adverse effect. In addition, during its underwriting process, the Company will make an estimate of the value of the collateral. A decrease in the market value of collateral assets at a rate greater than the rate projected by the Company may adversely affect the current realization values of such collateral. The degree of realization risk varies by the business of the borrower and the nature of the security.

Control over borrower clients

The Company will not always be in a position to exercise control over its borrower clients or prevent decisions by the management or shareholders of a borrower that may affect the fair value of the Company's loan, or otherwise affect the ability of the borrower to repay its obligations to the Company. Furthermore, the Company does not intend to take significant equity positions in its borrower clients. The lack of liquidity of debt positions that the Company will typically hold in its borrower clients results in the risk that the Company may not be able to dispose of its exposure to the borrower in the instance where a borrower is underperforming. This could have a material adverse effect on the Company.

Securities of borrower clients

The Company anticipates lending to both public and private companies, which may include bonus features granting the Company securities of the client. The securities issued by private companies will be subject to legal and other restrictions on resale or will be otherwise less liquid than publicly traded securities. To the extent the Company receives any form of securities issued by private companies, it may be difficult for the Company to dispose of such holdings if the need arises. Furthermore, if the Company is required to liquidate all or a portion of the securities it holds in an illiquid company, it may realize significantly less than the value at which it had previously recorded its holdings. In addition, the Company may face restrictions imposed by securities law on its ability to liquidate or otherwise trade in securities of a borrower client, including, where the Company obtains material non-public information regarding such borrower.

Material non-public information

Certain of the Company's directors, officers or employees, and their respective affiliates, may serve as directors of, or in a similar capacity with, its borrowers. In the event that material non-public information is obtained with respect to its borrowers, such persons may become subject to trading restrictions under the internal trading policies of those companies or as a result of applicable law or regulations. As a result, the Company could be prohibited for a period of time from selling the securities of a borrower, to the extent it owns any, and such a prohibition could have a material adverse effect on the Company.

Illiquidity of loans

Due to the nature of the Company's financing strategy and portfolio, certain loans may have lengthy terms and may be outstanding for a substantial period of time before they are repaid or can be liquidated under conditions preferable to the Company or, in some cases, at all. Illiquid investments carry the risk that a buyer may not be found for such investments. Also, certain of the loans expected to be offered by the Company may be subject to legal or contractual restrictions which may impede the Company's ability to dispose of such assets which it might otherwise desire to do. To the extent that there is no liquid trading market for these loans, the Company may be unable to liquidate these assets or may suffer a loss.

Payment in-kind interest

Some of the loans and debt securities made by the Company may contain a payment in-kind, or PIK, interest provision. Loans with a PIK provision carry additional risk as the Company will not receive cash until such time as the "cash payment date" is reached (unless a portion of such loan is sold). If a borrower whose loan contains a PIK provision defaults, the Company may obtain no return on its investment.

Use of leverage and changes in interest rates may affect the Company's cost of capital and net investment income

Since the Company may from time to time use debt to finance a portion of its investments, its net investment income depends, in part, upon the difference between the rate at which it borrows funds and the rate at which it invests those funds. As a result, the Company can offer no assurance that a significant change in market interest rates will not have a material adverse effect on the Company's net investment income. In periods of rising interest rates when the Company has debt outstanding, the Company's cost of funds will increase, which could reduce its net investment income. The Company expects that its long-term fixed-rate investments

will be financed primarily with equity and long-term debt. The Company may use interest rate risk management techniques in an effort to limit its exposure to interest rate fluctuations. These activities may limit the Company's ability to participate in the benefits of lower interest rates with respect to the hedged portfolio. Adverse developments resulting from changes in interest rates or hedging transactions could have a material adverse effect on the Company's business, financial condition and results of operations.

The ability of the Company to service any future outstanding debt depends largely on its financial performance and is subject to prevailing economic conditions and competitive pressures. The amount of leverage that the Company employs at any particular time will depend on its assessments of market and other factors at the time of any proposed borrowing. As a result of the Company's use of leverage: (i) the common shares of the Company may be exposed to incremental risk of loss and a decrease in the value of the Company's loan portfolio would have a greater negative impact on the value of the common shares than if the Company did not use leverage; (ii) adverse changes in interest rates could reduce or eliminate the incremental income the Company receives from the proceeds of any leverage; (iii) the Company and, indirectly, its Shareholders, bear the entire cost of paying interest and repaying any borrowed funds; (iv) the Company's ability to pay dividends on its common shares may be restricted by covenants or other restrictions imposed by its lenders; (v) the Company's ability to amend its organizational documents or other agreements may be restricted if such amendments would result in a material adverse effect on its lenders; and (vi) the Company may, under some circumstances, be required to dispose of its assets under unfavorable market conditions in order to maintain its leverage, thus causing the Company to recognize a loss that might not otherwise have occurred. The extent to which the gains and losses associated with leveraged investing are increased will generally depend on the degree of leverage employed.

The interest rates of some of our term loans to our portfolio companies may be priced using a spread over LIBOR, which may be phased out in the future.

On July 27, 2017, the Financial Conduct Authority ("FCA") announced that it would phase out the London Interbank Offered Rate ("LIBOR") as a benchmark by the end of 2021. It is unclear whether new methods of calculating LIBOR will be established such that it continues to exist thereafter. On November 30, 2020, Intercontinental Exchange, Inc. ("ICE") announced that the ICE Benchmark Administration Limited, a wholly-owned subsidiary of ICE and the administrator of LIBOR, is considering extending the LIBOR transition deadline to the end of June 2023. As an alternative to LIBOR, for example, the U.S. Federal Reserve, in conjunction with the Alternative Reference Rates Committee, a steering committee comprised of large U.S. financial institutions, is considering replacing U.S.-dollar LIBOR with the Secured Overnight Financing Rate ("SOFR"), a new index calculated by short-term repurchase agreements, backed by Treasury securities. Abandonment of or modifications to LIBOR could have adverse impacts on newly issued financial instruments and our existing financial instruments which reference LIBOR. While some instruments may contemplate a scenario where LIBOR is no longer available by providing for an alternative rate setting methodology, not all instruments may have such provisions and there is significant uncertainty regarding the effectiveness of any such alternative methodologies. Abandonment of or modifications to LIBOR could lead to significant short-term and long-term uncertainty and market instability. If LIBOR ceases to exist, we and our portfolio companies may need to amend or restructure our existing LIBOR-based debt instruments and any related hedging arrangements that extend beyond 2021, which may be difficult, costly and time consuming. In addition, from time to time we invest in floating rate loans and investment securities whose interest rates are indexed to LIBOR. Uncertainty as to the nature of alternative reference rates and as to potential changes or other reforms to LIBOR, or any changes announced with respect to such reforms, may result in a sudden or prolonged increase or decrease in the reported LIBOR rates and the value of LIBOR-based loans and securities, including those of other issuers we or our funds currently own or may in the future own. It remains uncertain how such changes would be implemented and the effects such changes would have on us, issuers of instruments in which we invest and financial markets generally.

The expected discontinuation of LIBOR could have a significant impact on our business. The dollar amount of our outstanding debt investments and borrowings that are linked to LIBOR with maturity dates after the anticipated discontinuation date of 2021 is material. We anticipate significant operational challenges for the transition away from LIBOR including, but not limited to, amending existing loan agreements with borrowers on investments that may have not been modified with fallback language and adding effective fallback language to new agreements in the event that LIBOR is discontinued before maturity. Beyond these challenges, we anticipate there may be additional risks to our current processes and information systems that will need to be identified and evaluated by us. Due to the uncertainty of the replacement for LIBOR, the potential effect of any such event on our cost of capital and net investment income cannot yet be determined. In addition, the cessation of LIBOR could:

- Adversely impact the pricing, liquidity, value of, return on and trading for a broad array of financial products, including any LIBOR-linked securities, loans and derivatives that are included in our assets and liabilities;
- Require extensive changes to documentation that governs or references LIBOR or LIBOR-based products, including, for example, pursuant to time-consuming renegotiations of existing documentation to modify the terms of outstanding investments;
- Result in inquiries or other actions from regulators in respect of our preparation and readiness for the replacement of LIBOR with one or more alternative reference rates;
- Result in disputes, litigation or other actions with portfolio companies, or other counterparties, regarding the interpretation and enforceability of provisions in our LIBOR-based investments, such as fallback language or other related provisions, including, in the case of fallbacks to the alternative reference rates, any economic, legal, operational or other impact resulting from the fundamental differences between LIBOR and the various alternative reference rates;

- Require the transition and/or development of appropriate systems and analytics to effectively transition our risk management processes from LIBOR-based products to those based on one or more alternative reference rates, which may prove challenging given the limited history of the proposed alternative reference rates; and
- Cause us to incur additional costs in relation to any of the above factors.
- There is no guarantee that a transition from LIBOR to an alternative will not result in financial market disruptions, significant increases in benchmark rates, or borrowing costs to borrowers, any of which could have a material adverse effect on our business, result of operations, financial condition, and unit price.

Risks Related to the Business – Asset Management

We expect to derive an increasing amount of our revenues from funds managed pursuant to advisory agreements and collateral management agreements, either by us or another entity in which we have an economic interest relating thereto, that may be terminated

With respect to funds regulated under the United States Investment Company Act of 1940 (the "Investment Company Act"), including SCIM with respect to its management of CIF, and Logan Ridge, each fund's investment management agreement must be approved annually (or, in the case of Logan Ridge, annually after the expiration of its initial two-year term) by such fund's board of directors or by the vote of a majority of the stockholders and the majority of the independent members of such fund's board of directors and, in certain cases, by its stockholders, as required by law. In addition, as required by the Investment Company Act, CIF has the right to terminate the CIF Advisory Agreement without penalty upon 60 days' written notice to SCIM and Logan Ridge has the right to terminate the Logan Ridge Investment Advisory Agreement without penalty upon 60 days' written notice to ML Management. In addition, we, through ML Management, receive management fees pursuant to the investment management agreement for acting as the investment manager of certain assets of Ability. There can be no assurance that the CIF Advisory Agreement, the Logan Ridge Investment Advisory Agreement, the investment management agreement in respect of Ability or similar agreements that we may enter into in the future will remain in place.

We, through ML Management, receive collateral management fees pursuant to collateral management agreements for acting as the collateral manager of the CLOs. If all the notes issued by one of the CLOs are redeemed, or if the collateral management agreement is otherwise terminated, we will no longer receive collateral management fees from that CLO. In general, a collateral management agreement may be terminated both with and without cause at the direction of holders of a specified supermajority in principal amount of the notes issued by the CLO. Furthermore, such fees are based on the total amount of assets held by the CLO. If the assets held by the CLO are prepaid or go into default, we will receive lower collateral management fees than expected or the collateral management fees may be eliminated.

In addition, collateral management agreements typically provide that if certain over-collateralization tests are failed, the collateral management agreement may be terminated by a vote of the security holders resulting in our loss of management fees from these CLOs.

If any of our CLOs fail to meet over-collateralization tests relevant to the CLO's most senior existing debt, an event of default may occur. Upon an event of default, our ability to manage the CLO may be terminated and our ability to attempt to cure any defaults in the CLO would be limited, which would increase the likelihood of a reduction or elimination of cash flow and returns to us in those CLOs for an indefinite time.

The asset management business is competitive

The asset management business is competitive, with competition based on a variety of factors, including investment performance, business relationships, quality of service provided to investors, investor liquidity and willingness to invest, fund terms (including fees), brand recognition and business reputation. We compete for investors with a number of other asset managers, public and private funds, business development companies, interval funds and others. Numerous factors increase our competitive risks, including:

- a number of our competitors have greater financial, technical, marketing and other resources and more personnel than we do;
- several of our competitors have raised significant amounts of capital, and many of them have similar investment objectives to ours, which may create additional competition for investment opportunities and may reduce the size and duration of pricing inefficiencies that otherwise could be exploited;
- some of our competitors may have a lower cost of capital and access to funding sources that are not available to us, which may create competitive disadvantages for us with respect to our funds;
- some of our competitors may be subject to less regulation and, accordingly, may have more flexibility to undertake and execute certain business or investments than we do and/or bear less compliance expense than we do;
- some of our competitors may have better expertise or be regarded by investors as having better expertise in a specific asset class or geographic region than we do; and
- other industry participants may, from time to time, seek to recruit our investment professionals and other employees away from us.

In addition, the attractiveness of our funds relative to investments in other investment products could decrease depending on economic conditions. This competitive pressure could adversely affect our ability to make successful investments and limit our ability to raise future funds, either of which would adversely impact our business, results of operations and financial condition.

The Company requires third-party capital in order to grow its asset management business and the success of the asset management business depends on the Company's ability to appropriately allocate and deploy capital in a manner that produces targeted investment returns

The Company's asset management business depends on the Company's ability to fundraise third-party capital, deploy that capital effectively, and produce targeted investment returns.

The Company's ability to raise third-party capital depends on a number of factors, including many that are outside the Company's control. Poor investment performance could hamper the Company's ability to compete for these sources of capital or force the Company to reduce our management fees. If poor investment returns or changes in investment mandates prevent the Company from raising further capital from its existing partners, the Company may need to identify and attract new investors in order to maintain or increase the size of its private funds, and there are no assurances that the Company will be able to find new investors. Poor investment performance could result in the withdrawal of cash by existing investors in favor of better performing products. The Company's inability to retain existing investors and attract new investors could have an adverse impact on the Company's assets under management, management fees, carried interest, transaction fees, profitability and growth prospects. The Company cannot guarantee it will be able to achieve or maintain any particular level of assets under management and cannot guarantee it will be able to achieve positive relative returns, retain existing clients or attract new clients.

The successful execution of the Company's investing strategy is uncertain as it requires suitable opportunities, careful timing and business judgment, as well as the resources to complete asset purchases and restructure them, if required. There is no certainty that the Company will be able to identify suitable or sufficient opportunities that meet the Company's investment criteria and be able to acquire additional high-quality assets at attractive prices to supplement the growth of the asset management business in the short term, or at all.

If the Company is unable to successfully raise and deploy third-party capital into investments, the Company may be unable to collect management fees, carried interest or transaction fees, which would materially reduce the Company's revenue and cash flows and adversely affect the Company financial condition. If any of the Company's managed investments perform poorly or experience prolonged periods of volatility, or the Company is unable to deploy capital effectively, the Company's fee-based revenue, cash available for distribution and/or carried interest would decline. In addition, the Company could experience losses on its capital invested in its managed entities. Accordingly, the Company's expected returns on these investments may be less than the Company assumed in forecasting the value of the Company's business.

The asset management industry has experienced significant historical growth which may not continue

The Company's ability to generate revenues will be dependent on the growth of the asset management industry and by the Company's performance within the asset management industry. The asset management industry has experienced significant historical growth which may not continue and adverse economic conditions and other factors, including any significant decline in the financial markets, could affect market acceptance of the Company's services or result in clients withdrawing from the markets or decreasing their level and/or rate of investment. A decline in the growth of the asset management industry or other changes to the industry that discourage investors from investing with the Company and could affect the Company's ability to attract clients and result in a decline in revenues.

The Company is subject to numerous laws, rules, and regulatory requirements which may impact its business, including resulting in financial penalties, loss of business, and/or damage to its reputation in instances of non-compliance

The Company's ability to carry on business is dependent upon its compliance with, and continued registration under, securities legislation in the jurisdictions where it carries on business. Monitoring and responding to the rapidly changing securities regulatory environment requires significant managerial, operational and financial resources. Laws or regulations governing the Company's operations or particular investment products or services could be amended or interpreted in a manner that is adverse to the Company. Any change in the securities regulatory framework or failure to comply with these regulations could result in fines, temporary or permanent prohibitions on the Company's activities or the activities of some of the Company's personnel or reputational harm, which could materially adversely affect the Company's business, financial condition and results of operations.

The Company manages a limited number of funds and investments

The Company manages a limited number of funds and each fund may participate in a limited number of investments. The Company's entitlement to carried interest in respect of a particular fund depends on the returns generated in respect of the limited number of investments made by that fund. A fund's investments may be concentrated within relatively few industries, sectors, countries or regions. The Company and its fund investments may also be exposed to one or more common or systemic risks. The aggregate returns of the Company's funds, and therefore the amount of our carried interest, may be negatively affected by the unfavorable performance of a single investment or small group or type of investments. The unfavorable performance of even a single fund may have a material adverse effect on the Company's business, operations and financial results.

Changes in Asset Management Fees

Investors in future funds may negotiate to pay the Company lower management fees, reimburse the Company for fewer expenses or change the economic terms of the Company's future funds to be less favorable than those of the Company's current funds, reducing our financial opportunity from those asset management activities.

Risks Related to the Business – Insurance

The Company's insurance business is heavily regulated and changes in regulation could reduce the Company's profitability

The Company's insurance and reinsurance subsidiary, being Ability, is highly regulated by insurance regulators in the United States and changes in regulations affecting the Ability's insurance business may reduce the Company's profitability and limit its growth. Ability operates in 42 U.S. states and the District of Columbia. The insurance and reinsurance industry is generally heavily regulated and Ability's operations in each of these jurisdictions are subject to varying degrees of regulation and supervision. The laws and regulations of the jurisdictions in which Ability operates may require Ability to, among other things, maintain minimum levels of statutory capital, surplus and liquidity, meet solvency standards, submit to periodic examinations of its financial condition, and restrict payments of dividends and distributions of capital. Ability is also subject to laws and regulations that may restrict its ability to write insurance and reinsurance policies, make certain types of investments and distribute funds. With respect to investments, Ability must comply with applicable regulations regarding the type and concentration of investments it may make. These restrictions are set forth in investment guidelines that ML Management must comply with when providing investment management to Ability. These restrictions may limit Ability's ability to invest and ML Management's ability to earn fees on those investments. In addition, Ability is subject to laws and regulations governing affiliate transactions. The investment management agreements between ML Management and Ability were approved by applicable insurance regulators, and any changes of such agreements, including with respect to fees, must receive applicable approval. These affiliate transaction rules are particularly important to Ability given its relationship with ML Management.

In connection with the conduct of Ability's insurance and reinsurance business, it is crucial that Ability establish and maintain good working relationships with the various regulatory authorities having jurisdiction over its business. If those relationships and that reputation were to deteriorate, Ability's business could be materially adversely affected. For example, Ability requires various consents and approvals from its regulators, both with respect to transactions Ability enters into and in the ordinary course of the conduct of its business. If Ability fails to maintain good working relationships with its regulators, it may become more difficult or impossible for Ability to obtain those consents and approvals, either on a timely basis or at all.

Regulations applicable to Ability and interpretations and enforcement of such regulations may change. Insurance regulators have increased their scrutiny of the insurance regulatory framework in the United States. Ability is unable to predict whether, when or in what form legislators will enact legislative and regulatory changes, and Ability cannot provide any assurances that more stringent restrictions will not be adopted from time to time in jurisdictions in which Ability conducts business.

The cost of compliance with existing laws and regulations is high and the cost of compliance with any new regulatory requirements could have a significant and negative effect on Ability's business. Ability may not be able to comply fully with, or obtain desired exemptions from, any such new laws and regulations that govern the conduct of Ability's business. Failure to comply with, or to obtain desired authorizations and/or exemptions under, any applicable laws could result in restrictions on Ability's ability to do business or undertake activities that are regulated in one or more of the jurisdictions in which Ability operates, could impact Ability's potential growth and could subject Ability to fines and other sanctions. In addition, changes in the laws or regulations to which Ability is subject, or in the interpretations thereof by enforcement or regulatory agencies, could have a material adverse effect on Ability's business, results of operations and financial condition.

The acquisition of Ability may not achieve its intended benefits, and certain difficulties, costs or expenses may outweigh such intended benefits

The Company may be unable to realize the anticipated benefits of the Ability acquisition in the timeframe that it expects or at all. Achieving the anticipated benefits, including the acquisition's impact on the Company's assets under management, fee paying assets under management, book value, fee related earnings and after-tax distributable earnings, is subject to a number of uncertainties, including whether the Ability business will continue to operate and grow in the manner the Company anticipates. While Ability is expected to continue to operate as a separate business, the acquisition may result in material difficulties, costs, and expenses, including:

- incremental operating costs arising from the integration of certain standards, controls, procedures and policies, including Ability's obligations to provide financial reporting as a subsidiary of a public company;
- unknown potential liabilities of Ability, including those for which the Company may become responsible or take responsibility;
- the potential loss of key employees at Ability and the costs associated with our efforts to retain or replace them;
- disruptions or perceived disruptions resulting from the acquisition that may affect Ability's relationships with its policyholders and counterparties; and
- the significant attention required from the Company's senior management.

A significant portion of the benefit of the Ability acquisition is anticipated to come from ML Management's role as investment manager for Ability. ML Management has not previously managed the entirety of the investment assets of an insurance company or assets of insurance companies at this scale, and the Company may not achieve its objectives. In addition, ML Management's

investment management activities will require the assistance of Ability employees, with whom the Company has not historically worked.

A number of the foregoing factors will be outside of the Company's control and any one of them could result in increased costs, decreases in the amount of expected revenues and diversion of management's time and energy, which could adversely affect the Company's and Ability's business, financial condition and results of operations. In addition, other events outside of the Company's control, including, but not limited to, political climate, the severity and duration of the COVID-19 pandemic, and regulatory or legislative changes, could also adversely affect the Company's ability to realize the anticipated benefits from the Ability acquisition. As a result of these risks, the Company may fail to realize some or all of the anticipated benefits of the Ability acquisition or in an amount sufficient to offset the potential difficulties, costs and expenses arising from the acquisition. Accordingly, shareholders of the Company and potential investors should not place undue reliance on the Company's expectation of the anticipated benefits from the acquisition.

In addition, while the Company expects Ability to continue to operate as a separate business with its existing brands and management team following the acquisition, acquiring Ability adds significantly to the scale and scope of the Company's overall business and operations. The Company has never owned an insurance company. Acquiring Ability changes the risks to which the Company is subject and may give rise to new and unexpected operational risks that could offset some of the benefits the Company expects from the acquisition.

Inclusion of Ability's business as a consolidated subsidiary of the Company will result in certain additional risks to the Company, which risks are expected to be material and could have a material adverse effect on the Company's future results of operations and financial condition

Ability operates its business as a consolidated subsidiary of the Company. The Company has not historically engaged in a business similar to Ability and Ability's business and structure pose additional risks to the Company, many of which may be material. These risks include, but are not limited to:

- business operational risks, including, interest rate and credit spread fluctuations and the impact of such changes on interest-sensitive products, the competitive nature of the insurance and reinsurance industry, the illiquidity of certain investment assets and the potential difficulty of selling and/or realizing full value on such assets if necessary and the performance of third-party service providers;
- risks related to Ability's growth strategy, which includes reinsurance of insurance obligations written by unaffiliated insurance companies, the ability to identify attractive insurance markets, reinsurance opportunities, or investments with returns as favorable as those obtained historically, and ability to effectively manage its growth;
- regulatory risks relating to the insurance and reinsurance industries, including capital regulations, laws or regulations which impose meaningful limitations on its business, fiduciary or best interest standards in connection with the sale of Ability's products, regulations relating to reserves and obligations to pay assessments through guaranty associations, changes in statutory accounting principles, heightened privacy regulations, and uncertainty regarding future changes in regulations;
- risks related to guarantees within certain of Ability's insurance products;
- any gaps in Ability's risk management policies and procedures, which may leave it exposed to unidentified or unanticipated risk; and
- risks associated with the business Ability reinsures and business it cedes to reinsurers.

Each of these risks could have material adverse effect on the Company's results of operations and financial condition.

Ability operates in a highly competitive industry that includes a number of companies, many of which are larger and more well-known, which could limit Ability's ability to increase or maintain market share and/or margins

Ability operates in highly competitive markets and competes with large and small industry participants. Ability faces intense competition, based upon price, terms and conditions, relationships with distribution partners and other clients, quality of service, capital and perceived financial strength (including independent rating agencies' ratings), technology, innovation, ease of use, capacity, product breadth, reputation and experience, brand recognition and claims processing.

Ability's competitors include other insurers, reinsurers and other financial institutions that offer investment products. Many of Ability's competitors are large and well-established, and some have greater market share or breadth of distribution, assume a greater level of risk while maintaining financial strength ratings, or have higher financial strength, claims-paying or credit ratings than Ability does or benefit, by offering various lines of insurance, from diversification of risks and possible positive impacts on capital requirements. Ability's competitors may also have lower operating costs than Ability, which may allow them to price insurance products, reinsurance solutions or acquisitions more competitively. Furthermore, Ability may face greater operational complexity when compared to competitors who offer a more limited range of products due to the breadth of Ability's product offering.

Competition in the industry could result in increased pressure on the pricing of certain of Ability's products and services, and could harm Ability's ability to maintain or increase profitable growth. For example, fixed annuity sales are materially impacted by the crediting rate offered on Ability's fixed annuities compared to that offered by its competitors. There can be no guarantee that Ability will be able or choose to set crediting rates at competitive levels, which may impact sales. Moreover, sales to fiduciaries may be materially impacted by Ability's ability and willingness to offer one of the most competitive crediting rates.

Because of the highly competitive nature of the insurance industry, there can be no assurance that Ability will maintain or grow its market share, continue to identify attractive opportunities in either the individual or institutional markets, or that competitive pressure will not have a material adverse effect on Ability's business, results of operations and financial condition.

Differences between Ability's policyholder behavior estimates, reserve assumptions and actual claims experience, in particular with respect to the timing and magnitude of claims and surrenders, may adversely affect Ability's results of operations or financial condition

Ability holds reserves to pay future policy benefits and claims. Ability's reserves are estimated based on data and models that include many assumptions and projections, which are inherently uncertain and involve significant judgment, including assumptions as to the levels and/or timing of receipt or payment of premiums, benefits, claims, expenses, interest credits, investment results (including equity and other market returns), mortality, morbidity, longevity and persistency.

While Ability periodically reviews the adequacy of its reserves and the assumptions underlying those reserves, Ability cannot determine with precision the amounts that Ability will pay for, or the timing of payment of, actual benefits, claims and expenses or whether the assets supporting policy liabilities, together with future premiums, will grow to the level assumed prior to the payment of benefits or claims. For Ability's reinsurance of fixed-rate annuities, reserves are equal to policyholder account balances before applicable surrender charges, and lapse, surrender rates and persistency assumptions are important assumptions used in calculating these reserves and drivers of profitability with respect to these products. [ACK4] Advances in technology, including predictive medical technology that enables consumers to select products better matched to their individual longevity or mortality risk profile and other medical breakthroughs that extend lives, could cause Ability's future experience to deviate significantly from actuarial assumptions, which could significantly impact the level of reserves and profitability. The resulting acceleration of expense amortization, reduced spread or increased payments could have a material adverse effect on Ability's business, financial condition and results of operations.

If actual experience differs significantly from assumptions or estimates, certain balances included in Ability's balance sheet may not be adequate, particularly deferred acquisition costs, value of business acquired, negative value or business acquired, policy reserves and other actuarial balances. If Ability concludes that its reserves, together with future premiums, are insufficient to cover future policy benefits and claims, Ability would be required to increase its reserves and incur income statement charges for the period in which it makes the determination, which could have a material adverse effect on Ability's business, financial condition and results of operations. An increase in the statutory reserves of Ability may negatively affect liquidity and capitalization.

Estimates used in the preparation of financial statements and models for insurance products may differ materially from actual experience

IFRS requires the application of accounting guidance and policies that often involve a significant degree of judgment when accounting for insurance products. These estimates include, but are not limited to, premium persistency, future policy benefits and related expenses, valuation of embedded derivatives, valuation and impairment of investments and amortization of deferred revenues and expenses, and the valuation and impairment of goodwill recognized in accordance with the Ability transaction. These accounting estimates require the use of assumptions, some of which are highly uncertain at the time of estimation. These estimates are based on judgment, current facts and circumstances and, when applicable, internally developed models. Therefore, actual results could differ from these estimates, possibly in the near term. Inaccuracies could result in, among other things, an increase in policyholder benefit reserves or acceleration of the amortization of deferred revenues and expenses, which would result in a charge to earnings, a restatement of Ability's historical financial statements or other material adjustments. Additionally, the potential for unforeseen developments, including changes in laws, regulations or accounting standards, may result in losses and loss expenses materially different from the reserves initially established.

In addition, Ability employs models to price products, calculate reserves and value assets, as well as evaluate risk and determine capital requirements, among other uses. These models rely on estimates and projections that are inherently uncertain, may use incomplete, outdated or incorrect data or assumptions and may not operate properly. As Ability's business continues to expand and evolve, the number and complexity of models it employs has grown, increasing exposure to error in the design, implementation or use of models, including the associated data input, controls and assumptions, and the controls in place to mitigate their risk may not be effective in all cases.

Ability's historical growth rates may not be indicative of its future growth, and Ability may not be able to identify attractive insurance markets, reinsurance opportunities or investments with returns that are as favorable as Ability's historical returns and grow new business volumes at historical levels

Ability's historical growth rates may not reflect its future growth rates. While Ability anticipates that it will continue to grow by deepening existing and adding new distribution relationships in Ability's individual market, pursuing attractive reinsurance opportunities and expanding its funding agreement business in the institutional market, taking advantage of investment opportunities

to support Ability's growth, developing new products and entering new markets, Ability may not be able to identify opportunities to do so. With future growth, there can be no guarantee that Ability's net underwriting return will be as favorable as its historic returns. Weaker margins may challenge Ability's ability to grow profitably or at the returns targeted. Further, in order to maintain or increase investment returns, it may be necessary to expand the scope of Ability's investing activities to asset classes in which Ability historically has not invested, which may increase the risk of Ability's investment portfolio. If Ability is unable to find profitable growth opportunities, it will be more difficult for Ability to continue to grow, and could negatively affect its results of operations and financial condition.

Ability's future growth depends on its ability to continue to offer and sell products that Ability's customers find attractive. Consumer preferences regarding annuities and life insurance are subject to change. In particular, due to market risks, consumers may not continue to view annuities as an attractive retirement savings product, which would impact Ability's ability to sell such products to its target consumers. In addition, there is no guarantee that younger generations will use life insurance products at the same rate as previous generations as a result of changes in savings habits and demographic shifts. Ability's expected growth is largely concentrated in fixed-rate annuities. However, this product may not continue to grow at historical market levels, and there can be no assurance that consumers will continue to prefer these products. Moreover, sales of Ability's products and continued future growth depend on its ability to offer competitive pricing and attractive policyholder benefits. For example, one factor impacting sales of fixed-rate annuities is the crediting rate Ability offers compared to that offered by its competitors. Ability sets its crediting rates based on expected investment returns, policyholder behavior assumptions and other factors that may be beyond Ability's control. Ability expects that overall sales of fixed-rate annuities will continue to be sensitive to changes in pricing, in particular when compared to pricing on comparable products such as bank certificates of deposit. If consumer preferences for Ability's products change, Ability's revenues and results of operations may be materially adversely impacted.

Ability faces risks associated with business it reinsures and business it cedes to reinsurers and which could cause a material adverse effect on Ability's business, results of operations and financial condition

As part of Ability's overall risk management strategy, it cedes business to other insurance companies through reinsurance. Ability's inability to collect from its reinsurers (including reinsurance clients in transactions where Ability reinsures business net of ceded reinsurance) on its reinsurance claims could have a material adverse effect on Ability's business, results of operations and financial condition. Although reinsurers are liable to Ability to the extent of the reinsurance coverage it acquires, Ability remains primarily liable as the direct insurer on all risks that it writes; therefore, Ability's reinsurance agreements do not eliminate its obligation to pay claims. As a result, Ability is subject to the risk that it may not recover amounts due from reinsurers. The risk could arise primarily in two situations: (i) Ability's reinsurers may dispute some of its reinsurance claims based on contract terms, and, as a result, Ability may receive partial or no payment; or (ii) Ability's reinsurers may default on their obligations. While Ability may manage these risks through transaction-related diligence, contract terms, collateral requirements, hedging, and other oversight mechanisms, Ability's efforts may not be successful. A reinsurer's insolvency, or its inability or unwillingness to make payments due to Ability under the terms of the relevant reinsurance agreements, could have a material adverse effect on Ability's business, results of operations and financial condition.

Ability also bears the risk that the companies that reinsure its mortality risk on a yearly renewable term, where the reinsurer may reset the premium and other terms each year, increase the premiums they charge to levels Ability deems unacceptable. If that occurs, Ability will either need to pay such increased premiums, which will affect margins and financial results, or alternatively, Ability will need to limit or potentially terminate reinsurance, which will increase the risks that Ability retains.

Conversely, Ability assumes liabilities from other insurance companies. Changes in the ratings, creditworthiness or market perception of such ceding companies or in the administration of policies reinsured to Ability could cause policyholders of contracts reinsured to Ability to surrender or lapse their policies in unexpected amounts. In addition, to the extent such ceding companies do not perform their obligations under the relevant reinsurance agreements, Ability may not achieve the results intended and could suffer unexpected losses. In either case, Ability has exposure to reinsurance clients, which could materially and adversely affect Ability's business, financial condition, results of operations and cash flows.

The determination of the amount of impairments and allowances for credit losses recognized on Ability's investments is highly subjective and could materially affect its results of operations or financial condition

The determination of the amount of impairments and allowances for credit losses is based upon Ability's periodic evaluation and assessment of known and inherent risks associated with the respective asset class and the specific investment being reviewed. Such evaluations and assessments are revised as conditions change and new information becomes available. Management updates its evaluations regularly and reflects changes in allowances and impairments in its financial results as such evaluations are revised. Impairments result in a non-cash charge to earnings during the period in which the impairment charge is taken. Changes in allowances for credit losses can result in either a charge or credit to earnings.

For example, an allowance is recognized on Ability's fixed maturity securities when the fair value of the security is less than its amortized cost basis and credit related losses are deemed to have occurred. The determination of the allowance requires assessment of the security's expected future cash flows, which depend on a variety of macroeconomic factors and security-specific considerations. Similarly, the determination of the allowance on Ability's mortgage and other loan receivables requires an assessment of expected credit losses that considers current, historical and forecasted macroeconomic data and loan-specific

factors. As expectations change based on macroeconomic data and individual investment considerations, the associated allowance for credit losses can be adjusted, up or down.

There can be no assurance that management has accurately determined the amount of impairments and allowances for credit losses recognized in Ability's financial statements and their potential impact on regulatory capital. Furthermore, additional impairments and allowance provisions may be taken in the future.

9. EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

The Company has established, and is maintaining, disclosure controls and procedures to provide reasonable assurance that material information relating to the Company is disclosed in annual filings, interim filings or other reports and recorded, processed, summarized and reported within the time periods specified as required by securities regulations. Management has evaluated the operating effectiveness of the Company's disclosure controls and procedures as at September 30, 2021 and, given the size of the Company and the involvement at all levels of the Chief Executive Officer and Chief Financial Officer, believes that they are sufficient to provide reasonable assurance that the Company's disclosures are compliant with securities regulations.

Management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. Management has designed such internal control over financial reporting to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS.

Because of its inherent limitations, the Company's internal control over financial reporting may not prevent or detect all possible misstatements or frauds. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with policies or procedures may deteriorate. Management has assessed the operating effectiveness of the Company's internal control over financial reporting and concluded that such internal controls were appropriately designed and operating effectively as at September 30, 2021.

During the nine months ended September 30, 2021, there were no changes to policies, procedures and processes that comprise the system of internal controls over financial reporting that may have affected, or are reasonably likely to materially affect, our internal control over financial reporting. Such controls and procedures are subject to continuous review and changes to such controls and procedures may require management resources and systems in the future.
