## Capital Stress Test

Hanmi is not required to perform a capital stress test; however, Hanmi’s risk management practices include an annual capital stress test for the Company and the Bank using applicable CCAR assumptions<sup>(4)</sup>

(1) Source: FDIC Financial Institution Letters (FIL-64-2023), as of December 18, 2023; also total ADC (Acquisition, Development, and Construction) loans are well below 100% of Bank’s total capital for all periods presented

(2) Six elements of regulatory guidance – (1) maintain strong capital levels, (2) ensure that credit loss allowances are appropriate, (3) manage construction and development (C&D) and CRE loan portfolios closely, (4) maintain updated financial and analytical information, (5) bolster the loan workout infrastructure, (6) maintain adequate liquidity and diverse funding sources

(3) Liquidity stress test based on deposits at March 31, 2024. Severe stress scenario makes the following stress assumptions: (a) 25% deposit outflow over 12 months, (b) Bank unable to replace wholesale deposits, and (c) federal fund lines cut off, and the following relief assumptions: (a) loan-and-securities based FHLB capacity adjusted down for increased haircut, and (b) Bank’s assets (loans) are sold to abate the liquidity crisis. Under “Stress Assumption”, funds available represent cash, securities, and borrowing capacity from FHLB. Under “Relief Assumption”, funds available represent funds under “Stress Assumption” and cash proceeds from loans sale

(4) Capital ratios at December 31, 2023 for the Company. 2024 CCAR makes the following assumptions: (a) trough real GDP growth declining by 11.6%, (b) peak unemployment rate reaching 10.0%, (c) housing prices declining by 36.0%, and (d) CRE valuations declining by 40.0%
