BigBear.ai's Pangiam Threat Detection Receives Dutch National Approval for Airport Security Screening

Milestone advances BigBear.ai's work bringing AI-enabled screening technology into regulated aviation security environments

MCLEAN, Va.--(BUSINESS WIRE)-- BigBear.ai (NYSE: BBAI), a specialized defense and security technology company providing mission-ready AI, today announced that Pangiam Threat Detection has received Dutch national approval from the Netherlands' National Coordinator for Counterterrorism and Security following testing by TNO, the Netherlands Organisation for Applied Scientific Research, an internationally recognized applied research institute and aviation security test center headquartered in The Hague.

The approval confirms that Pangiam Threat Detection met Automated Prohibited Items Detection System (APIDS) Standard 1 criteria and Dutch national additional detection requirements for aviation security screening in a configuration with SureScan Corporation's DETECT 1000 CT screening system.

This is the first milestone in a series of tests being undertaken with various certification bodies and with a range of OEMs.

Pangiam Threat Detection is BigBear.ai's AI-enabled screening platform for aviation security operations. The platform analyzes 3D CT scans of cabin baggage in near real time, flagging potential prohibited items for security officers and supervisors. The system has been honed to meet operators' needs with rapid decision resolution, demanding system resilience, and threat item and threat pattern analytics. Smart device-hosted user interfaces enhance decision-making, support remote security management, and enable incident escalation, training, and audit.

"For aviation security operators, trust is critical when introducing automation in regulated, high-consequence environments," said Kevin McAleenan, CEO of BigBear.ai. "This approval is an important validation of Pangiam Threat Detection and of our focus on delivering mission-ready AI that supports officers and supervisors as screening operations become more automated and operationally demanding."

This milestone builds on BigBear.ai's work integrating Pangiam Threat Detection with modern CT screening infrastructure and airport security workflows, while reinforcing the company's broader Trade and Travel Solutions portfolio and its effort to bring trusted, AI-enabled screening capabilities to regulated aviation and transportation environments.

Forward-Looking Statements

This press release contains "forward-looking statements." Such statements include, but are not limited to, statements regarding the intended use of proceeds from the private placement and may be preceded by the words "intends," "may," "will," "plans," "expects," "anticipates," "projects," "predicts," "estimates," "aims," "believes," "hopes," "potential" or similar words. Forward-looking statements are not guarantees of future performance, are based on certain assumptions and are subject to various known and unknown risks and uncertainties, many of which are beyond the Company's control, and cannot be predicted or quantified and consequently, actual results may differ materially from those expressed or implied by such forward-looking statements. These forward-looking statements are subject to a number of risks and uncertainties, including changes in domestic and foreign business, market, financial, political, and legal conditions; risks related to the uncertainty of the projected financial information (including on a segment reporting basis); risks related to delays caused by factors outside of our control, including changes in fiscal or contracting policies or decreases in available government funding; changes in government programs or applicable requirements; budgetary constraints, including automatic reductions as a result of "sequestration" or similar measures and constraints imposed by any lapses in appropriations for the federal government or certain of its departments and agencies; influence by, or competition from, third parties with respect to pending, new, or existing contracts with government customers; our ability to successfully compete for and receive task orders and generate revenue under Indefinite Delivery/Indefinite Quantity contracts; potential delays or changes in the government appropriations or procurement processes, including as a result of events such as war, incidents of terrorism, natural disasters, and public health concerns or epidemics; and increased or unexpected costs or unanticipated delays caused by other factors outside of our control, such as performance failures of our subcontractors; risks related to the rollout of the business and the timing of expected business milestones; the effects of competition on our future business; our ability to issue equity or equity-linked securities in the future, and those factors discussed in the Company's reports and other documents filed with the SEC, including under the heading "Risk Factors." More detailed information about the Company and the risk factors that may affect the realization of forward-looking statements is set forth in the Company's filings with the SEC, including the Company's Annual Report on Form 10-K and its Quarterly Reports on Form 10-Q. Investors and security holders are urged to read these documents free of charge on the SEC's web site at <http://www.sec.gov>. The Company assumes no obligation to publicly update or revise its forward-looking statements as a result of new information, future events or otherwise, except as required by law.
