Innoviz Technologies Partners with Vueron to Accelerate AI Development for Automotive and Smart Infrastructure Applications

- *Innoviz and Vueron signed an MOU to jointly establish a cloud-based environment for InnovizTwo LiDAR data to be integrated into Vueron's VueX AI development platform*
- *Integration between Innoviz's LiDAR data and Vueron's VueX's platform enables automated LiDAR data annotation and training*
- *Joint solution is demonstrated live at CES 2026*

TEL AVIV, Israel, Jan. 7, 2026 /PRNewswire/ -- Innoviz Technologies Ltd. (Nasdaq: INVZ) (the "Company" or "Innoviz"), a leading Tier-1 direct supplier of high-performance, automotive-grade LiDAR sensor platforms and complementary software stacks, announced today a partnership with Vueron Technology Co. Ltd., a leader in AI-powered LiDAR perception solutions. Through this collaboration, Innoviz LiDAR data from InnovizTwo and InnovizSMART is now integrated into Vueron's VueX AI development platform, enabling automotive manufacturers and smart infrastructure operators to accelerate their perception development through automated data annotation, training, and validation.

The integration can help accelerate LiDAR-based perception by streamlining the process of annotating and labeling sensor data for AI model development. Vueron's VueX platform

leverages advanced AI to automatically annotate LiDAR point cloud with bounding boxes and object classifications, significantly reducing the manual effort required while maintaining the precision needed for safety-critical applications. Users can upload Innoviz LiDAR data directly to the cloud-based VueX platform, where automated annotation tools process the data and allow for fine-tuning to achieve optimal accuracy.

Building on a previous relationship between the companies, when Innoviz's first-generation automotive-grade LiDAR, InnovizOne, was successfully used for Vueron's autonomous driving platform, such that the platform's users are now able to use Innoviz's high performance InnovizTwo LiDAR for automotive applications and InnovizSMART for smart infrastructure deployments for the VueX platform to provide an end-to-end AI cloud-based environment for data storage, visualization, processing, labeling, training, validation, and deployment.

"Our collaboration with Vueron represents an important step in making advanced LiDAR technology more accessible and easier to deploy," said Omer Keilaf, CEO and Co-Founder of Innoviz. "By integrating our automotive-grade sensors with Vueron's powerful AI development tools, we're enabling our customers to accelerate their development timelines and potentially reduce the complexity of bringing perception systems to market."

"Integrating Innoviz's high-performance LiDAR data into our VueX platform allows us to offer customers a comprehensive ai-based solution across automotive and infrastructure applications," said Noah Jang, SVP of Global Business at Vueron. "The combination of Innoviz's proven sensor technology with our automated annotation and training capabilities creates a powerful toolset that addresses real pain points in perception development."

Live Joint Demonstration at Vueron's Booth at CES 2026

The joint solution will be demonstrated live at Vueron's booth (LVCC, West Hall #3569) at CES 2026 in Las Vegas, January 6-9, where attendees can experience the integrated platform and explore use cases across automotive and smart infrastructure applications.

About Innoviz

Innoviz is a global leader in LiDAR technology, serving as a Tier-1 supplier to the world's leading automotive manufacturers and working towards a future with safe autonomous vehicles on the world's roads. Innoviz's LiDAR and perception software "see" better than a human driver and reduce the possibility of error, meeting the automotive industry's strictest expectations for performance and safety. Operating across the U.S., Europe, and Asia, Innoviz has been selected by internationally recognized premium car brands for use in consumer vehicles as well as by other commercial and industrial leaders for a wide range of use cases. About Vueron

Vueron is a company building perception and data infrastructure for real world autonomy. Drawing on deep experience in autonomous driving, robotics, and AI, Vueron helps teams by calibration to perception and deployment. By transforming raw LiDAR data into reliable, production-ready AI-based output, Vueron enables OEMs, Tier 1 suppliers, and infrastructure operators to move faster, reduce engineering overhead, and focus on solving real world mobility challenges. Vueron works with partners and customers across Asia, Europe, and the United States.

Forward Looking Statements

This announcement contains certain forward-looking statements within the meaning of the federal securities laws, including statements regarding the services offered by Innoviz, the anticipated technological capability of Innoviz's products, the markets in which Innoviz operates and Innoviz's projected future operational and financial results. These forward-looking statements generally are identified by the words "believe," "project," "expect," "anticipate," "estimate," "intend," "strategy," "future," "opportunity," "plan," "may," "should," "will," "would," "will be," "will continue," "will likely result," and similar expressions. Forward-looking statements are predictions, projections and other statements about future events that are based on current expectations and assumptions and, as a result, are subject to risks and uncertainties.

Many factors could cause actual future events to differ materially from the forward-looking statements in this announcement including but not limited to, the ability to implement business plans, forecasts, and other expectations, the ability to convert design wins into definitive orders and the magnitude of such orders, the ability to identify and realize additional opportunities, potential changes and developments in the highly competitive LiDAR technology and related industries, and our expectations regarding the impact of the evolving conflict in Israel to our ongoing operations. The foregoing list is not exhaustive. You should carefully consider such risk and the other risks and uncertainties described in Innoviz's annual report on Form 20-F for the year ended December 31, 2024, filed with the U.S. Securities and Exchange Commission ("SEC") on March 12, 2025 and in other documents filed by Innoviz from time to time with the SEC. These filings identify and address other important risks and uncertainties that could cause actual events and results to differ materially from those contained in the forward-looking statements. Forward-looking statements speak only as of the date they are made. Readers are cautioned not to put undue reliance on forward-looking statements, and Innoviz assumes no obligation and does not intend to update or revise these forward-looking statements, whether as a result of new information, future events, or otherwise. Innoviz gives no assurance that it will achieve its expectations.
