Norwegian Cruise Line Reports Financial Results for the Second Quarter 2014

100% Increase in Adjusted Earnings Per Share to \$0.58

MIAMI, July 28, 2014 (GLOBE NEWSWIRE) -- Norwegian Cruise Line (Nasdaq:NCLH) (Norwegian Cruise Line Holdings Ltd., NCL Corporation Ltd., "Norwegian" or "the Company"), today reported results for the quarter ended June 30, 2014, and provided guidance for the third quarter and full year 2014.

Second Quarter Highlights

- Adjusted EPS improvement to \$0.58 from \$0.29 in 2013
- Net Yield increase of 3.3%
- Revenue increase of 18.9% to \$765.9 million
- Adjusted EBITDA increase of 44.0% to \$219.4 million

Second Quarter Results

"This quarter marks the first full quarter with both Breakaway-class ships in operation," said Kevin Sheehan, president and chief executive officer of Norwegian Cruise Line. "Along with Norwegian Epic, these newer, premium, earnings-rich ships now comprise a little over a third of our capacity and contributed to the doubling of earnings in the quarter" continued Sheehan.

For the second quarter of 2014, the Company reported Adjusted EPS of \$0.58, on Adjusted Net Income of \$121.1 million, compared to \$0.29 for the same period in 2013. On a GAAP basis, diluted earnings per share and net income were \$0.54 and \$111.6 million, respectively.

Net Revenue in the period increased 23.6% to \$595.7 million driven by a 19.6% increase in Capacity Days and a 3.3% improvement in Net Yield (3.0% on a Constant Currency basis). The increase in Capacity Days was primarily from the addition of Norwegian Getaway and Norwegian Breakaway to the fleet in January 2014 and April 2013, respectively, and was partially offset by the planned dry-dock of Norwegian Jewel. The Net Yield improvement was due to higher Occupancy Percentage, higher onboard and other revenue and benefits from initiatives to reduce our cost of sales. Revenue for the period increased to \$765.9 million from \$644.4 million in 2013.

Adjusted Net Cruise Cost Excluding Fuel per Capacity Day decreased 2.3% (2.7% on a Constant Currency basis). The Company's fuel price per metric ton, net of hedges, was \$622 compared to \$686 in 2013. Fuel consumption per Capacity Day in the quarter decreased 5.1%.

Interest expense, net was \$31.9 million for the quarter. Interest expense, net in the same period in 2013 was \$103.7 million which included \$70.1 million of charges related to the refinancing of certain credit facilities and the redemption of certain of the Company's senior unsecured notes. Excluding these charges, Adjusted Interest Expense, net was \$33.6 million in 2013.

2014 Guidance and Sensitivities

In addition to the results for the second quarter, the Company also provided the following guidance for the third quarter and full year 2014, along with accompanying sensitivities.

"We are pleased to reiterate full year earnings guidance given the current promotional environment," said Sheehan. "We are taking advantage of opportunities to strategically invest in initiatives to increase brand awareness and enhance the guest experience to drive long term returns."

Non-GAAP Financial Measures

We use certain non-GAAP financial measures, such as Net Revenue, Net Yield, Net Cruise Cost, Adjusted Net Cruise Cost Excluding Fuel and Adjusted EBITDA to enable us to analyze our performance. We utilize Net Revenue and Net Yield to manage our business on a day-to-day basis and believe that they are the most relevant measures of our revenue performance because they reflect the revenue earned by us net of significant variable costs. In measuring our ability to control costs in a manner that positively impacts net income, we believe changes in Net Cruise Cost and Adjusted Net Cruise Cost Excluding Fuel to be the most relevant indicators of our performance.

As our business includes the sourcing of passengers and deployment of vessels outside of North America, a portion of our revenue and expenses are denominated in foreign currencies, particularly euro and British Pound sterling, which are subject to fluctuations in currency exchange rates versus our reporting currency, the U.S. dollar. In order to monitor results excluding these fluctuations, we calculate certain non-GAAP measures on a Constant Currency basis whereby current period revenue and expenses denominated in foreign currencies are converted to U.S. dollars using currency exchange rates of the comparable period. We believe that presenting these non-GAAP measures on both a reported and Constant Currency basis is useful in providing a more comprehensive view of trends in our business.

We believe that Adjusted EBITDA is appropriate as a supplemental financial measure as it is used by management to assess operating performance. We believe that Adjusted EBITDA is a useful measure in determining the Company's performance as it reflects certain operating drivers of the Company's business, such as sales growth, operating costs, marketing, general and administrative expense and other operating income and expense. Adjusted EBITDA is not a defined term under GAAP. Adjusted EBITDA is not intended to be a measure of liquidity or cash flows from operations or measures comparable to net income as it does not take into account certain requirements such as capital expenditures and related depreciation, principal and interest payments and tax payments and it includes other supplemental adjustments.

In addition, Adjusted Net Income and Adjusted EPS are supplemental financial measures used to demonstrate GAAP net income and earnings per share excluding certain charges. We use Adjusted Net Income and Adjusted EPS as key performance measures of our earnings performance, and we believe that both management and investors benefit from referring to these non-GAAP financial measures in assessing our performance and when planning, forecasting, and analyzing future periods. These non-GAAP financial measures also facilitate management's internal comparison to our historical performance. These charges vary from period to period; thus, our presentation of Adjusted Net Income and Adjusted EPS may not be indicative of future adjustments or results.

You are encouraged to evaluate each adjustment used in calculating our non-GAAP financial measures and the reasons we consider our non-GAAP financial measures appropriate for supplemental analysis. In evaluating our non-GAAP financial measures, you should be aware that in the future we may incur expenses similar to the adjustments in our presentation. Our non-GAAP financial measures have limitations as analytical tools, and you should not consider these measures in isolation or as a substitute for analysis of our results as reported under GAAP. Our presentation of our non-GAAP financial measures should not be construed as an inference that our future results will be unaffected by unusual or non-recurring items. Our non-GAAP financial measures may not be comparable to other companies. Please see a historical reconciliation of these measures to items in our consolidated financial statements below.
