

Q4 FY2024 Earnings

August 1, 2024

Presentation of financial information & forward-looking statements

Historical financial and operating data in this presentation reflect the consolidated results of ResMed Inc., its subsidiaries, and its legal entities, for the periods indicated.

This presentation includes financial information prepared in accordance with accounting principles generally accepted in the United States, or GAAP, as well as other financial measures referred to as non-GAAP. The non-GAAP financial measures in this presentation, which include non-GAAP Income from Operations, non-GAAP Net Income, and non-GAAP Diluted Earnings per Share, should be considered in addition to, but not as substitutes for, the information prepared in accordance with GAAP. For reconciliations of the non-GAAP financial measures to the most comparable GAAP measures, please refer to the earnings release associated with the relevant reporting period, which can be found on the investor relations section of our corporate website (investor.resmed.com).

In addition to historical information, this presentation contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are based on ResMed’s current expectations of future revenue or earnings, new product development, new product launches, new markets for its products, integration of acquisitions, leveraging of strategic investments, litigation, and tax outlook. The words “believe,” “expect,” “intend,” “anticipate,” “will continue,” “will,” “estimate,” “plan,” “future” and other similar expressions, and negative statements of such expressions, generally identify forward-looking statements, including, in particular, statements regarding expectations of future revenue or earnings, expenses, new product development, new product launches, new markets for our products, the integration of acquisitions, our supply chain, domestic and international regulatory developments, litigation, tax outlook, and the expected impact of macroeconomic conditions on our business.

ResMed’s expectations, beliefs, and forecasts are expressed in good faith and are believed to have a reasonable basis, but actual results could differ materially from those stated or implied by these forward-looking statements. ResMed assumes no obligation to update the forward-looking information in this presentation, whether as a result of new information, future events, or otherwise. For further discussion of the various factors that could impact actual events or results, please review the “Risk Factors” identified in ResMed’s quarterly and annual reports filed with the SEC. All forward-looking statements included in this presentation should be considered in the context of these risks. Investors and prospective investors are cautioned not to unduly rely on our forward-looking statements.

1. Total patients with an OSA diagnosis claim from July 2021 – March 2024; those who were diagnosed with OSA prior to July 2021 are not included in this analysis.

2. GLP-1 initiation is defined by presence of GLP-1 claim at any point from July 2021 – March 2024 (n=811k patients); initiation does not demonstrate GLP-1 treatment adherence, so patients may not be actively taking GLP-1s today.

3. Values show absolute percentage difference in presence of any PAP-related claim from July 2021 – March 2024 comparing OSA patients who used GLP-1s versus OSA patients with no GLP-1 use.

4. Values show absolute percentage difference in presence of any PAP-related claim at each timepoint post PAP setup from July 2021 – March 2024 comparing OSA patients who used GLP-1s versus OSA patients with no GLP-1 use.

5. Majority of patients in the analysis population were prescribed newer GLP-1 drugs: semaglutide or tirzepatide

Non-GAAP gross profit	\$ 723,514	\$ 625,781	\$ 2,702,528	\$ 2,386,058
Non-GAAP gross margin	59.1 %	55.8 %	57.7 %	56.5 %

Note regarding non-GAAP reconciliations

^(A) ResMed adjusts for the impact of the amortization of acquired intangibles, restructuring expenses, field safety notification expenses, acquisition-related expenses, gain on insurance recoveries, and associated tax effects from their evaluation of ongoing operations, and believes that investors benefit from adjusting these items to facilitate a more meaningful evaluation of current operating performance.

ResMed believes that non-GAAP diluted earnings per share is an additional measure of performance that investors can use to compare operating results between reporting periods. ResMed uses non-GAAP information internally in planning, forecasting, and evaluating the results of operations in the current period and in comparing it to past periods. ResMed believes this information provides investors better insight when evaluating ResMed’s performance from core operations and provides consistent financial reporting. The use of non-GAAP measures is intended to supplement, and not to replace, the presentation of net income and other GAAP measures. Like all non-GAAP measures, non-GAAP earnings are subject to inherent limitations because they do not include all the expenses that must be included under GAAP.
