“The world is ready for a SmartDesk. It is 2018 but our workspaces have not evolved like most things we interact with on a daily basis like our smartphones, smart cars and smart homes,” said Cemtrex’s CEO and Chairman, Saagar Govil. “With the SmartDesk we intend to transform and disrupt the \$500 billion annual PC market globally, as it will streamline workflows, improve

productivity with its many features, and provide superior multitasking capabilities for the most demanding professionals. The SmartDesk brings the desktop experience into the 21st century. Between 2007 and 2017, there were [over 1 billion desktops shipped worldwide](#), which could be replaced with the SmartDesk, thus creating a massive potential market for the SmartDesk. Due to the strong interest, we are optimistic that Cemtrex’s SmartDesk could become the leading industry standard for the modern workspace.”

The world has focused on mobile technologies for the last twenty years that give us more freedom to choose where to work, but these technologies sacrifice performance when you

are at your base – whether it is your home or office. The SmartDesk eliminates the weaknesses of the current workspace – wires, clutter, out-dated technology, cross-device incompatibility issues – all of which interrupt workflow and slow you down, and mobile technology has limited screen real estate to work with, which is especially challenging for multi-tasking. The SmartDesk is a ‘must-have’ device for all corporate and individual offices where you spend at least one-third of your day working.

The SmartDesk key features include:

- 72 inches of high-resolution, multi-touch displays
- STARK Gesture System for Touch, Touchless, and Stylus Control
- Digital Phone and Webcam that integrates with most VOIP providers
- Integrated Document Scanner
- Wireless Smartphone Charging & Connectivity
- Built-in Digital Keyboard and Multi-touch input trackpad
- Powerful Windows PC with 8th Generation Intel Core i7
- One Single Wire
