Cemtrex's Virtual Driver Interactive (VDI) Now Offering Driving Essentials^{XE} Teen Driver Training on PlayStation5 and Xbox Series X

Teens Able to Learn How to Drive at Home Using Next Generation Consoles During Pandemic

Brooklyn, NY, Nov. 23, 2020 (GLOBE NEWSWIRE) -- — [Cemtrex Inc.](#) (NASDAQ: CETX, CETXP, CETXW), a technology company driving innovation in Internet of Things (IoT), security, machine vision & artificial intelligence, and augmented & virtual reality, today announced its subsidiary Virtual Driver Interactive (VDI) is now offering the Driving Essentials^{XE} program on the newly released Sony PS5 and Microsoft Xbox Series X platforms, in addition to their full line of simulation training products for schools and public safety organizations.

A recent survey conducted by the Governor's Highway Safety Association showed that 62% of parents said their child had experienced a COVID-19 related disruption in driver education. With Microsoft and Sony officially launching their latest next-generation consoles this month, it is the ideal time for the Driving Essentials^{XE} program to help parents bridge the gap in formal training created by the pandemic.

The Driving Essentials^{XE} program provides the millions of PlayStation and Xbox users with the ability to experience challenging and real-world driving experiences all from the safety of their own home. The in-home use version of VDI's product portfolio is an immersive driver training program that teaches the critical skills essential to safe driving in an entertaining and engaging way. With 10 in-depth lessons and unlimited free driving, it offers many advanced concepts that are not covered in online or driving school courses including driving in highway, city, residential, rural and off road in adjustable weather conditions. Inclement weather, distracted driving consequences and complex traffic scenarios are normally too dangerous to practice in real life but are covered in Driving Essentials^{XE}. For \$29, the program is available at both the Sony and Microsoft stores.

"With today's COVID-19 world, there is even less opportunity for teens to get the driver training they require prior to getting behind the wheel," said Bob Davis, VDI General Manager. "Driving Essentials^{XE} offers teens a tool to gain real-world experience in the safety of their home. By combining technology with training, we let them face challenging traffic scenarios and master basic driving skills which give them and their parents the confidence they need to get behind the wheel," concluded Davis.

"VDI is a market leader with best-in-class driver training products and this new offering

demonstrates their nimbleness to bring a desperately needed driving solution for today's teenage parent searching for in-person driving alternatives," said Saagar Govil, Chairman and CEO of Centrex. "VDI has built a successful business with innovative technologies, an effective product portfolio and extensive customer base. Those customers include the U.S. Postal Service, numerous universities and school districts along with some of the nation's largest fleets in transportation, utilities, networking, insurance and public safety sector," concluded Govil.
