

# Quality of Life- Nontuberculous Mycobacteria (NTM) Module

---

ALEXANDRA L. QUITTNER, PH.D.

*ACKNOWLEDGEMENTS:* EMILY HENKLE, KEN OLIVIER, MATTHIAS SALATHE, KEVIN WINTHROP

Quittner A, Madan A, Saez-Flores E, Olivier K, Fennelly K, Schmid A, & Salathe M. Development of the quality of life module for nontuberculous mycobacteria (NTM). *European Respiratory Journal*, 2015; 46, Supp. 59, No. 275. (Abstract)

# Objectives

---

- **Nontuberculous mycobacteria (NTM) is a substantial cause of pulmonary infections and can affect those with chronic respiratory diseases, such as cystic fibrosis (CF) and bronchiectasis.**
- **NTM is rare, poorly understood, and difficult to treat, with few clear identified endpoints to evaluate new medications in randomized, controlled trials.**
- **We are developing a patient-reported outcomes (PROs) that identify key symptoms, tracks the progression of disease, and can serve as an important end-point in clinical trials of new therapies (FDA Guidance, 2009)**
- **The aim of this study was to develop an instrument for NTM symptoms; can be used with existing PROs measures for CF (CFQ-R) and bronchiectasis (QOL-B)**

# Patient-Reported Outcomes: PROs

---

Both FDA & EMA now accept PROs as primary or secondary endpoints in clinical trials

***Treatment Benefit*** = how a patient feels, functions and survives (FDA, 2009)

Begins with open-ended interviews with patients, experts; content analysis of key concepts; draft items and cognitive testing

Psychometric validation: reliability, validity, sensitivity to changes

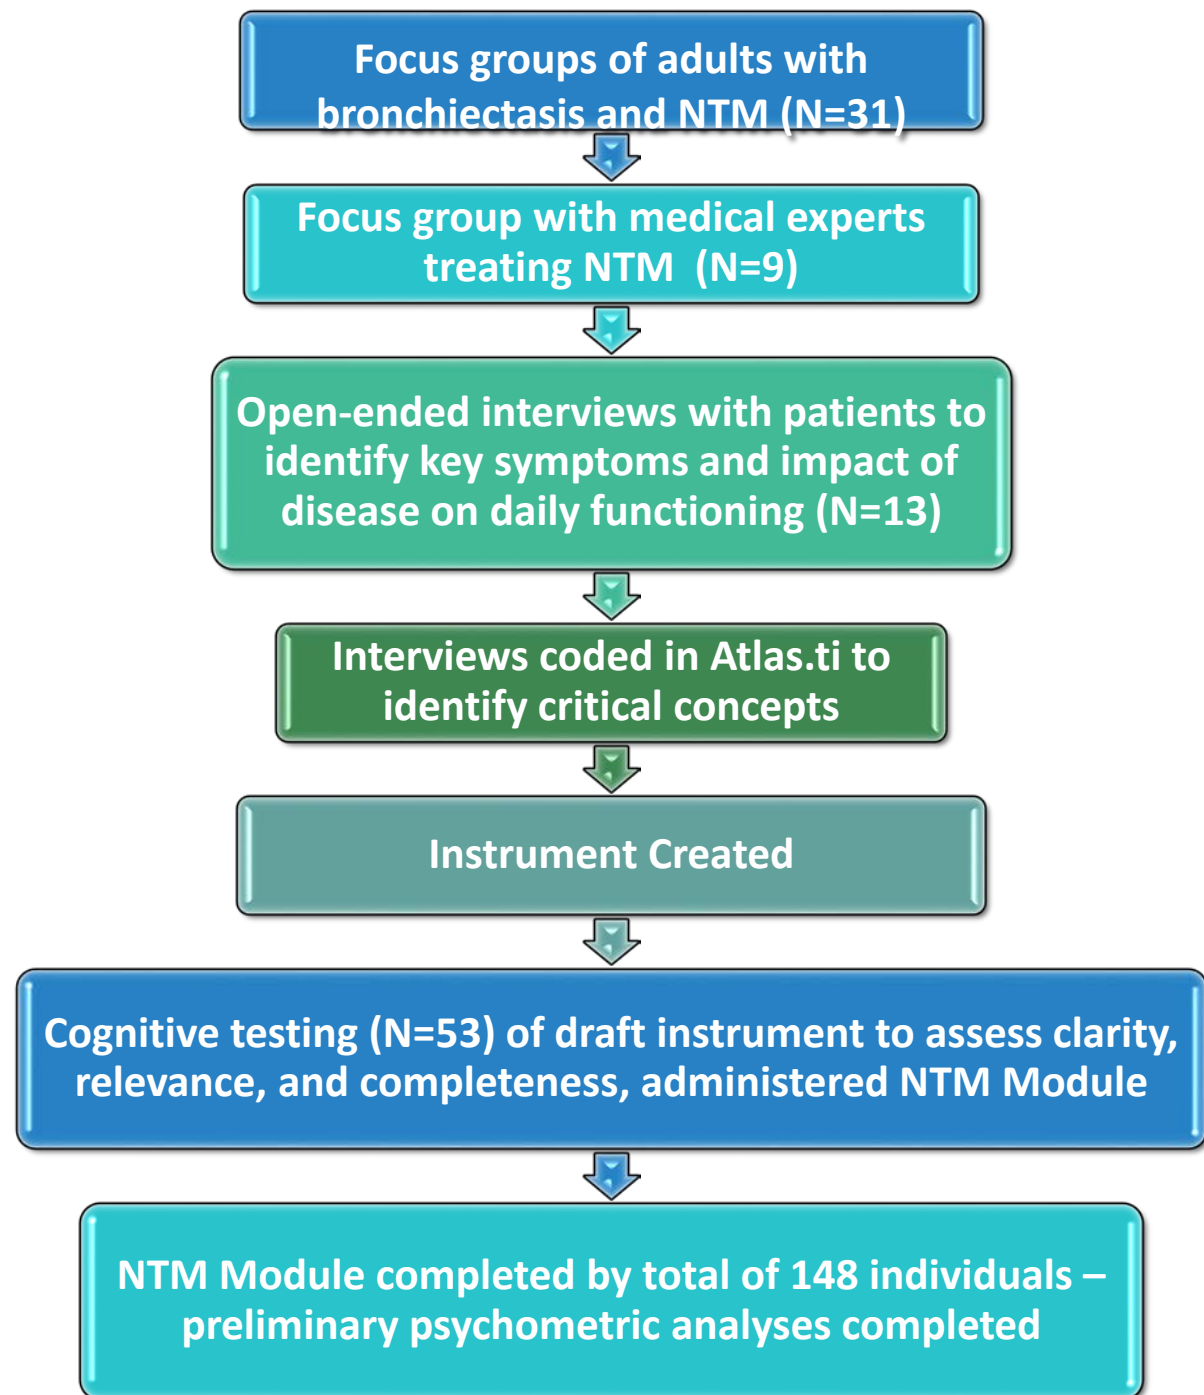

Importantly: reflects the “*patient’s voice*”

# Methods

---

- **We followed the FDA Guidance on PROs (2009)**
- **Reviewed published literature on NTM to identify critical symptoms and challenges of living with NTM**
- **Focus groups, moderated by a psychologist, were conducted with adults with NTM + bronchiectasis at 2 sites, N=31**
- **A consensus panel of 9 pulmonologists with expertise in NTM provided input on how NTM and its treatment affects their patients**
- **Open-ended interviews were conducted with 13 patients: how NTM affects daily functioning; frequent and difficult symptoms coded in Atlas.ti**
- **Cognitive testing, using a standard “think aloud” procedure conducted with 53 adults; input on preliminary items & rating scales**
- **We completed an initial psychometric validation of the module in 148 patients**

# Measurement Development Process

# Key Themes

## Main themes from Focus Groups (N=31)

- Frequent pain (dull, aches, pressure in chest)
  - Metal taste in mouth
  - Fever
  - Lack of sleep

## Main themes from Open-Ended Interviews (N=13)

- Fatigue
- Sensitivity to smell
- Sensitivity to cold/chills
- Hot flashes/sweats

## Main themes from Physician Panel (N=9)

- Memory loss
- Body Image issues
- Side effects from medications: GI problems
- Weight loss with greater disease severity

# Results

---

- **Focus groups and open-ended interviews identified sleep quality, fever, and chills; physicians also identified body image as a concern**
- **The new NTM Module consists of eight unique symptoms; administered to 148 patients ( $\alpha = .73$ ); very good reliability**

## Sample items from NTM module

**“Bothered by cold weather?”**

**“Have you experienced problems with memory?”**

# NTM Symptoms

---

*Indicate how you have been feeling during the past week:*

	A lot	A moderate amount	A little	Not at all
46. Have you had eating problems? .....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
47. Have you had trouble gaining weight?.....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
48. Have you felt feverish (sweating, chills)?.....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
49. Have you had problems sleeping?.....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
50. Have you had pain?.....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
51. Have you felt bothered by cold weather?.....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
52. Have you had sensitivity to smell?.....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
53. Have you had sensitivity to taste?.....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
54. Have you had a bad taste in your mouth due to sputum?.....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
55. Have you experienced problems with memory?.....	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

# Internal consistency of NTM module (N = 148)

---

Scale Name	Cronbach's Alpha
NTM Symptoms	0.73
Body Image	0.76
Eating Problems	0.89
Digestive Symptoms	0.75

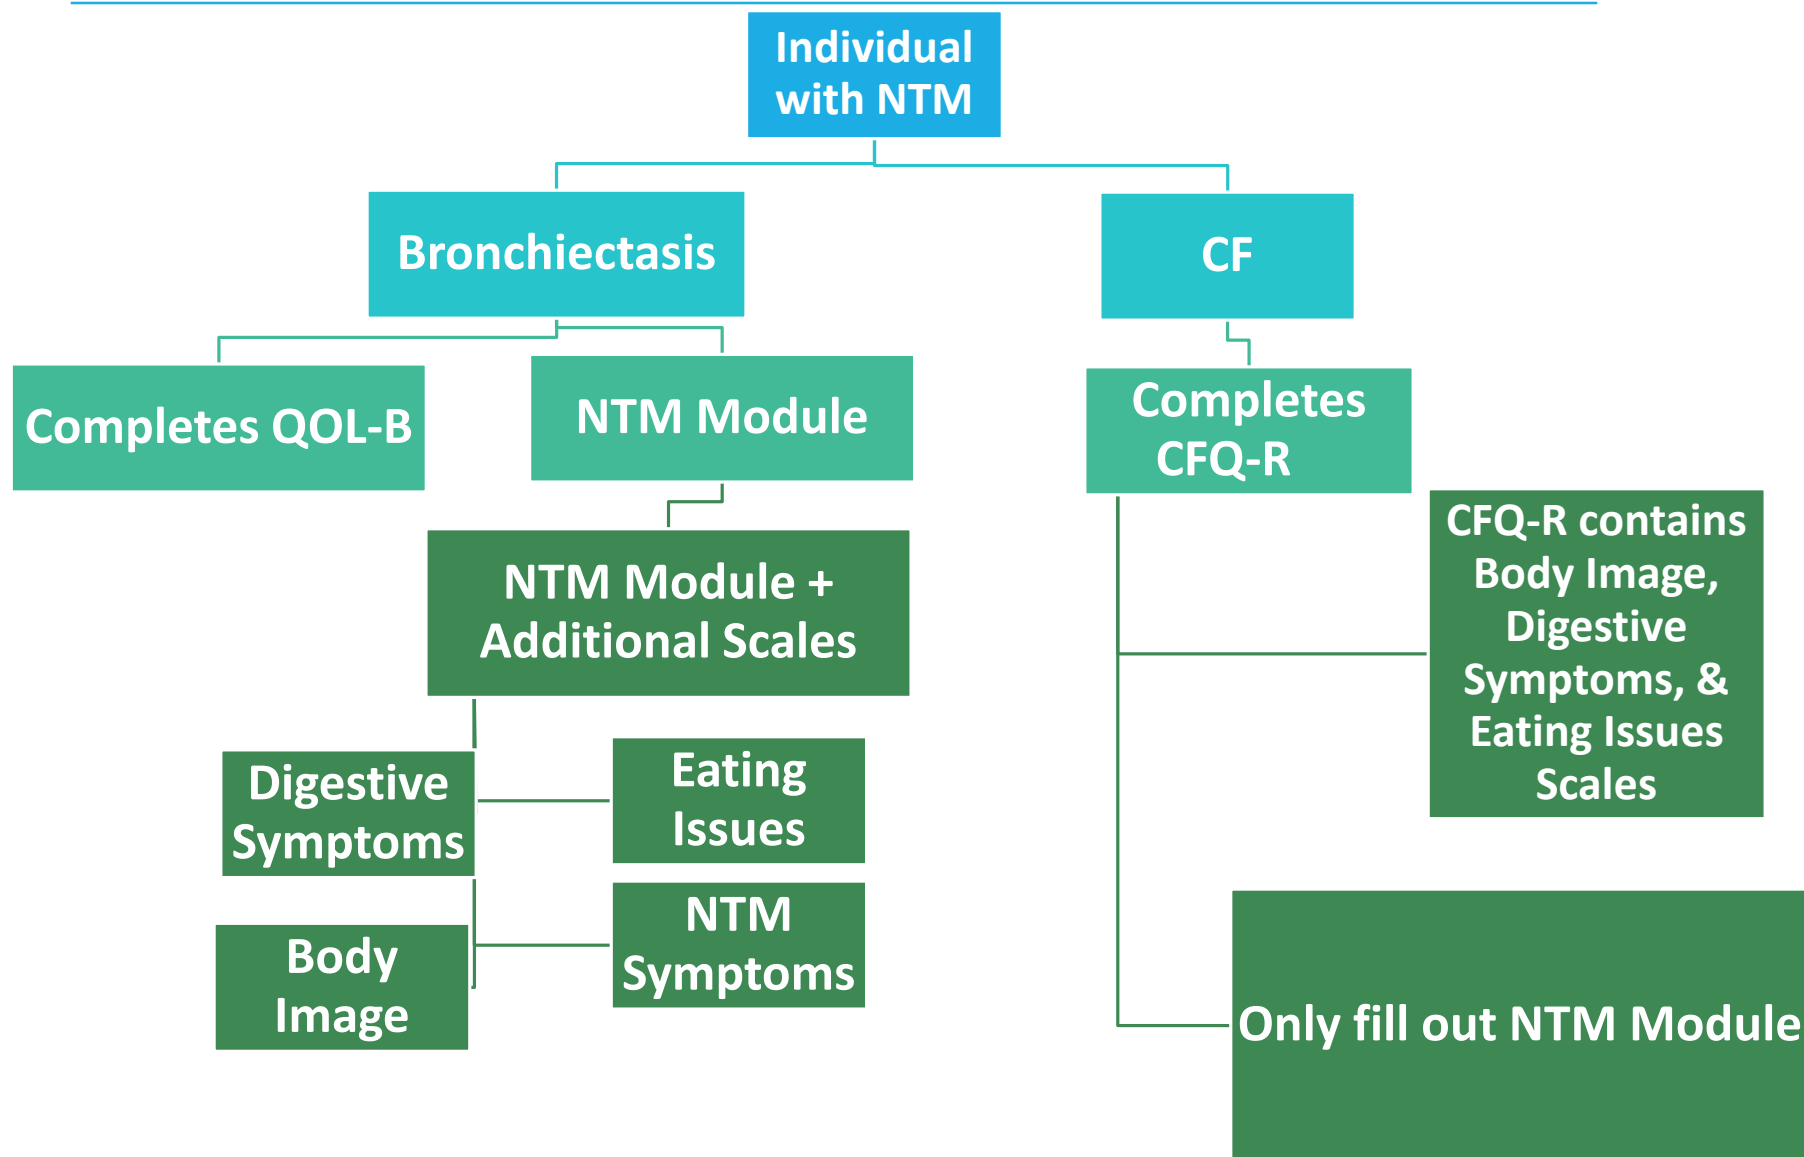

# Multitrait analysis of NTM module (N = 148)

Item	Abbreviated Item Content	<i>NTM Symptoms</i>
NTM48	Feverish (chills, sweating)	0.42 <sup>a</sup>
NTM49	Problems sleeping	0.39 <sup>a,b</sup>
NTM50	Pain	0.41 <sup>a</sup>
NTM51	Bothered by cold weather	0.51 <sup>a</sup>
NTM52	Sensitivity to smell	0.37 <sup>a,b</sup>
NTM53	Sensitivity to taste	0.39 <sup>a</sup>
NTM54	Bad taste in mouth	0.48 <sup>a</sup>
NTM55	Memory problems	0.45 <sup>a</sup>

<sup>a</sup>Item-scale correlation adjusted for overlap (item removed from its scale for correlation)

<sup>b</sup>Item-scale correlation is <.40

# Algorithm for administering NTM module with QOL-B or CFQ-R

# Summary & Future Directions

---

- **Cognitive testing indicated that the draft items were relevant, clear, and easy to understand**
- **Very good reliability**
- **When utilizing NTM module with bronchiectasis: use module + Body Image, Eating Issues, & Digestive Symptoms scale?**
- **Need more data!**

# Summary & Future Directions

---

- **Next steps include additional psychometric testing, and identification of meaningful change**
- **Insmed has agreed to perform extensive psychometric analyses on their baseline clinical trial:**
  - **Reliability**
  - **Convergent validity: medical characteristics, microbiology, SGRQ, 6-minute walk**

# Acknowledgements
