

# Equinix to Provide Connectivity Infrastructure for DISH's 5G Buildout

## Equinix to play a critical role in delivery of first 5G network

REDWOOD CITY, Calif., Nov. 18, 2021 /PRNewswire/ -- [Equinix, Inc.](#) (Nasdaq: EQIX), the world's digital infrastructure company™, today announced a partnership with DISH to provide digital infrastructure services in support of the United States' first cloud-native, Open RAN-based 5G network. By partnering with Equinix, DISH will have access to the critical interconnection infrastructure in Equinix's International Business Exchange™ (IBX®) data centers across the U.S.

"DISH is taking the lead in delivering on the promise of 5G in the U.S., and our partnership with Equinix will enable us to secure critical interconnections for a nationwide 5G network," said Jeff McSchooler, DISH executive vice president of wireless network operations. "With proximity to large population centers, as well as network and cloud density, Equinix is the right partner to connect our cloud-native 5G network."

Equinix provides customers with access to more than 1,800 networks and over 2,900 cloud, IT, and system integrator services globally. A 5G network – built from the ground up – requires this level of highly-distributed, well-integrated infrastructure. By connecting directly to strategic partners and end users, DISH will leverage Equinix's footprint to help bring 5G to cities nationwide.

"5G will have a transformative impact on way the world connects and does business, but it requires a modern, connected underlying infrastructure at the edge," said Jon Lin, President of Americas, Equinix. "DISH will leverage our extensive ecosystem of network partners and cloud providers to deliver a fast, powerful 5G network to communities across the United States."

Equinix recently announced the opening of a first-of-its-kind, fully functional [5G and Edge Technology Development Center](#) which includes a fully operational, non-standalone 5G network from Nokia to test and validate various 5G services and use cases. Equinix has invested in helping service providers and network operators bring innovative concepts to market by providing an agile production framework for assessing, incubating and testing 5G and edge solutions for end-to-end secure applications. The company expects this will support the growing demand for companies to accelerate their evolution from traditional to digital businesses by rapidly scaling their infrastructure, easily adopting hybrid multicloud architectures, and interconnecting with strategic business partners within the Platform Equinix global ecosystem of over 10,000 customers.

## **About Equinix**

[Equinix](#) (Nasdaq: EQIX) is the world's digital infrastructure company, enabling digital leaders to harness a trusted platform to bring together and interconnect the foundational infrastructure that powers their success. Equinix enables today's businesses to access all the right places, partners and possibilities they need to accelerate advantage. With Equinix, they can scale with agility, speed the launch of digital services, deliver world-class experiences and multiply their value.

## **About DISH**

DISH Network Corporation is a connectivity company. Since 1980, it has served as a disruptive force, driving innovation and value on behalf of consumers. Through its subsidiaries, the company provides television entertainment and award-winning technology to millions of customers with its satellite DISH TV and streaming SLING TV services. In 2020, the company became a nationwide U.S. wireless carrier through the acquisition of Boost Mobile. DISH continues to innovate in wireless, building the nation's first virtualized, O-RAN 5G broadband network. DISH Network Corporation (NASDAQ: DISH) is a Fortune 200 company.

## **Forward-Looking Statements**

This press release contains forward-looking statements that involve risks and uncertainties. Actual results may differ materially from expectations discussed in such forward-looking statements. Factors that might cause such differences include, but are not limited to, the challenges of acquiring, operating and constructing IBX data centers and developing, deploying and delivering Equinix products and solutions, unanticipated costs or difficulties relating to the integration of companies we have acquired or will acquire into Equinix; a failure to receive significant revenues from customers in recently built out or acquired data centers; a failure to complete any financing arrangements contemplated from time to time; competition from existing and new competitors; the ability to generate sufficient cash flow or otherwise obtain funds to repay new or outstanding indebtedness; the loss or decline in business from our key customers; risks related to our taxation as a REIT; and other risks described from time to time in Equinix filings with the Securities and Exchange Commission. In particular, see recent Equinix quarterly and annual reports filed with the Securities and Exchange Commission, copies of which are available upon request from Equinix. Equinix does not assume any obligation to update the forward-looking information contained in this press release.
