MACDERMID GRAPHICS SOLUTIONS TO EXHIBIT AT LABELEXPO EUROPE 2019

(Atlanta, GA USA) - August 26, 2019 – MacDermid Graphics Solutions, a worldwide supplier of photopolymer printing plates and platemaking systems, will be exhibiting at the world's largest event for the label and package printing industry – Labelexpo Europe 2019 in Brussels, Belgium, taking place September 24-27, 2019.

MacDermid Graphics Solutions will introduce our LAVA® NW-M thermal processing unit to the European market, as well as our debut of our expanded LUX® ITP™ inherently flat-top dot plates to include LUX® ITP™ 60, LUX® ITP™ M, and our newest plate – LUX® ITP™ EPIC®. All three plates are formulated with our patented Clean Plate technology reduces the number of press stops and ensures a cleaner print and better ink laydown. The LUX ITP plates, processed using the LAVA thermal processing system, create a streamlined workflow for printers and converters to reduce platemaking time.

Visit us at stand 5A17 to learn how our innovative product portfolio will take your flexographic print capability to the next level.
