Our new agreement also includes plans for significant additional enhancements and investment into the existing SANY NFS™ implementation in China."

Salim Ghauri, President of NetSol Technologies, commented, "This agreement is a unique opportunity for us to cooperate with a true global leader in the heavy machinery industry and will allow us to build on our existing relationship with SANY. By working closely to develop customized additions to the NFS™ platform that meet SANY's specific and evolving needs, we will also have the opportunity to apply these new features to our product offerings aimed at the finance and leasing software market, where we plan to focus much of our future growth efforts. We look forward to working with SANY on this initiative and believe that it will have significant benefits for NetSol, both financially and through the expansion of our feature-rich software portfolio for future clients."
