- Capitalize on opportunities created by the long-term structural changes in the real estate lending market and the continuing limited liquidity in the commercial and investment real estate markets
- Take advantage of the prevailing economic environment as well as economic, political and social trends that may impact real estate lending
- Remain flexible in order to capitalize on changing sets of investment opportunities that may be present in the various points of an economic cycle
- Operate so as to qualify as a REIT and for an exemption from registration under the Investment Company Act
- Capitalize on competitor policies that inhibit borrower's repeat business
- Enhance marketing efforts that focus on borrower retention and acquisition
