

Dance Biopharm Partners With DarioHealth to Expand Access to Digital Therapeutics Platform for Patients With Chronic Diseases

- Dance Biopharm signs an agreement with DarioHealth to integrate Dance's gentle mist smart inhaler into DarioHealth's platform allowing for automated, real-time treatment data through a mobile application

- Combined platforms have potential to improve patient engagement and compliance

DURHAM, North Carolina and NEW YORK, Sept. 11, 2019 /PRNewswire/ --[Dance Biopharm](#) Holdings, Inc., a clinical-stage company reimagining the treatment of chronic diseases with inhaled therapies, announced today it has formed a strategic alliance with [DarioHealth Corp.](#) "Dario" (Nasdaq: DRIO), a leading, global digital therapeutics company, to expand access to a personalized digital health management platform for patients with chronic diseases. Under the terms of the agreement, Dance Biopharm will integrate its gentle mist smart inhaler into DarioHealth's digital therapeutics platform to provide patients automated, real-time treatment data through an advanced mobile application. Dario will immediately start the design of the integrated solution for Dance to accommodate clinical trials and, upon regulatory approval, any marketed solutions.

Dance Biopharm's smart inhaler paired with proprietary gentle mist biologic formulations allows for optimal and precise delivery of therapies through the lungs. The vibrating mesh within the device facilitates the transmission of a soft mist that allows for a lung deposition 2-4 times higher than conventional inhalers. In clinical trials, the device delivered a gentle mist formulation of human insulin with a faster drug onset and comparable duration to subcutaneous delivery of a rapid insulin (Humalog) in patients with type 2 diabetes (T2D). Dance is also advancing a convenient inhalable pre-meal GLP-1 receptor agonist to improve postprandial glucose control in T2D patients.

Dario's digital therapeutics platform combines data analytics, high-quality software and personalized coaching to empower individuals with information to make healthy behavioral changes. The user-centric platform is comprised of MyDario™, a mobile application that is data-driven, with an all-in-one blood glucose monitoring system and an optional connected blood pressure monitoring system. It is complemented by DarioEngage™, a healthcare solutions platform for health and wellness providers to customize and integrate a patient's data into their care continuum.

"We are excited to partner with DarioHealth in empowering patients to take charge of their chronic illness. This platform is well established in the digital therapeutics space and has demonstrated positive behavior change in patients with chronic diseases through its user-centered approach," said Anne Whitaker, chief executive officer of Dance Biopharm. "We share a similar goal of adapting our platforms to chronic diseases beyond diabetes. Dance Biopharm is exploring opportunities to pair the smart inhaler with gentle mist biologic formulations beyond insulin. Our initial focus is on rare and severe diseases in the endocrinology, respiratory, and cardiovascular space, where our platform and expertise present a unique opportunity to achieve better treatment efficiency."

"Diabetes is a complex chronic condition that evolves over time, making real-time, streamed patient data essential to

care," said Erez Raphael, chief executive officer of DarioHealth. "Through this strategic alliance, we are excited to expand the potential for our patient-centered, diabetes care and management solutions by integrating the smart inhaler, optimized to deliver a gentle mist formulation of insulin through the lungs, into our digital therapeutics platform, which includes blood glucose and blood pressure monitoring systems. Our goal is to place control of diabetes management directly into the hands of our users and, pending completion of clinical trials and regulatory approval, we believe that this alliance will help advance that critical objective."

About Dance Biopharm

Dance Biopharm is a clinical-stage company reimagining the treatment of chronic diseases with inhaled therapies. Our gentle mist inhaler is designed with smart technology to optimize the precise delivery of biologic therapies through the lungs. We are building a diverse pipeline of inhaled biologic products with initial focus on rare and severe diseases in the endocrinology, respiratory and cardiovascular space, where our platform and expertise present a unique opportunity to achieve better treatment efficiency. We have initiated development programs in glucagon-like peptide-1 (GLP-1), parathyroid hormone (PTH) and human growth hormone (HGH).

Cautionary Note Regarding Forward-Looking Statements

This news release and the statements of representatives and partners of DarioHealth Corp. (the "Company") related thereto contain or may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Statements that are not statements of historical fact may be deemed to be forward-looking statements. Without limiting the generality of the foregoing, words such as "plan," "project," "potential," "seek," "may," "will," "expect," "believe," "anticipate," "intend," "could," "estimate," or "continue" are intended to identify forward-looking statements. For example, when the Company discusses the integration of Dance Biopharm's gentle mist inhaler with its digital platform, that Dario will immediately start the design of the integrated solution for Dance to accommodate clinical trials and, upon regulatory approval, any marketed solutions and the belief that Dario's alliance with Dance, pending completion of clinical trials and regulatory approval, will help advance the critical objective of placing control of diabetes management directly into the hands of its users, it is using forward-looking statements. Readers are cautioned that certain important factors may affect the Company's actual results and could cause such results to differ materially from any forward-looking statements that may be made in this news release. Factors that may affect the Company's results include, but are not limited to, regulatory approvals, product demand, market acceptance, impact of competitive products and prices, product development, commercialization or technological difficulties, the success or failure of negotiations and trade, legal, social and economic risks, and the risks associated with the adequacy of existing cash resources. Additional factors that could cause or contribute to differences between the Company's actual results and forward-looking statements include, but are not limited to, those risks discussed in the Company's filings with the U.S. Securities and Exchange Commission. Readers are cautioned that actual results (including, without limitation, the timing for and results of the Company's commercial and regulatory plans for Dario) may differ significantly from those set forth in the forward-looking statements. The Company undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable law.
