# Rigel Announces Third Quarter 2015 Financial Results

## - Conference Call and Webcast Today at 5:00 PM Eastern Time -

SOUTH SAN FRANCISCO, Calif., Nov. 3, 2015 /PRNewswire/ -- Rigel Pharmaceuticals, Inc. (Nasdaq:RIGL) today reported financial results for the third quarter and nine months ended September 30, 2015.

"We are concentrating our efforts on the timely completion of our two Phase 3 studies with fostamatinib in immune thrombocytopenic purpura (ITP). We expect topline data from the first Phase 3 trial in the middle of 2016 with the second reporting shortly thereafter," said Raul Rodriguez, president and chief executive officer of Rigel. "Also, our new partnership with Aclaris Therapeutics demonstrates our continuing efforts to explore additional partnerships and advance opportunities in areas beyond our therapeutic focus." he added.

For the third quarter of 2015, Rigel reported a net loss of $6.7 million, or $0.08 per share, compared to a net loss of $20.9 million, or $0.24 per share, for the same period of 2014. Weighted average shares outstanding for the third quarters of 2015 and 2014 were 88.5 million and 87.8 million, respectively.

Contract revenues from collaborations of $13.0 million in the third quarter of 2015 were comprised of an $8.0 million upfront payment from Aclaris Therapeutics International Limited pursuant to the license agreement executed in August 2015 for the development and commercialization of certain Rigel JAK inhibitors for the treatment of alopecia areata and other dermatological conditions, as well as $4.8 million from the amortization of the $30.0 million upfront payment from Bristol-Myers Squibb. There were no contract revenues from collaborations in the third quarter of 2014.

Rigel reported costs and expenses of $19.8 million in the third quarter of 2015, compared to $21.0 million for the same period in 2014. The decrease in operating expenses was primarily due to the decrease in facilities costs resulting from the sublease agreement executed in December 2014, partially offset by the increase in research and development costs related to Rigel's Phase 3 clinical program for fostamatinib in ITP.

For the nine months ended September 30, 2015, Rigel reported a net loss of $38.8 million, or $0.44 per basic and diluted share, compared to a net loss of $68.6 million, or $0.78 per basic and diluted share, for the same period of 2014.

As of September 30, 2015, Rigel had cash, cash equivalents and short-term investments of $134.4 million, compared to $143.2 million as of December 31, 2014. Rigel expects to end 2015 with cash and investments in excess of $115.0 million, which is expected to be sufficient to fund operations into the second quarter of 2017.
