## BrainChip CEO Louis DiNardo accepted into Forbes Technology Council

**Forbes Technology Council Is an Invitation-Only Community for World-Class CIOs, CTOs, and Technology Executives.**

SAN FRANCISCO, Sept. 24, 2019 (GLOBE NEWSWIRE) -- Louis DiNardo, CEO of BrainChip, a leading provider of ultra-low power, high performance edge AI technology has been accepted into Forbes Technology Council, an invitation-only community for world-class CIOs, CTOs, and technology executives.

Louis DiNardo, CEO,  
BrainChip

DiNardo was vetted and selected by a review committee based on the depth and diversity of his experience. Criteria for acceptance include a track record of successfully impacting business growth metrics, as well as personal and professional achievements and honors.

"I look forward to providing insight on the game changing AI technology that we have created at BrainChip to global companies such as those represented in Forbes Councils," said DiNardo. "The technology community is embracing AI and I am excited to share information on why implementing these critical edge attributes for applications in surveillance, advanced driver assistance systems (ADAS), autonomous vehicles (AV), vision guided robotics, drones, augmented and virtual reality (AR/VR), acoustic analysis and Industrial Internet-of-Things (IoT) are so important."

"We are honored to welcome Louis DiNardo into the community," said Scott Gerber, founder of Forbes Councils, the collective that includes Forbes Technology Council. "Our mission with Forbes Councils is to bring together proven leaders from every industry, creating a curated, social capital-driven network that helps every member grow professionally and make an even greater impact on the business world."

As an accepted member of the Council, DiNardo has access to a variety of exclusive opportunities designed to help him reach peak professional influence for BrainChip. He will connect and collaborate with other respected local leaders in a private forum. DiNardo will also be invited to work with a professional editorial team to share his expert insights in original business articles on Forbes.com, and to contribute to published Q&A panels alongside other experts.

### **About BrainChip**

BrainChip is a global technology company that has developed a revolutionary advanced neural networking processor that brings artificial intelligence to the edge in a way that existing technologies are not capable. The solution is high performance, small, ultra-low power and enables a wide array of edge capabilities that include local training, learning and inference. The Company markets an innovative event-based neural network processor that is inspired by the spiking nature of the human brain and implements the network processor in an industry standard digital process. By mimicking brain processing BrainChip has pioneered a spiking neural network, called Akida™, which is both scalable and flexible to address the requirements in edge devices. At the edge, sensor inputs are analyzed at the point of acquisition rather than transmission to the cloud or a datacenter. Akida is designed to provide a complete ultra-low power AI Edge Network for vision, audio and smart transducer applications. The reduction in system latency provides faster response and a more power efficient system that can reduce the large carbon footprint datacenters.
